OECD Public Governance Reviews Brazil's Federal Court of Accounts Insight and Foresight for Better Governance Insight and Foresight for Better Governance OECD Publishing *This report suggests concrete steps Brazil's Federal Court of Accounts can take to adapt its own strategies, approaches and audit programming to provide valuable insight and foresight to policy makers in the centre of government.*

The Concept of Action Cambridge University Press *When people do things with words, how do we know what they are doing? Many scholars have assumed a category of things called actions: 'requests', 'proposals', 'complaints', 'excuses'. The idea is both convenient and intuitive, but as this book argues, it is a spurious concept of action. In interaction, a person's primary task is to decide how to respond, not to label what someone just did. The labeling of actions is a meta-level process, appropriate only when we wish to draw attention to others' behaviors in order to quiz, sanction, praise, blame, or otherwise hold them to account. This book develops a new account of action grounded in certain fundamental ideas about the nature of human sociality: that social conduct is naturally interpreted as purposeful; that human behavior is shaped under a tyranny of social accountability; and that language is our central resource for social action and reaction.*

Contemporary Cases in U.S. Foreign Policy From Terrorism to Trade CQ Press *Free Instructor's Manual available online at ccusfp.cqpress.com. Crafting foreign policy today is a pluralistic process—more actors are involved, partisan loyalties are stronger, and decisions made elsewhere impact the U.S. in significant ways. The president, members of Congress, interest groups, NGOs, the media, and bureaucratic actors all compete to influence the way U.S. foreign policy is shaped and implemented. Editor Ralph Carter captures this interplay with 15 recent real-world cases—five brand new to this third edition. Whether grappling with the controversy stemming from immigration reform, dealing with Iran's nuclear weapons program, exploring the impact of the WTO and export tax subsidies, or determining the rights of detainees in the war on terrorism, students are encouraged to question motives, consider alternatives, and analyze outcomes. Each case is consistently structured with a list of "before-you-begin" questions that frame the issues, introductory and background sections, a timeline of important events, and a descriptive list of key actors.*

Ir World Public Sector Report 2019 Sustainable Development Goal 16: Focus on Public Institutions United Nations *This report looks at national-level developments in relation to several concepts highlighted in the targets of Goal 16, which are viewed as institutional principles: access to information, transparency, accountability, anti-corruption, inclusiveness of decision-making processes, and non-discrimination. The report surveys global trends in these areas, documenting both the availability of information on those trends and the status of knowledge about the effectiveness of related policies and institutional arrangements in different national contexts.*

Anger Management for Substance Abuse and Mental Health Clients Participant Workbook Embodied Activities in Face-to-face and Mediated Settings Social Encounters in Time and Space Springer *This edited book revisits the concept of social 'activities' from an interactional perspective, examining how verbal, vocal, visual-spatial and material resources are deployed by participants for meaning-making in social encounters. The eleven original chapters within this volume analyse activities based on video recordings of naturalistic and naturally occurring social encounters from face-to-face and mediated settings in Chinese, Dutch, English, French, and German. Informed primarily by the methodological approaches of Conversation Analysis and Interactional Linguistics, the authors study embodiment in space and time in three distinct types of situations: objects in space, complex participation frameworks, and affiliation and alignment. Moreover, the book includes a theoretical and methodological discussion of how activities are constituted and visibly embodied in interaction. It will be of interest to students and scholars in sociology and linguistics in general, and face-to-face and mediated interaction in particular.*

The Complete Married With

Children Book: TV's Dysfunctional Family Phenomenon BearManor Media *Married . . . with Children* premiered on Fox TV in 1987 and updated the Don Ameche and Frances Langford radio comedy series, *The Bickersons*, and Jackie Gleason's TV classic, *The Honeymooners*, with a raunchy, cutting-edge slant that focused on a lovable yet laughable family headed by endearingly flawed Al (Ed O'Neill), his housework-hating wife, sexy daughter, and randy son. For 11 seasons, the brilliant team of talent put the funk in dysfunctional. Rediscover the exhilarating humor and intellectual excitement in Denise Noe's first book. She delves behind-the-scenes with Michael Moye, Ron Leavitt, Ed O'Neill, Katey Sagal, Christina Applegate, David Faustino, David Garrison, Amanda Bearse, E. E. Bell, and Ritch Shynder. You'll be fascinated by the story of how two rogue writers created a deliberately off-the-wall program; how it almost got derailed before production began; how a controversy could have plucked the series off the air but ended up injecting a much needed shot in the arm; how a reality-based show occasionally—and courageously—ventured into comedy with a fantasy, horror, and/or science fiction spin. Inclusion as Social Justice Theory and Practice in African Higher Education African Higher Education: Deve "Inclusion as Social Justice: Theory and Practice in African Higher Education discusses the extent to which education enables equitable social access for diverse student populations in the context of historical sidelining of indigenous knowledge systems and epistemic injustice of colonial epistemologies in Africa. The goal of the book is to theoretically unpack the social differentials and micro-inequities that practically disempower diverse students in African higher education. To this end, the book features aspects of diversity such as gender, rurality, refugee status and disability in general, with hearing and visual impairment as prime illustrations. It is argued that despite the ethically defensible and socially just policy and structural interventions for transforming higher education meant to redress the legacy of colonial injustices, urban universities present epistemological equity challenges for students from rural communities. Similarly, the opaque fate of students displaced from their home countries and currently studying in universities in host countries is analyzed. The book illustrates the access case for gender and disability in higher education using empirical studies and examples from Tanzania, Kenya, Ethiopia, Zimbabwe and South Africa. Challenges facing students in higher education in these countries and the strategies the students devise to succeed in the institutions are analyzed"--

Everyday Leadership Attitudes and Actions for Respect and Success Free Spirit Publishing Written and experiential activities help teens discover their own leadership potential and develop skills that guide them to act responsibly and make a difference in the world around them. Teens gain a greater understanding of who they are, what matters to them, how that translates into leadership, and how leadership relates to everyday life. Written activities encourage reflection; "do something" activities call for commitment and action. Both enable teens to reach new levels of leadership. Created for use with *Building Everyday Leadership in All Teens*, this consumable guide also functions as a stand-alone resource for personal growth.

Detroit Past, Present and Future This book is about a wonderful city where I grew up and had come to love dearly. Much within the early chapters deals with everyday life in times long gone by. Old timers may find the little details will rekindle old memories and recall the ways thing had been in those early years. Life was much simpler then and the family was so central in our lives. Detroit was vibrant in so many ways. We cherished our distinctive neighborhoods, the excitement of city life and the many cultural activities available. Hopefully the many added photographs might help the readers transport themselves into this interesting story of life in Detroit from the Great Depression of the 1930s to the present. So much has changed in Detroit over the years. No doubt many will be saddened as the narrative switches to the decline of that once great city resulting from poor political leadership, the decline in industry, a terrifying increase in crime, an exodus of the middle class and the abandonment of neighborhoods. The mood changes in the closing chapter with the hope that the many noble efforts now being expended can meet the challenges and reverse the trend. Hopefully Detroit will overcome despair and strive to once again becoming a great city worth emulating.

Dealing with Elusive Futures University Graduates in Urban Africa transcript Verlag The time to come - as well as the exploration thereof - remains elusive for social actors and social scientists alike. The contributors accept the challenge to depict young men and women's future-creating activities in urban contexts of sub-Saharan Africa. Very consciously, they study young graduates having obtained a university degree and provide a vivid picture of their strategies to socially grow older by doing adulthood in contexts of great uncertainty. The examples include Burkina Faso, Guinea, Ethiopia, Mali and Tanzania, visually enriched through pictures taken by young Malian photographers.

The Science of Effective Mentorship in STEMM National Academies Press Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEMM and subsequently improving the training environment in which that STEMM potential is fostered. Mentoring relationships provide developmental spaces in

which students' STEM skills are honed and pathways into STEM fields can be discovered. Because mentorship can be so influential in shaping the future STEM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. *The Science of Effective Mentorship in STEM* studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members. **Texas Politics 2014-2015 Cengage Learning** TEXAS POLITICS: IDEAL AND REALITY critically compares Texas government and politics to the concepts of democratic theory by raising three main themes: democratic ideals, conservatism, and conflict. Lively presentation of material encourages students to consider controversial issues and debates. In the 2015-2016 Edition, new policy coverage, updates reflecting the Texas legislative session that ended in June 2014, and new "Texas Politics and You" features that ask students to become directly involved in current and contentious issues, often through social media, keep this book cutting edge. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Discourse and Technology Multimodal Discourse Analysis Georgetown University Press** The overarching theme of *Discourse and Technology* is cutting-edge in the field of linguistics: multimodal discourse. This volume opens up a discussion among discourse analysts and others in linguistics and related fields about the two-fold impact of new communication technologies: The impact on how discourse data is collected, transcribed, and analyzed—and the impact that these technologies are having on social interaction and discourse. As inexpensive tape recorders allowed the field to move beyond text, written or printed language, to capture talk—discourse as spoken language—the information explosion (including cell phones, video recorders, Internet chat rooms, online journals, and the like) has moved those in the field to recognize that all discourse is, in various ways, "multimodal," constructed through speech and gesture, as well as through typography, layout, and the materials employed in the making of texts. The contributors have responded to the expanding scope of discourse analysis by asking five key questions: Why should we study discourse and technology and multimodal discourse analysis? What is the role of the World Wide Web in discourse analysis? How does one analyze multimodal discourse in studies of social actions and interactions? How does one analyze multimodal discourse in educational social interactions? and, How does one use multimodal discourse analyses in the workplace? The vitality of these explorations opens windows onto even newer horizons of discourse and discourse analysis. **OECD Public Governance Reviews Mexico's National Auditing System Strengthening Accountable Governance Strengthening Accountable Governance OECD Publishing** This report presents the findings and recommendations of the OECD review of Mexico's national auditing system, with a focus on the Auditoría Superior de la Federación, the supreme audit institution. **Building Construction Handbook Routledge** Ideal for students on all construction courses Topics presented concisely in plain language and with clear drawings Updated to include revisions to Building and Construction regulations The *Building Construction Handbook* is THE authoritative reference for all construction students and professionals. Its detailed drawings clearly illustrate the construction of building elements, and have been an invaluable guide for builders since 1988. The principles and processes of construction are explained with the concepts of design included where appropriate. Extensive coverage of building construction practice, techniques, and regulations representing both traditional procedures and modern developments are included to provide the most comprehensive and easy to understand guide to building construction. This new edition has been updated to reflect recent changes to the building regulations, as well as new material on the latest technologies used in domestic construction. *Building Construction Handbook* is the essential, easy-to-use resource for undergraduate and vocational students on a wide range of courses including NVQ and BTEC National, through to Higher National Certificate and Diploma, to Foundation and three-year Degree level. It is also a useful practical reference for building designers, contractors and others engaged in the construction industry. **Dale Fiers Twentieth Century Disciple TCU Press** Many call A. Dale Fiers the most significant figure in the Christian Church (Disciples of Christ) of the twentieth century. Raised in a devout family--his mother was ordained--in Kankakee, Illinois, and West Palm Beach, Florida, Fiers went on to have major impact not only on his denomination but on American Protestantism in general, particularly its approach to such social issues as missionary work and civil rights. Fiers served as executive secretary of the International Convention of the Christian Church (Disciples of Christ), president of the United Christian Missionary Society, administrative secretary of the Commission on Restructure, and was the first general minister and president of the church. Restructure was the process by which thousands of scattered Disciples congregations became an expression of one Church. This 1960s development towers over the landscape of Disciples history like a great mountain range, and Fiers looms over the era as its central figure. In this biography, commissioned by the Disciples of Christ Historical Society, D. Duane Cummins crafts a picture of a remarkable church leader and chronicles the way a significant religious body dealt with the ambivalences of its own existence, how missionary work developed into less paternalistic relationships, how a church struggled between attempts to minister on the local scene and throughout the world. Fiers lived in Florida and remained active in Disciples affairs until his death at age ninety-six in 2003. **Beyond Access Indigenizing Programs for Native American Student Success Stylus Publishing, LLC** This book argues that two principal factors are inhibiting Native students from transitioning from school to college and from succeeding in their post-secondary studies. It presents models and examples of pathways to success that align with Native American students' aspirations and cultural values. Many attend schools that are poorly resourced where they are often discouraged from aspiring to college. Many are alienated from the educational system by a lack of culturally appropriate and meaningful environment or support systems that reflect Indigenous values of community, sharing, honoring extended family, giving-back to one's community, and respect for creation. The contributors to this book highlight Indigenized college access programs, meaning programs developed by, not just for, the Indigenous community, and are adapted, or developed, for the unique Indigenous populations they serve. Individual chapters cover a K-12 program to develop a Native college-going culture through community engagement; a "crash course" offered by a higher education institution to compensate for the lack of college counseling and academic advising at students' schools; the role of tribal colleges and universities; the recruitment and retention of Native American students in STEM and nursing programs; financial aid; educational leadership programs to prepare Native principals, superintendents, and other school leaders; and,

finally, data regarding Native American college students with disabilities. The chapters are interspersed with narratives from current Indigenous graduate students. This is an invaluable resource for student affairs practitioners and higher education administrators wanting to understand and serve their Indigenous students. **IR Cengage Learning** Conversational, affordable, and designed for today's students, IR explores the challenges of international politics and the evolving search for international, economic, and human security in a complicated and connected world. 4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Contemporary Cases in U.S. Foreign Policy From Terrorism to Trade CQ Press** Many actors—from the president and members of Congress to interest groups, NGOs, and the media—compete to shape U.S. foreign policy. *Contemporary Cases in U.S. Foreign Policy: From Terrorism to Trade, Fifth Edition*, edited by Ralph G. Carter, captures this strategic interplay using 15 real-world cases, of which four are brand new: the death of Osama bin Laden and the use of targeted assassinations, nonproliferation policy and the U.S.–India nuclear agreement, the U.S. reaction to Egypt's collision with the Arab Spring, and the surprise asylum request of blind Chinese dissident Chen Guangcheng. Fully updated to cover the Obama administration, all cases have been revised to reflect recent developments. Whether grappling with use-of-force questions, the international financial crisis, legal and human rights, trade issues, multilateral approaches to the nuclear programs of North Korea and Iran, or climate change, Carter's engaging case study approach encourages students to question motives, consider alternatives, and analyze outcomes. **Moving Serafina A Novel Texas Christian University Press** Late in life, Clayton Elliott faces long-deferred, hard choices. Circumstances force him to bury his recently deceased wife, Adelita, in the little West Texas border town of Solitario instead of next to their three-year-old daughter on their hardpan ranch. To pay for Adelita's cancer treatments, Clayton sold this marginal ranchland to water developers. By reuniting Serafina with her mother in Solitario, Clayton hopes to assuage his guilt about her death twenty-five years earlier. However, whether Clayton moves Serafina immediately or ignores the contracted deadline, either act will trigger drilling into the aquifer for water. His lifelong friends are vehemently opposed to drilling. When a young Mexican woman mysteriously enters his life, Clayton must delay his efforts to move Serafina and surreptitiously help this woman who has illegally crossed into Texas. This decision also raises the ire of Clayton's friends. Throughout the novel, Clayton struggles with both the internal and external borders of his life. And the eccentric characters of Solitario find they, too, must confront their own geographical, psychological, and racial boundaries. **Price Theory and Applications Cengage Learning** Written in the same humorous, reader-friendly style as Professor Landsburg's widely popular trade book, *The Armchair Economist*, the lively ninth edition of *PRICE THEORY AND APPLICATIONS* adopts an inductive, hands-on approach that enables students to learn economics by doing. And it requires no knowledge or use of calculus. Using a student-friendly, easy-to-understand format, the book thoroughly develops the standard concepts of intermediate price theory as well as timely, untraditional issues not found in many texts; such as the economics of information. Social welfare is also highlighted as a unifying concept throughout. The book's rigorous, meticulous development of economic theory is supported by countless intriguing and entertaining exhibits, examples, numerical exercises, and problem sets integrated within the text and included at the end of chapters, giving students countless opportunities to test their comprehension of chapter concepts. With its highly interactive approach, the new Price Theory gives students a solid understanding of economic theory as well as the skills to apply it to the world around them. Functions of and interactions between components and subassemblies of transmissions are introduced, providing a basis for designing transmission systems and for determining their potentials and properties in vehicle-specific applications: passenger cars, trucks, buses, tractors and motorcycles. With these fundamentals the presentation provides universal resources for both state-of-the-art and future transmission technologies, including systems for electric and hybrid electric vehicles. **The Devil's Tiger TCU Press** When tigers begin attacking people in Texas, only Arina Yeroskin, a veterinarian who was in on the experimental program that infected animals with a virulent form of rickettsia, "and the reader--knows why the post-communist Russian government wants their prize animals dead, not alive."--Jacket. **Contingency Management in Substance Abuse Treatment Guilford Press** Timely and authoritative, this volume brings together leading clinical researchers to describe contemporary applications of contingency management principles across a wide range of substance use disorders and patient populations. Contingency management uses a system of incentives and disincentives to motivate patients to meet their treatment goals, and has been implemented successfully in community treatment clinics, drug courts, and other settings. Featuring illustrative case material, the book presents a cogent empirical rationale and practical strategies for targeting major drugs of abuse and working with specific populations, including adolescents, pregnant women, and dually diagnosed and homeless individuals. Also addressed are the nuts and bolts of developing and funding contingency management programs.

Global Marketing and Advertising Understanding Cultural Paradoxes SAGE Publications Limited Packed with cultural, company, and country examples, this book offers a mix of theory and practical applications covering globalization, global branding strategies, classification models of culture, and the consequences of culture for all aspects of marketing communications. The author helps define cross cultural segments to better target consumers across cultures and features content on how culture affects strategic issues, such as the company's mission statement, brand positioning strategy, and marketing communications strategy. It also demonstrates the centrality of value paradoxes to cross cultural marketing communications, and uses the Hofstede model to help readers see how their understanding of cultural relationships in one country/region can be extended to other countries/regions. Updates to the new edition include: Information and findings from recent studies, as well as new topics, including global public relations, culture and the media, and culture and the Internet. Global examples, with new cases from countries in Asia and Africa Includes broader background theory on usage differences of new digital media, along with more extensive coverage of consumer behavior. A range of online instructor resources complement the book, including chapter-specific PowerPoint slides, downloadable advertising images from the book, chapter-specific questions and key points, and video examples of advertising from around the world. Suitable reading for students of International Marketing, Global Advertising or practitioners in global marketing departments.

Beyond the Asterisk Understanding Native Students in Higher Education Stylus Publishing, LLC A Choice Outstanding Academic Title for 2013 While the success of higher education and student affairs is predicated on understanding the students we serve, the reality is, where the Native American population is concerned, that this knowledge is generally lacking. This lack may be attributed to this population's invisibility within the academy – it is often excluded from institutional data and reporting, and frequently noted as not statistically significant – and its relegation to what is referred to as the “American Indian research asterisk.” The purpose of this book is to move beyond the asterisk in an effort to better understand Native students, challenge the status quo, and provide an informed base for leaders in student and academic affairs, and administrators concerned with the success of students on their campuses. The authors of this book share their understanding of Native epistemologies, culture, and social structures, offering student affairs professionals and institutions a richer array of options, resources, and culturally-relevant and inclusive models to better serve this population. The book begins by providing insights into Native student experiences, presenting the first-year experience from a Native perspective, illustrating the role of a Native living/learning community in student retention, and discussing the importance of incorporating culture into student programming for Native students as well as the role of Native fraternities and sororities. The authors then consider administrative issues, such as the importance of outreach to tribal nations, the role of Tribal Colleges and Universities and opportunities for collaborations, and the development of Native American Student Services Units. . The book concludes with recommendations for how institutions can better serve Native students in graduate programs, the role that Indigenous faculty play in student success, and how professional associations can assist student affairs professionals with fulfilling their role of supporting the success of Native American students, staff, and faculty. This book moves beyond the asterisk to provide important insights from Native American higher education leaders and non-Native practitioners who have made Native students a priority in their work. While predominantly addressed to the student affairs profession – providing an understanding of the needs of the Native students it serves, describing the multi-faceted and unique issues, characteristics and experiences of this population, and sharing proven approaches to developing appropriate services – it also covers issues of broader administrative concern, such as collaboration with tribal colleges; as well academic issues, such as graduate and professional education. The book covers new material, as well as expanding on topics previously addressed in the literature, including Native American Greek organizations, incorporating Native culture into student programming, and the role of Native American Special Advisors. The contributors are themselves products of colleges and universities where Native students are too often invisible, and who succeeded despite the odds. Their insights and the examples they provide add richness to this book. It will provide a catalyst for new higher education practices that lead to direct, and increased support for, Native Americans and others who are working to remove the Native American asterisk from research and practice.

Strategies and Tools for a Sustainable Rural Rio de Janeiro Springer This book is a compilation of recent developments in land, ecosystem, and water management in the Brazilian state of Rio de Janeiro. The state is located in the biodiversity hotspot of the Atlantic Forest (Mata Atlântica), a biome characterized by high biological diversity and endemism. At the same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America. This development process has been accompanied by population growth, industrialization, urbanization, as well as consumption and degradation of land and water resources. In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources, nature conservation, and economic development. An overview is provided of the different strategies and tools that have been developed in the fields of agriculture, ecosystem management and biodiversity, integrated water management, land restoration, disaster risk reduction and climate change adaptation, as well as environmental governance and economic instruments. This book covers a wide spectrum from applied research to science-policy interfaces, planning concepts, and technical tools and has a model character for other rural areas in Latin America. Target groups are scientists, practitioners, policy makers and graduate students in the field of environmental management. The different chapters are written by researchers and practitioners of the German-Brazilian project INTECRAL (Integrated Eco Technologies and Services for a Sustainable Rural Rio de Janeiro), the rural development program Rio Rural under the state secretary for agriculture and animal husbandry, as well as invited scientists from

Brazilian universities and research institutes. It bridges existing gaps between science, policies, and practice in rural development. **Grammar and Interaction Pivots in German Conversation** John Benjamins Publishing This monograph provides a micro-analytic description of the structure and communicative use of syntactic pivot constructions in German. Using the methodology of Conversation Analysis, this work shows that pivots emerge in interaction in response to local communicative needs. Exclusively found in spoken German, pivots allow a speaker to extend an utterance beyond a possible completion point in a syntactically and prosodically unobtrusive way. Speakers utilize this basic property to promote context-specific actions: managing boundaries of speakership, bridging sequential and topical junctures, and dealing with different types of interactional trouble. Through a close examination of syntactic pivots as an interactional resource, this work shows that spoken linguistic structures can only be fully understood if we acknowledge the temporality of language and view grammar as usage-based and negotiable. This book thus contributes to a growing body of research at the intersection of grammar and interaction.
