## The Cambridge Companion to Modern French Culture

Cambridge University Press France entered the twentieth century as a powerful European and colonial nation. In the course of the century, her role changed dramatically: in the first fifty years two World Wars and economic decline removed its status as a world power, whilst the immediate post-war era was marked by wars of independence in its colonies. Yet at the same time, in the second half of the century, France entered a period of unprecedented growth and social transformation. Throughout the century and into the new millennium France retained its former international reputation as a centre for cultural excellence and innovation and its culture, together with that of the Francophone world, reflected the increased richness and diversity of the period. This Companion explores this vibrant culture, and includes chapters on history, language, literature, thought, theatre, architecture, visual culture, film and music, and discuss the contributions of popular culture, Francophone culture, minorities and women.

## Quotatives

### Cross-linguistic and Cross-disciplinary Perspectives

**John Benjamins Publishing Research on quotation has yielded a rich and diverse knowledge-base. Scientific interest has been sparked particularly by the recent emergence of new quotative forms in typologically related and unrelated languages (i.e. English be like, Hebrew kazé, Japanese mitai-na). The present collection gives a platform to research conducted within different linguistic sub-disciplines and on the basis of a variety of Western and non-Western languages. The introduction presents an overview of forms and functions of old and new quotative constructions. The nine chapters investigate quotation from different perspectives, from conversation analysis over grammaticalization and language variation and change to typological and formal approaches. The collection advocates a comprehensive approach to the phenomenon 'quotation', seeking a more nuanced knowledge-base as regards the linguistic properties, social uses and pragmatic functions than monolingual or single disciplinary approaches deliver. The cross-disciplinary nature and the wealth of data make the findings broadly available and relevant.**

### Reframing Translators, Translators as Reframers

**Taylor & Francis This collection explores the notion of reframing as a framework for better understanding the multi-agent and multi-level nature of the translation process, generating new conversations in current debates on translational agency, authority, and power. The volume puts forward reframing as an alternative metaphor to traditional conceptualizations and descriptions of translation, which often position the process in such terms as transformation, reproduction, transposition, and transfer. Chapters in the book reflect on the translator figure as a central agent in actively moving a translated text to a new context, and the translation process as shaped by different forces and subjectivities when translational agency comes into play. The book brings together cross-disciplinary perspectives for viewing translation through the lens of agents, drawing on a wide range of examples across geographic settings, historical eras, and language pairs. The volume integrates analyses from the translated texts themselves as well as their paratexts to offer unique insights into the different layers of mediation in translation and the new frame(s) created for those texts. This book will be of interest to scholars in translation studies, comparative studies, reception studies, and cultural studies.**

## Gothic Animals

### Uncanny Otherness and the Animal With-Out

**Springer Nature This book begins with the assumption that the presence of non-human creatures causes an always-already uncanny rift in human assumptions about reality. Exploring the dark side of animal nature and the 'otherness' of animals as viewed by humans, and employing cutting-edge theory on non-human animals, eco-criticism, literary and cultural theory, this book takes the Gothic genre into new territory. After the dissemination of Darwin's theories of evolution, nineteenth-century fiction quickly picked up on the idea of the 'animal within'. Here, the fear explored was of an unruly, defiant, degenerate and entirely amoral animality lying (mostly) dormant within all of us. However, non-humans and humans have other sorts of encounters, too, and even before Darwin, humans have often had an uneasy relationship with animals, which, as Donna Haraway puts it, have a way of 'looking back' at us. In this book, the focus is not on the 'animal within' but rather on the animal 'with-out': other and entirely incomprehensible.**

## Securitization and the Iraq War

### The rules of engagement in world politics

**Routledge** This book critiques the conceptualization of security found in mainstream and critical theoretical debates, and applies this to the empirical case of the 2003 Iraq War. The Iraq War represents one of the most puzzling, complex, and controversial events in the post-Cold War era. The manner in which the Bush administration finally decided to hold Saddam Hussein accountable through military intervention provoked a worldwide outcry due to the narratives they constructed to justify the "pre-emptive use of force" and "enhanced interrogation techniques." Responding to constructivist and post-structuralist scholars' calls for a turn to discourse, and aligning its argument with critical security studies, particularly the Copenhagen School (CS), this book conceptualizes language as a pivotal mechanism of power. Adopting a Wittgensteinian approach, it moves away from thinking about the nexus between security and language from a single action, or speech act, to a series of actions or interactions. To illustrate this new approach, the author examines two cases in particular: the UN inspectors' finding that there was no credible evidence that Iraq possessed weapons of mass destruction (WMD) in early 2003 and the Abu Ghraib scandal in 2004. Both events show that the boundaries and relations between securitized rules and environments are not pre-given but produced in a particular language game. This book will be of much interest to students of critical security studies, US foreign policy, and IR in general.

## Richard Wagner

### Self-Promotion and the Making of a Brand

**Cambridge University Press** All modern artists have had to market themselves in some way. Richard Wagner may just have done it better than anyone else. In a self-promotional effort that began around 1840 in Paris, and lasted for the remainder of his career, Wagner claimed convincingly that he was the most German composer ever and the true successor of Beethoven. More significantly, he was an opera composer who declared that he was not composing operas. Instead, during the 1850s, he mapped out a new direction, conceiving of works that would break with tradition and be literally 'brand new'. This is the first study to examine the innovative ways in which Wagner made himself a celebrity, promoting himself using every means available: autobiography, journal articles, short stories, newspaper announcements, letters, even his operas themselves. Vazsonyi reveals how Wagner created a niche for his works in the crowded opera market that continues to be unique.

## Creating Memory and Cultural Identity in African American Trauma Fiction

**BRILL** How do contemporary African American authors relate trauma, memory, and the recovery of the past with the processes of cultural and identity formation in African American communities?

## Refugees and the Myth of Human Rights

### Life Outside the Pale of the Law

**Routledge** Most Western liberal democracies are parties to the United Nations Refugees Convention and all are committed to the recognition of basic human rights, but they also spend billions fortifying their borders, detaining unauthorised immigrants, and policing migration. Meanwhile, public debate over the West's obligations to unauthorised immigrants is passionate, vitriolic, and divisive. *Refugees and the Myth of Human Rights* combines philosophical, historical, and legal analysis to clarify the key concepts at stake in the debate, and to demonstrate the threat posed by contemporary border regimes to rights protection and the rule of law within liberal democracies. Using the political philosophy of John Locke and Immanuel Kant the book highlights the tension in liberalism between partiality towards one's compatriots and the universalism of human rights and brings this tension to life through an examination of Hannah Arendt's account of the rise and decline of the modern nation-state. It provides a novel reading of Arendt's critique of human rights and her concept of the right to have rights. The book argues that the right to have rights must be secured globally in limited form, but that recognition of its significance should spur expansive changes to border policy within and between liberal states.

### Imperial Encore

## The Cultural Project of the Late British Empire

**University of California Press** In the 1930s, British colonial officials introduced drama performances, broadcasting services, and publication bureaus into Africa under the rubric of colonial development. They used theater, radio, and mass-produced books to spread British values and the English language across the continent. This project proved remarkably resilient: well after the end of Britain's imperial rule, many of its cultural institutions remained in place. Through the 1960s and 1970s, African audiences continued to attend Shakespeare performances and listen to the BBC, while African governments adopted English-language textbooks produced by metropolitan publishing houses. *Imperial Encore* traces British drama, broadcasting, and publishing in Africa between the 1930s and the 1980s—the half century spanning the end of British colonial rule and the outset of African national rule. Caroline Ritter shows how three major cultural institutions—the British Council, the BBC, and Oxford University Press—integrated their work with British imperial aims, and continued this project well after the end of formal British rule. Tracing these institutions and the media they produced through the tumultuous period of decolonization and its aftermath, Ritter offers the first account of the global footprint of British cultural imperialism.

## Transformative Ecological Economics

### Process Philosophy, Ideology and Utopia

**Taylor & Francis** When we look at the state of the world today, what is most evident is the fact that the major problems of our time - energy, environment, economy, climate change and social justice - cannot be understood in isolation. They are interconnected problems, which means that they require corresponding systemic solutions. Today's global economy has brought about critical distress for ecosystems and societies and we have to go to the very root of the problems to find a way out. This volume develops a synthesized interpretation of ecological economics integrating different levels: (economic) system, (business) practice and the (economic) actor. It discusses how changes on a systems level are connected to changes in practice and development of individual consciousness. *Transformative Ecological Economics* delves into the insight and knowledge from different sources of inspiration (thermodynamics, Darwinism, anthroposophy and Buddhism) as well as into an integrated story describing and illustrating the core ideas, principles and values that characterize a utopian society anchored in ecological economics. Implementation of the deep changes demanded depends on our ability to write a new story, a utopian one for sure, but one which is in accordance with and based on the reality in which we live. This book will be of interest to those who study ecological economics, political economy and environmental economics.

## The Panic of 1907

## Lessons Learned from the Market's Perfect Storm

John Wiley & Sons "Before reading *The Panic of 1907*, the year 1907 seemed like a long time ago and a different world. The authors, however, bring this story alive in a fast-moving book, and the reader sees how events of that time are very relevant for today's financial world. In spite of all of our advances, including a stronger monetary system and modern tools for managing risk, Bruner and Carr help us understand that we are not immune to a future crisis."

—Dwight B. Crane, Baker Foundation Professor, Harvard Business School "Bruner and Carr provide a thorough, masterly, and highly readable account of the 1907 crisis and its management by the great private banker J. P. Morgan. Congress heeded the lessons of 1907, launching the Federal Reserve System in 1913 to prevent banking panics and foster financial stability. We still have financial problems. But because of 1907 and Morgan, a century later we have a respected central bank as well as greater confidence in our money and our banks than our great-grandparents had in theirs." —Richard Sylla, Henry Kaufman Professor of the History of Financial Institutions and Markets, and Professor of Economics, Stern School of Business, New York University "A fascinating portrayal of the events and personalities of the crisis and panic of 1907. Lessons learned and parallels to the present have great relevance. Crises and panics are as much a part of our future as our past." —John Strangfeld, Vice Chairman, Prudential Financial "Who would have thought that a hundred years after the Panic of 1907 so much remained to be written about it? Bruner and Carr break significant new ground because they are willing to do the heavy lifting of combing through massive archival material to identify and weave together important facts. Their book will be of interest not only to banking theorists and financial historians, but also to business school and economics students, for its rare ability to teach so clearly why and how a panic unfolds." —Charles Calomiris, Henry Kaufman Professor of Financial Institutions, Columbia University, Graduate School of Business

## Endogenous Growth in Historical Perspective

## From Adam Smith to Paul Romer

**Springer Nature** In recent decades, new endogenous growth theory has become popular but the ideas are not new. They go back at least as far as Adam Smith, and the subsequent contributions made notably by Alfred Marshall and Allyn Young. This book critically discusses and provides an historical perspective to the entire spectrum of endogenous growth theories starting with Adam Smith and ending with Paul Romer. It fills an important gap in the literature. While contributions of individual authors are readily available, there is no comprehensive study on the subject covering such a vast ground, critically discussing these authors in a comprehensive framework. It collates all the arguments and economic viewpoints in one collection, providing both the seasoned economist and a graduate economist with a critical comparison of origin, mechanisms, conclusions, and policy implications of these models.

The author addresses questions of spectatorship and fetishism in the age of globalization and the racial and imperial politics of liberal feminism.

## Ireland's History

## Prehistory to the Present

**A&C Black** Ireland's History provides an introduction to Irish history that blends a scholarly approach to the subject, based on recent research and current historiographical perspectives, with a clear and accessible writing style. All the major themes in Irish history are covered, from prehistoric times right through to present day, from the emergence of Celtic Christianity after the fall of the Roman Empire, to Ireland and the European Union, secularism and rapprochement with the United Kingdom. By avoiding adopting a purely nationalistic perspective, Kenneth Campbell offers a balanced approach, covering not only social and economic history, but also political, cultural, and religious history, and exploring the interconnections among these various approaches. This text will encourage students to think critically about the past and to examine how a study of Irish history might inform and influence their understanding of history in general.

## Literatures of Liberalization

## Global Circulation and the Long Nineteenth Century

**Springer** This book traces the global circulation of cultures and ideologies from the technological and democratic revolutions of the long nineteenth century to liberal and neoliberal modernity. Focussing on moments of coerced (colonial and postcolonial) and voluntary contact rather than national boundaries, the author draws attention to the global scope of literatures and geopolitical commodities as actants in world affairs, as in processes of liberalization, democratization, and trade, but also to the distinctiveness of each local environment at its moments of transculturation. Based in extensive experience in collaborative, multilingual, interdisciplinary networks, the book synthesizes existing theoretical scholarship, provides original case studies of world-historical Victorian and modern writers, and articulates a new interdisciplinary methodology for literary studies in a global context. It will be of interest to Victorianists, modernists, comparatists, political theorists, translators, and scholars of world literatures, world ecology, and globalization.

### Written Maternal Authority and Eighteenth-Century Education in Britain

#### Educating by the Book

### Towards an Adventist Version of Communio Ecclesiology Remnant in Koinonia

Springer Nature This book explores how Seventh-day Adventists, like other Christians, can benefit from generating their own version of communio ecclesiology. It starts by offering a critical analysis of the status quo of the existing Adventist portrayal of church as remnant, and suggests potential ways of moving this tradition forward. To articulate a more rounded and comprehensive vision of the church's rich and multifaceted relational nature, this book draws on the mainstream Christian koinonia-based framework. Consequently, it provides possible solutions to some of the most divisive ecclesial issues that Christian communities face today regarding church structure, ministry, mission, communal interpretation, and reform. As it sets on a new footing the conversation between Adventism and other mainstream Christian traditions, the methodology of this book serves as a pathway for any Christian community to use when revisiting and enhancing its own current theologies of the church.

## Cultural Seeds: Essays on the Work of Nick Cave

Ashgate Publishing, Ltd. Nick Cave is now widely recognized as a songwriter, musician, novelist, screenwriter, curator, critic, actor and performer. From the band, The Boys Next Door (1976-1980), to the spoken-word recording, *The Secret Life of the Love Song* (1998), to the recently acclaimed screenplay of *The Proposition* (2005) and the *Grinderman* project (2008), Cave's career spans thirty years and has produced a comprehensive (and sometimes controversial) body of work that has shaped contemporary alternative culture. Despite intense media interest in Cave, there have been remarkably few comprehensive appraisals of his work, its significance and its impact on understandings of popular culture. In addressing this absence, the present volume is both timely and necessary. *Cultural Seeds* brings together an international range of scholars and practitioners, each of whom is uniquely placed to comment on an aspect of Cave's career. The essays collected here not only generate new ways of seeing and understanding Cave's contributions to contemporary culture, but set up a dialogue between fields all-too-often separated in the academy and in the media. Topics include Cave and the Presley myth; the aberrant masculinity projected by *The Birthday Party*; the postcolonial Australian-ness of his humour; his interventions in film and his erotics of the sacred. These essays offer compelling insights and provocative arguments about the fluidity of contemporary artistic practice.
