John Podlaski** John Podlaski's encore Vietnam War novel brings back John ('Polack') Kowalski, the central character in 'Cherries', and introduces us to Louis ('LG') Gladwell, his irrepressible black friend. Polack and LG are a 'Salt and Pepper' team, best buddies and brothers in a way that only those who have fought side-by-side in a war can ever truly understand. The year is 1970, and the story follows the two soldiers - impressionable Detroit teenagers - during their long night in a Listening Post ('LP'), some 500 meters beyond the bunker line of the new firebase. Their assignment as a "human early warning system", is to listen for enemy activity and forewarn the base of any potential dangers. As they were new to the "Iron Triangle" and its reputation, little did they know that units before them lost dozens of soldiers in this nightly high-risk task and referred to those assigned as "bait for the enemy" and "sacrificial lambs". Sitting in the pitch black tropical jungle - with visibility at less than two feet - John's imagination takes hold throughout the agonizing night, and at times, transports him back to some of his most vivid childhood memories - innocent, but equally terrifying at the time. As kids, we instinctively run as fast as we can to escape imaginary or perceived danger, but as soldiers, men are trained to conquer their fears and develop the confidence to stand their ground and fight. Running is not an option. In 'When Can I Stop Running?' the author juxtaposes his nightmarish hours in the bush with some of his most heart-pounding childhood escapades. Readers will relate to the humorous childish antics with amusement; military veterans will find themselves relating to both of the entertaining and compelling recollections. **Translation and Opposition Multilingual Matters** Translation and Opposition is an edited volume that brings together cultural and sociological perspectives by examining translation through the prism of linguistic/cultural hybridity and inter/intra-social agency. In a collection of diverse case studies, ranging from the translation of political texts to interpreting in concentration camps, the book explores issues of power struggle, ideology, censorship and identity construction. The contributors to the volume show how translators, interpreters and subtitlers as mediators put their specific professional and ethical competences to the test by treading the dividing lines between constellations of 'in-groups' and cultural or political 'others'. **Cohomology and Differential Forms Courier Dover Publications** This monograph explores the cohomological theory of manifolds with various sheaves and its application to differential geometry. Based on lectures given by author Izu Vaisman at Romania's University of Iasi, the treatment is suitable for advanced undergraduates and graduate students of mathematics as well as mathematical researchers in differential geometry, global analysis, and topology. A self-contained development of cohomological theory constitutes the central part of the book. Topics include categories and functors, the Čech cohomology with coefficients in sheaves, the theory of fiber bundles, and differentiable, foliated, and complex analytic manifolds. The final chapter covers the theorems of de Rham and Dolbeault-Serre and examines the theorem of Allendoerfer and Eells, with applications of these theorems to characteristic classes and the general theory of harmonic forms. **Spins in Chemistry Courier Corporation** Originally delivered as a series of lectures, this volume systematically traces the evolution of the "spin" concept from its role in quantum mechanics to its assimilation into the field of chemistry. Author Roy McWeeny presents an in-depth illustration of the deductive methods of quantum theory and their application to spins in chemistry, following the path from the earliest concepts to the sophisticated physical methods employed in the investigation of molecular structure and properties. Starting with the origin and development of the spin concept, the text advances to an examination of spin and valence; reviews a simple example of the origin of spin Hamiltonians; and explores spin density, spin populations, and spin correlation. Additional topics include nuclear hyperfine effects and electron spin-spin coupling, the g tensor, and chemical shifts and nuclear spin-spin coupling. **Children's Books in Print R. R. Bowker Crossing the Quality Chasm A New Health System for the 21st Century National Academies Press** Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change. **God's Feminist Movement Redefining a "Woman's Place" From a Biblical Perspective Destiny Image Publishers** Experience True Liberation by Seeing Your Beauty, Femininity, and Freedom From Heavens Point of View Has Christianity kept women trapped in the stone age? In many ways, yes; but this is not by Gods design. As society offers women opportunities to explore outer-space and govern nations, the church often stifles and limits them. The tide is changing, though. Amber Picotas Gods Feminist Movement is a new covenant manifesto calling women to embrace their true identity in Christ and fulfill their destiny as revolutionaries who shape the course of history with the Kingdom of God. There is a powerful new feminist movement emerging in the body of Christ. Its not politically driven and its not being championed by an uprising of angry man-haters. Based on an intense study of Scripture, factoring in historical and contextual hermeneutics and original languages, Picota shares a practical, non-legalistic, and non-traditional (yet deeply Biblical) look at topics that women commonly face, such as: Dating and Modesty Female Leaders in the Church Submission in Marriage Beauty and Self-Image Celebrate the power

and beauty of womanhood. God has given you permission to change the world by being you! Break off religious traditions that keep women trapped in old school legalism and move beyond Christian clichés that minimize a woman's true position in Christ! **Heritage Rare Books & Manuscripts Auction Final Session # 683 Heritage Capital Corporation Samuel Beckett's Abstract Drama Works for Stage and Screen, 1962-1985 Peter Lang** Samuel Beckett's Play, written 1962-63, was an aesthetic watershed inaugurating his late, 'abstract' dramatic style. This book gets close to Beckett's creative process by examining the possible influence of Arnold Schoenberg's twelve-tone music and Vassily Kandinsky's abstract painting upon this formal shift; by tracing Beckett's developing attitude to abstraction and its relation to his long-standing preoccupation with the 'breakdown' of the subject-object relation and the ultimate failure of all expression; and by following his formal choices through manuscript drafts. The author goes on to analyse Beckett's attempt to adapt his new methods to the media of film and television, and to demonstrate how Beckett's late works for stage and screen develop alongside one another right up to his 1985 adaptation of the play *What Where* for television. Throughout the book, unpublished manuscript materials such as Beckett's letters, drafts, notes on philosophy, psychology and art, and his 'German diaries' augment a detailed account of the submerged sources that Beckett appropriated to the evolving needs of his abstract dramatic art. **Arabian Medicine and Its Influence on the Middle Ages Psychology Press** The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice. Over time, the Orphic theme has come to indicate the power of music to unsettle, subvert, and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits. The liberating effect of music has been a particularly important theme in twentieth-century African American literature. The nine original essays in *Black Orpheus* examines the Orphic theme in the fiction of such African American writers as Jean Toomer, Langston Hughes, Claude McKay, James Baldwin, Nathaniel Mackey, Sherley Anne Williams, Ann Petry, Ntozake Shange, Alice Walker, Gayl Jones, and Toni Morrison. The authors discussed in this volume depict music as a mystical, shamanistic, and spiritual power that can miraculously transform the realities of the soul and of the world. Here, the musician uses his or her music as a weapon to shield and protect his or her spirituality. Written by scholars of English, music, women's studies, American studies, cultural theory, and black and Africana studies, the essays in this interdisciplinary collection ultimately explore the thematic, linguistic structural presence of music in twentieth-century African American fiction. **Beautiful Joe An Autobiography Applewood Books** A dog describes being mistreated by a cruel master but then later being taken in by a kind family. **Catalogue The Worlds of Langston Hughes modernism and translation in the Americas Cornell University Press** The poet Langston Hughes was a tireless world traveler and a prolific translator, editor, and marketer. Translations of his own writings traveled even more widely than he did, earning him adulation throughout Europe, Asia, and especially the Americas. In *The Worlds of Langston Hughes*, Vera Kutzinski contends that, for writers who are part of the African diaspora, translation is more than just a literary practice: it is a fact of life and a way of thinking. Focusing on Hughes's autobiographies, translations of his poetry, his own translations, and the political lyrics that brought him to the attention of the infamous McCarthy Committee, she shows that translating and being translated—and often mistranslated—are as vital to Hughes's own poetics as they are to understanding the historical network of cultural relations known as literary modernism. As Kutzinski maps the trajectory of Hughes's writings across Europe and the Americas, we see the remarkable extent to which the translations of his poetry were in conversation with the work of other modernist writers. Kutzinski spotlights cities whose role as meeting places for modernists from all over the world has yet to be fully explored: Madrid, Havana, Buenos Aires, Mexico City, and of course Harlem. The result is a fresh look at Hughes, not as a solitary author who wrote in a single language, but as an international figure at the heart of a global intellectual and artistic formation. **The Case for Capitalism Palala Press** This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Many countries have deregulated their domestic airline industries and open skies continental blocs have formed in Europe and North America A movement is now underway to create a liberalized continental bloc in Australasia. International air transport has been substantially liberalized due to the diminishing role of IATA as an industry cartel, and via a series of liberalized bilateral agreements signed between many countries, including the U.S. and UK Increased liberalization and continentalization have induced major airlines to create global service networks through inter-carrier alliances. And all these changes are intensifying competition between major carriers in both domestic and international markets. The increased competition and economic

recession in the early 1990s led many airlines to massive financial losses, forcing them to undertake major restructuring to improve efficiency and reduce costs. Although it is important for an airline to map out proper strategies in the globalizing airline industry, the ultimate ability of a carrier to survive and prosper in increasingly competitive markets greatly depends on its productivity and cost competitiveness. **Guide to Reprints Author, title**
