THE SOCIO-ECONOMIC APPROACH TO MANAGEMENT REVISITED

THE EVOLVING NATURE OF SEAM IN THE 21ST CENTURY

IAP *This volume is part of the ongoing collaboration between the RMC series and the Socio-Economic Institute for Firms and Organizations (ISEOR), a French intervention-research think tank co-directed by Henri Savall and Véronique Zardet. Building on an earlier collaboration on the ISEOR approach – Socio-Economic Intervention in Organizations: The Intervener-Researcher and the SEAM Approach to Organizational Analysis (IAP, 2007) – Buono and Savall bring together over 30 talented intervener-researchers to explore and examine the ongoing evolution of the Socio-Economic Approach to Management (SEAM). This volume revisits the application of SEAM in the context of intervention challenges in the wake of the recent economic crisis and the disruptive change that has taken hold across the world. The basic foundation of SEAM – built on the idea of strategic patience, the need to undertake holistic intervention in organizations, and the challenge to get organizational members to listen to themselves (through what they refer to as the mirror effect) – has remained the same. In response to economic and organizational pressures in the current environment, however, there has been a concomitant emphasis on helping client organizations achieve short-term results while still maintaining focus on the long term. Many ideas that have become part of the current discourse within ISEOR today were not as explicitly addressed in the initial volume – from the destructive effect of the Taylorism-Fayolism-Weberism (TFW) virus, to the need to focus on ways to ensure the sustainability of a SEAM intervention, the growing importance of collaborative interactions between external and internal consultants, and the growing importance of cocreating knowledge with client firms and organizations.*

ELECTRIC UTILITY RESOURCE PLANNING

ECONOMICS, RELIABILITY, AND DECISION-MAKING

CRC Press *Most people—including many legislators, regulators, and other decision makers in the electric utility industry—have misconceptions about how electric utilities really "work" and plan for the future. This lack of understanding can lead to poorly informed decisions and policies that directly affect the choices utilities must make. Using easy-to-understand text and examples, Electric Utility Resource Planning: Economics, Reliability, and Decision-Making clarifies how utilities operate their systems and prepare for the future. This explanation will show readers that both expected and counterintuitive results can occur (i.e., conservation might result in higher air emissions, or lowering costs could lead to higher electric rates). Taking readers step by step through this process, the book (in the following order): "Creates" a hypothetical utility Explains how and why a utility operates its system of generating units Discusses the planning methods that a utility would (or should) use Guides readers through each stage of a planning analysis for the hypothetical utility, examining various resource options (conservation, new power plants, and solar) In addition, the author introduces four Fundamental Principles of Resource Planning that should guide utilities. He also offers opinions on how certain trends in utility regulation and legislation can hinder utility planners' efforts to identify and select the best resources for the utility's customers. With this book, author Dr. Steven Sim applies his experience and insights from more than two decades of resource planning for Florida Power and Light (FPL). As one of the largest utilities in the United States, FPL has faced a multitude of resource planning challenges, and Dr. Sim has performed and supervised thousands of analyses designed to meet these obstacles. He has also served as an FPL witness in regulatory hearings on a wide variety of topics, ranging from the economic implications of nuclear, conservation, coal, gas, and other resource options, to the non-economic impacts (air emissions, fuel usage, system reliability, etc.) they present.*

GLOBAL ISSUES AND INNOVATIVE SOLUTIONS IN HEALTHCARE, CULTURE, AND THE ENVIRONMENT

IGI Global Despite the development of environmental initiatives, healthcare, and cultural assimilation in today's global market, significant problems in these areas remain throughout various regions of the world. As countries continue to transition into the modern age, areas across Asia and Africa have begun implementing modern solutions in order to benefit their individual societies and keep pace with the surrounding world. Significant research is needed in order to understand current issues that persist across the globe and what is being done to solve them. *Global Issues and Innovative Solutions in Healthcare, Culture, and the Environment* is an essential reference source that discusses worldwide conflicts within healthcare and environmental development as well as modern resolutions that are being implemented. Featuring research on topics such as health insurance reform, sanitation development, and cultural freedom, this book is ideally designed for researchers, policymakers, physicians, government officials, sociologists, environmentalists, anthropologists, academicians, practitioners, and students seeking coverage on global societal challenges in the modern age.

THE ECONOMICS OF AMERICAN AGRICULTURE

M.E. Sharpe This book answers the questions: what is happening to American agriculture, and why? Steven C. Blank uses portfolio theory to analyze both macro- and microeconomic data that paints a clear picture of the trends in agriculture, and explains why these trends are consistent with market evolution and global economic development. He clarifies agriculture's specific role in economic development with a focus on the current and future globalizing commodity markets. The book features empirical research that demonstrates the link between farm-level investment decisions and regional and national economic trends. It shows how the dynamic environment of industrialization and globalization of agriculture is part of a continuing development that is driven by technological innovation. This all points to a future with a very different agricultural production sector and some extremely important policy choices that will face the entire country.

STATISTICS FOR MANAGEMENT AND ECONOMICS + XLSTAT BIND-IN

Cengage Learning Discover how statistical methods and tools are vital for today's managers as you learn how to apply these tools to real business problems. *STATISTICS FOR MANAGEMENT AND ECONOMICS, 11E* emphasizes applications over calculation using a proven three-step ICI approach to problem solving. Readers learn how to IDENTIFY the correct statistical technique by focusing on the problem objective and data type; how to COMPUTE the statistics by hand or using Excel or XLSTAT; and how to INTERPRET results in the context of the problem. Extensive data-driven examples, exercises, and cases address the functional areas of business and demonstrate how marketing managers, financial analysts, accountants, and economists rely on statistical applications. Engaging cases focus on climate change and the relationship between payroll and wins in professional sports, while dozens of exercises feature the returns on 40 stocks, which are used to develop the market model and portfolio diversification. HISTORY OF THE ... ECONOMIC CENSUSES

THE SOCIAL CONSTRUCTION OF MANAGEMENT

Routledge What is management and how do the people who become managers take on a managerial identity? How does text inform the manager's identity? From cultural studies we understand that the relationship between text and reader is not passive but that each one works upon the other, and that text is active in forming the identity of the reader. This book is the first to analyse how many management textbooks construct their readers. It analyses management textbooks published since the 1950s and shows they construct a world in which chaos is kept at bay only by strong management, and in which strong management is based upon the rationality of modernity. This book exposes and analyses such claims-to-truths, and theorizes their arguments using the work of Butler and Foucault, the sociology of scientific knowledge, critical legal studies, art history and queer theory. By revealing a postmodern turn in management textbooks, *The Social Construction of Management* is both a critical and empirical study that explores the constitution of managerial identities in the age of mass education in management. An exciting contribution to the growing body of knowledge within critical management studies, this book challenges the way we think about organizations and their management, and about management education as a whole. This is thought provoking reading for anyone studying management, or working in the managerial organization.

THE LAW AND ECONOMICS OF ENFORCING EUROPEAN CONSUMER LAW

A COMPARATIVE ANALYSIS OF PACKAGE TRAVEL AND MISLEADING ADVERTISING

Ashgate Publishing, Ltd. This book offers a comparative law and economics analysis of the changing landscape of EU consumer law enforcement policy now that EU member states are moving away from purely public or private law enforcement towards a more mixed approach. The book reflects on the need for efficient enforcement designs and examines the economic factors according to which the efficiency of different enforcement mechanisms can be assessed. A variety of hypothetical case scenarios are considered to illustrate various consumer law problems and the findings are used to assess real life situations in countries with different enforcement traditions.

OPTIMAL CONTROL PROBLEMS ARISING IN FOREST MANAGEMENT

Springer This book is devoted to the study of optimal control problems arising in forest management, an important and fascinating topic in mathematical economics studied by many researchers over the years. The volume studies the forest management problem by analyzing a class of optimal control problems that contains it and showing the existence of optimal solutions over infinite horizon. It also studies the structure of approximate solutions on finite intervals and their turnpike properties, as well as the stability of the turnpike phenomenon and the structure of approximate solutions on finite intervals in the regions close to the end points. The book is intended for mathematicians interested in the optimization theory, optimal control and their applications to the economic theory.

PRACTICAL SOLUTIONS FOR HEALTHCARE MANAGEMENT AND POLICY (COLLECTION)

FT Press A brand new collection of state-of-the-art insights into transforming healthcare, from world-renowned experts and practitioners... now in a convenient e-format, at a great price! Making American healthcare work: 3 new eBooks get past ideology to deliver real solutions! Even after Obamacare, America's healthcare system is unsustainable and headed towards disaster. These three eBooks offer real solutions, not sterile ideology. In *Overhauling America's Healthcare Machine: Stop the Bleeding and Save Trillions*, leading healthcare expert and entrepreneur Douglas A. Perednia identifies the breathtaking complexity and specific inefficiencies that are driving the healthcare system towards collapse, and presents a new solution that protects patient and physician freedom, covers everyone, and won't bankrupt America. Perednia shows how to design a far simpler system: one that delivers care to everyone by drawing on the best of both market efficiency and public "universality" — and is backed with detailed logic and objective calculations. Next, in *Improving Healthcare Quality and Cost with Six Sigma*, four leading experts introduce Six Sigma from the standpoint of the healthcare professional, showing exactly how to implement it successfully in real-world environments. The first 100% hands-on, start-to-finish blueprint for succeeding with Six Sigma in healthcare, this book covers every facet of Six Sigma in healthcare, demonstrating its use through examples and case studies from every area of the hospital: clinical, radiology, surgery, ICU, cardiovascular, laboratories, emergency, trauma, administrative services, staffing, billing, cafeteria, even central supply. Finally, in *Reengineering Healthcare: A Manifesto for Radically Rethinking Healthcare Delivery* Jim Champy ("Reengineering the Corporation") and Dr. Harry Greenspun show how reengineering methodologies can deliver breakthrough performance and efficiency improvements both within individual healthcare organizations and throughout the entire system, eliminating much of the 40%+ of U.S. healthcare costs now dedicated to administration. They demonstrate how reengineering can refocus investments on aligning quality and providing accessible care for millions more people. From world-renowned healthcare management experts Dr. Doug Perednia, Praveen Gupta, Brett E. Trusko, Carolyn Pexton, H. James Harrington, Jim Champy, and Harry Greenspun, M.D.

MATHEMATICAL METHODS AND MODELS IN ECONOMIC PLANNING, MANAGEMENT AND BUDGETING

Springer This book describes a system of mathematical models and methods that can be used to analyze real economic and managerial decisions and to improve their effectiveness. Application areas include: management of development and operation budgets, assessment and management of economic systems using an energy entropy approach, equation of exchange rates and forecasting foreign exchange operations, evaluation of innovative projects, monitoring of governmental programs, risk management of investment processes, decisions on the allocation of resources, and identification of competitive industrial clusters. The proposed methods and models were tested on the example of Kazakhstan's economy, but the generated solutions will be useful for applications at other levels and in other countries. Regarding your book "Mathematical Methods and Models in Economics", I am impressed because now it is time when "econometrics" is becoming more appreciated by economists and by schools that are the hosts or employers of modern economists. ... Your presented results really impressed me. John F. Nash, Jr., Princeton University, Nobel Memorial Prize in Economic Sciences
The book is within my scope of interest because of its novelty and practicality. First, there is a need for realistic modeling of complex systems, both natural and artificial that conclude computer and economic systems. There has been an ongoing effort in developing models dealing with complexity and incomplete knowledge. Consequently, it is clear to recognize the contribution of Mutanov to encapsulate economic modeling with emphasis on budgeting and innovation. Secondly, the method proposed by Mutanov has been verified by applying to the case of the Republic of Kazakhstan, with her vibrant emerging economy. Thirdly, Chapter 5 of the book is of particular interest for the computer technology community because it deals with innovation. In summary, the book of Mutanov should become one of the outstanding recognized pragmatic guides for dealing with innovative systems. Andrzej Rucinski, University of New Hampshire This book is unique in its theoretical findings and practical applicability. The book is an illuminating study based on an applied mathematical model which uses methods such as linear programming and input-output analysis. Moreover, this work demonstrates the author's great insight and academic brilliance in the fields of finance, technological innovations and marketing vis-à-vis the market economy. From both theoretical and practical standpoint, this work is indeed a great achievement. Yeon Cheon Oh, President of Seoul National University

MODELS AND METHODS IN ECONOMICS AND MANAGEMENT SCIENCE

ESSAYS IN HONOR OF CHARLES S. TAPIERO

Springer Science & Business Media With this book, distinguished and notable contributors wish to honor Professor Charles S. Tapiero's scientific achievements. Although it covers only a few of the directions Professor Tapiero has taken in his work, it presents important modern developments in theory and in diverse applications, as studied by his colleagues and followers, further advancing the topics Tapiero has been investigating. The book is divided into three parts featuring original contributions covering the following areas: general modeling and analysis; applications to marketing, economy and finance; and applications to operations and manufacturing. Professor Tapiero is among the most active researchers in control theory; in the late sixties, he started to enthusiastically promote optimal control theory along with differential games, successfully applying it to diverse problems ranging from classical operations research models to finance, risk and insurance, marketing, transportation and operations management, conflict management and game theory, engineering, regional and urban sciences, environmental economics, and organizational behavior. Over the years, Professor Tapiero has produced over 300 papers and communications and 14 books, which have had a major impact on modern theoretical and applied research. Notable among his numerous pioneering scientific contributions are the use of graph theory in the behavioral sciences, the modeling of advertising as a random walk, the resolution of stochastic zero-sum differential games, the modeling of quality control as a stochastic competitive game, and the development of impulsive control methods in management. Charles Tapiero's creativity applies both in formulating original issues, modeling complex phenomena and solving complex mathematical problems.

PHYSICAL AND ECONOMIC FEASIBILITY OF NONSTRUCTURAL FLOOD PLAIN MANAGEMENT MEASURES

The purpose of this study is to examine the physical and economic feasibility of a number of nonstructural flood control measures and develop criteria for their use. Eleven such measures are selected; this report evaluates their overall physical and economic feasibility. The measures studied are: temporary and permanent closures for openings in existing structures; raising existing structures; construction of new structures on fill or columns; small walls or levees around structures; relocating or protecting damageable property; relocating existing structures and/or contents out of a flood hazard area; flood forecast, warning and evacuation; use of water resistant materials in construction; regulation of development of flood plain land through zoning ordinances, subdivision, regulations and building codes; public acquisition of title or easement to flood plain land; and flood insurance. Cost estimates, advantages, disadvantages and references are provided for each measure. A sensitivity analysis of flood damage in relation to various hydrologic, hydraulic, and economic parameters was conducted.

DISTRIBUTED ENERGY MANAGEMENT OF ELECTRICAL POWER SYSTEMS

John Wiley & Sons Go in-depth with this comprehensive discussion of distributed energy management Distributed Energy Management of Electrical Power Systems provides the most complete analysis of fully distributed control approaches and their applications for electric power systems available today. Authored by four respected leaders in the field, the book covers the technical aspects of control, operation management, and optimization of electric power systems. In each chapter, the book covers the foundations and fundamentals of the topic under discussion. It then moves on to more advanced applications. Topics reviewed in the book include: System-level coordinated control Optimization of active and reactive power in power grids The coordinated control of distributed generation, elastic load and energy storage systems Distributed Energy Management incorporates discussions of emerging and future technologies and their potential effects on electrical power systems. The increased impact of renewable energy sources is also covered. Perfect for industry practitioners and graduate students in the field of power systems, Distributed Energy Management remains the leading reference for anyone with an interest in its fascinating subject matter.

ASSET AND RISK MANAGEMENT

RISK ORIENTED FINANCE

John Wiley & Sons The aim of this book is to study three essential components of modern finance - Risk Management, Asset Management and Asset and Liability Management, as well as the links that bind them together. It is divided into five parts: Part I sets out the financial and regulatory contexts that explain the rapid development of these three areas during the last few years and shows the ways in which the Risk Management function has developed recently in financial institutions. Part II is dedicated to the underlying theories of Asset Management and deals in depth with evaluation of financial assets and with theories relating to equities, bonds and options. Part III deals with a central theory of Risk Management, the general theory of Value at Risk or VaR, its estimation techniques and the setting up of the methodology. Part IV is the point at which Asset Management and Risk Management meet. It deals with Portfolio Risk Management (the application of risk management methods to private asset management), with an adaptation of Sharpe's simple index method and the EGP method to suit VaR and application of the APT method to investment funds in terms of behavioural analysis. Part V is the point at which Risk Management and Asset and Liability Management (ALM) meet, and touches on techniques for measuring structural risks within the on and off balance sheet. The book is aimed both at financial professionals and at students whose studies contain a financial aspect. "Esch, Kieffer and Lopez have provided us with a comprehensive and well written treatise on risk. This is a must read, must keep volume for all those who need or aspire to a professional understanding of risk and its management." —Harry M Markowitz, San Diego, USA

NITROGEN IN THE ENVIRONMENT: SOURCES, PROBLEMS AND MANAGEMENT

Gulf Professional Publishing Nitrogen in the Environment: Sources, Problems, and Management is the first volume to provide a holistic perspective and comprehensive treatment of nitrogen from field, to ecosystem, to treatment of urban and rural drinking water supplies, while also including a historical overview, human health impacts and policy considerations. It provides a worldwide perspective on nitrogen and agriculture. Nitrogen is one of the most critical elements required in agricultural systems for the production of crops for feed, food and fiber. The ever-increasing world population requires increasing use of nitrogen in agriculture to supply human needs for dietary protein. Worldwide demand for nitrogen will increase as a direct response to increasing population. Strategies and perspectives are considered to improve nitrogen-use efficiency. Issues of nitrogen in crop and human nutrition, and transport and transformations along the continuum from farm field to ground water, watersheds, streams, rivers, and coastal marine environments are discussed. Described are aerial transport of nitrogen from livestock and agricultural systems and the potential for deposition and impacts.

The current status of nitrogen in the environment in selected terrestrial and coastal environments and crop and forest ecosystems and development of emerging technologies to minimize nitrogen impacts on the environment are addressed. The nitrogen cycle provides a framework for assessing broad scale or even global strategies to improve nitrogen use efficiency. Growing human populations are the driving force that requires increased nitrogen inputs. These increasing inputs into the food-production system directly result in increased livestock and human-excretory nitrogen contribution into the environment. The scope of this book is diverse, covering a range of topics and issues from furthering our understanding of nitrogen in the environment to policy considerations at both farm and national scales.
