INQUIRING SCIENTISTS, INQUIRING READERS IN MIDDLE SCHOOL

USING NONFICTION TO PROMOTE SCIENCE LITERACY

NSTA Press Great news for multitasking middle school teachers: Science educators Terry Shiverdecker and Jessica Fries-Gaither can help you blend inquiry-based science and literacy instruction to support student learning and maximize your time. Several unique features make Inquiring Scientists, Inquiring Readers in Middle School a valuable resource: • Lessons integrate all aspects of literacy—reading, writing, speaking, listening, and viewing. The texts are relevant nonfiction, including trade books, newspaper and magazine articles, online material, infographics, and even videos. • A learning-cycle framework helps students deepen their understanding with data collection and analysis before reading about a concept. • Ten investigations support current standards and encompass life, physical, and Earth and space sciences. Units range from “Chemistry, Toys, and Accidental Inventions” to “Thermal Energy: An Ice Cube’s Kryptonite!” • The authors have made sure the book is teacher-friendly. Each unit comes with scientific background, a list of common misconceptions, an annotated text list, safety considerations, differentiation strategies, reproducible student pages, and assessments. This middle school resource is a follow-up to the authors’ award-winning Inquiring Scientists, Inquiring Readers for grades 3-5, which one reviewer called “very thorough, and any science teacher’s dream to read.” The book will change the way you think about engaging your students in science and literacy.

Goyal Brothers Prakashan A Textbook of Geography For ICSE Schools for Class 7 (Includes the Essence of NEP 2020) We are pleased to present the series A Textbook of Geography for Classes 6 to 8. This series has been written in strict conformity with the latest curriculum. The new curriculum deals with the development of children's understanding and appreciation of the world through a continuous interaction and exploration of the natural and human environment. It also aims at encouraging children to appreciate the interdependence of individuals, groups and communities and promotes a healthy respect for different types of cultures and ways of life of people around the world. This series endeavors to introduce the practical aspect of the subject, along with the text, through appropriate Diagrams, Pictures, Maps, Mind Maps (graphic organizers) and latest updates in the field of Geography. The series has been specially designed for the young learners to make the learning experience both enjoyable and informative. The salient features of the books in this series are - 1. Simple, lucid and student friendly language with scientific, logical and practical approach. 2. Precise and to-the-point contents are given to avoid unnecessary details. 3. Maps and diagrams have been kept simple and clear. 4. In most cases there are separate maps for different types of information instead of providing them in one map. 5. Map skills in regional geography play an important role in understanding the subject as well as laying foundation for the future Examinations. For all the continents covered in curriculum, Self Explanatory Colorful Maps with consolidated information have been given. For the convenience of the students and teachers, Practice Maps have been provided. 6. Colorful Mind Maps at the end of each lesson, give the gist of the lesson at a glance and are ideal for a quick revision. 7. Worksheets under Classwork have been introduced to comprehend the lesson. These are to be solved under the direct supervision of the teacher. 8. Comprehensive Exercise at the end of chapter contains all types of questions to consolidate learning. 9. Teacher's Resource Book containing answers of the exercise given at the back of each lesson is available. The present set of books for classes 6, 7 and 8 is a continuation of my existing series of ICSE Geography for classes 9 and 10. This is a genuine effort to maintain the continuity in the ICSE syllabus from Classes 6 to 10 and prepare the students for the oncoming Board Examinations, right from class 6 onward. I hope to succeed in inculcating the interest and confidence amongst the students by providing the required guidance to achieve their ultimate goals. INTRODUCTION TO GENERAL, ORGANIC, AND BIOCHEMISTRY

Thomson Brooks/Cole The authors recognize that both science and mathematics may be daunting subjects for many students taking this course. With this in mind, they have anticipated where students might stumble, and have paced and organized this text to help them through. Their goal is to make the material interesting and relevant, so students understand the basic chemical principles related to their career. The authors emphasize problem solving and provide a range of practice exercises. As in previous editions, the text first presents the basic concepts of general chemistry and then moves into organic and biochemistry. In this edition, the first two sections have been revised primarily to improve explanations, and include new pedagogical features. The biochemistry portion has been thoroughly updated to include coverage of many recent developments and emerging technologies in the field.

SCIENCE STORIES YOU CAN COUNT ON

51 CASE STUDIES WITH QUANTITATIVE REASONING IN BIOLOGY

NSTA Press Using real stories with quantitative reasoning skills enmeshed in the story line is a powerful and logical way to teach biology and show its relevance to the lives of future citizens, regardless of whether they are science specialists or laypeople." —from the introduction to Science Stories You Can Count On This book can make you a marvel of classroom multitasking. First, it helps you achieve a serious goal: to blend 12 areas of general biology with quantitative reasoning in ways that will make your students better at evaluating product claims and news reports. Second, its 51 case studies are a great way to get students engaged in science. Who wouldn't be glad to skip the lecture and instead delve into investigating cases with titles like these: • "A Can of Bull? Do Energy Drinks Really Provide a Source of Energy?" • "ELVIS Meltdown! Microbiology Concepts of Culture, Growth, and Metabolism" • "The Case of the Druid Dracula" • "As the Worm Turns: Speciation and the Maggot Fly" • "The Dead Zone: Ecology and Oceanography in the Gulf of Mexico" Long-time pioneers in the use of educational case studies, the authors have written two other popular NSTA Press books: Start With a Story (2007) and Science Stories: Using Case Studies to Teach Critical Thinking (2012). Science Stories You Can Count On is easy to use with both biology majors and nonscience students. The cases are clearly written and provide detailed teaching notes and answer keys on a coordinating website. You can count on this book to help you promote scientific and data literacy in ways to prepare students to reason quantitatively and, as the authors write, "to be astute enough to demand to see the evidence."

TUTORIALS IN MOLECULAR REACTION DYNAMICS

Royal Society of Chemistry The focus of this excellent textbook is the topic of molecular reaction dynamics. The chapters are all written by internationally recognised researchers and, from the outset, the contributors are writing with the young scientist in mind. The easy to use, stand-alone, chapters make it of value to students, teachers, and researchers alike. Subjects covered range from the more traditional topics, such as potential energy surfaces, to more advanced and rapidly developing areas, such as femtochemistry and coherent control. The coverage of reaction dynamics is very broad, so many students studying chemical physics will find elements of this text interesting and useful. Tutorials in Molecular Reaction Dynamics includes extensive references to more advanced texts and research papers, and a series of 'Study Boxes' help readers grapple with the more difficult concepts. Each chapter is thoroughly cross-referenced, helping the reader to link concepts from different branches of the subject. Worked problems are included, and each chapter concludes with a selection of problems designed to test understanding of the subjects covered. Supplementary reading material, and worked solutions to the problems, are contained on a secure website.
