ADVANCED PROBLEMS IN MATHEMATICS

PREPARING FOR UNIVERSITY

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. *Advanced Problems in Mathematics* bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. GENDER AND HINDU NATIONALISM

UNDERSTANDING MASCULINE HEGEMONY

Routledge This book presents an innovative approach to gender, nationalism, and the relations between them, and analyses the broader social base of Hindu nationalist organisation to understand the growth of 'Hindutva', or Hindu nationalism, in India. Arguing that Hindu nationalist thought and predilections emerge out of, and, in turn, feed, pre-existing gendered tendencies, the author presents the new concept of 'masculine hegemony', specifically Brahmanical masculine hegemony. The book offers a historical overview of the processes that converge in the making of the identity 'Hindu', in the making of the religion 'Hinduism', and in the shaping of the movement known as 'Hindutva'. The impact of colonialism, social reform, and caste movements is explored, as is the role of key figures such as Mohandas Gandhi, Indira Gandhi, and Narendra Modi. The book sheds light on the close, yet uneasy, relations that Hindu nationalist thought and practice have with conceptions of 'modernity', 'development' and women's movements, and politics, and the future of Hindu nationalism in India. A new

approach to the study of Hindu nationalism, this book offers a theoretically innovative understanding of Indian history and socio-politics. It will be of interest to academics working in the field of Gender studies and Asian Studies, in particular South Asian history and politics.

ENOCHIC JUDAISM

THREE DEFINING PARADIGM EXEMPLARS

A&C Black From the Books of Enoch, Jackson identifies a paradigm of order as opposed to deviation, which defined orthodoxy and elect identity in a manner which was absolutely exclusive. Over 300 years "Enochic Judaism" developed three working models within this paradigm to explain their worldview and its implications. These three models concerned 1) the fall of the angels under Shemikhazah (ethnic purity); 2) the revealing of secrets under the leadership of 'Aza'el (cultural purity); and 3) the going astray of the cosmos through the sin of the angels who govern its phenomena (liturgical purity). Jackson examines the way in which this tradition was developed within the Dead Sea Scrolls literature and notes its acceptance as authentic and authoritative within the so-called sectarian literature in particular.

PAIN MANAGEMENT AND THE OPIOID EPIDEMIC

BALANCING SOCIETAL AND INDIVIDUAL BENEFITS AND RISKS OF PRESCRIPTION OPIOID USE

National Academies Press Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

CONSTITUCIONES UNIVERSITATIS CANTEBRIGIENSIS

CUP Archive Dr Hackett discovered in the Angelica Library in Rome a manuscript containing a unique text of the first constitution of Cambridge University. The centrepiece of this book is a critical edition of the text with an English translation on facing pages. The importance of his discovery for historians of Cambridge and of medieval university education cannot be overestimated. The Cambridge constitutions form a complete code, promulgated at a remarkably early date (c. 1250). Dr Hackett shows that Oxford lagged more than 50 years behind Cambridge in codifying its statutes and neither Paris nor Bologna, the oldest of all universities, had a written constitution or code of laws at this time.

LARGESSE

University of Chicago Press In 1990 the Department of Graphic Arts at the Louvre made their holdings available to guest curators for a program called Parti Pris, or "Taking Sides". In this program, major cultural figures outside of the discipline of art

history organized exhibitions based on the department's collection. Within its first several years, this novel collaboration produced exhibitions curated by philosopher Jacques Derrida and filmmaker Peter Greenaway. Jean Starobinski, noted literary critic and intellectual historian from the University of Geneva, was selected as the third curator in the program. In his exhibition and accompanying essay, Starobinski explores the theme of largesse in its broadest sense. Arguing that gift giving and receiving are fundamental human gestures, he examines graphic and textual representations from the offering of the apple to Eve to Salome's gift of the head of John the Baptist, from the giving of laws to the gift of death. Charity, the poetic gift, and the benefits of Fortune all play a role in Starobinski's extended meditation on the act of donation. Lavishly illustrated and dazzling in its scope and imagination, *Largesse* is an exemplar of the rich intellectual work that can result from crossing disciplinary boundaries and considering history as a dense network of themes and allusions.

NOURISHING MILLIONS: STORIES OF CHANGE IN NUTRITION: SYNOPSIS

Intl Food Policy Res Inst In recent years, the world has seen unprecedented attention and political commitment to addressing malnutrition. Milestones such as the Scaling Up Nutrition (SUN) Movement, the Lancet Maternal and Child Nutrition Series, and the Second International Conference on Nutrition (ICN2) have marked the rapid rise of nutrition on the global policy and research agenda. These developments reverse years of relative neglect for nutrition. Undernutrition is a global challenge with huge social and economic costs. It kills millions of young children annually, stunts growth, erodes child development, reduces the amount of schooling children attain, and increases the likelihood of their being poor as adults, if they survive. Stunting persists through a lifetime and beyond—underweight mothers are more likely to give birth to underweight children, perpetuating undernutrition across generations. Undernutrition reduces global gross domestic product by US\$1.4-\$2.1 trillion a year—the size of the total economy of Africa south of the Sahara.

DISEASE CONTROL PRIORITIES, THIRD EDITION (VOLUME 9)

IMPROVING HEALTH AND REDUCING POVERTY

World Bank Publications As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

PROHIBITION AND POLITICS

THE LIFE OF BISHOP JAMES CANNON, JR

Reaktion Books In the late 1920s and early 1930s "Bishop Cannon" became a household word in much of America. Methodist bishop James Cannon, Jr., was probably the most influential southern churchman between the Civil War and World War II and certainly the most controversial. A paradoxical figure, he seemed as comfortable in the secular world of business and public affairs as in the church, and critics condemned him as an exemplar of the materialistic values of the 1920s. Plunging into politics in Virginia and the nation to secure and protect prohibition, he dramatically broke the southern taboo against preachers in politics.

THE AGE OF INSECURITY

Verso We live in an era in which the culture and values of big business are dominant. The riptides of capital swirl around the globe ruining entire economies overnight. Directors and chief executives cash in stock options for unimaginable fortunes while whole workforces are "downsized" as companies relocate at a whim. Environmental degradation escalates as the earth's resources are looted. The dream of worldwide prosperity and peace is given the lie from Kosovo to the Congo, from the drug baronies of South America to the criminal empires of the former Soviet Union. Welcome to the Age of Insecurity. In the face of this slow-motion global coup d'etat by untrammelled finance, traditionally left leaning parties now in power have abandoned their concern with regulating business for a compulsive and self-righteous moralism; the Blair government stands as a perfect exemplar in this trend. In the coruscating argument the authors make a plea for government to turn strictures concerning ethics away from the citizen and on to a financial system that is making our society ever more precarious. Since the publication of the hardback of he Age of Insecurity in May 1998 events have conspired to validate the author's argument. In a new preface and afterword Elliott and Atkinson draw out the lessons to be learned from the hedge-fund crisis, the disintegration of the rouble and the spreading of economic turmoil in Latin America. The Age of Insecurity is, more than ever, a vital and radical tract for our times.

ENGLAND AND THE 12TH-CENTURY RENAISSANCE

Routledge Books and learning in 12th-century Europe are the broad concern of the nineteen papers assembled here. The discussion of 'books' ranges from important individual manuscripts, to collections manufactured in 'scriptoria' and kept in 'libraries'; the 'learning' is primarily the composition, transmission and study of Latin literary texts, both ancient and contemporary. Special attention is given to the Latin classics, to the literary culture of the larger Benedictine houses, to the phenomenal quantity of Latin satirical writing of the period, and to the dissemination and reception of texts and ideas over time. While the geographical focus is England, the relationship of English materials and developments to the wider European context is constantly emphasized.

MONTESQUIEU REVISITED

Macmillan Reference USA "Montesquieu (1689-1755) was one of the major figures of the French Enlightenment. He was a widely travelled man, unusual in those days for French intellectuals, and like de Tocqueville a century later, he brought his magnificent powers of observation to bear on what he had seen. Credited as one of the principal inventors of what we today call political science, Montesquieu is primarily known to English-speaking readers by the great work *De l'esprit des lois* (*Spirit of the Laws*). But *Les Lettres Persanes* (*The Persian Letters*) is still required reading in French lycees and universities and is considered as much a literary work as a political treatise." "In *Montesquieu Revisited*, Peter V. Conroy, Jr., reevaluates Montesquieu as a fully fledged "homme de lettres," no longer merely a political, social, and economic commentator. Conroy offers detailed readings of *The Persian Letters* and *Spirit of the Laws* as well as an explication of three important but largely overlooked works, *Voyages in Europe*, *Considerations on the Romans*, and *My Thoughts*. In his discussion of these works, Conroy shows what is unique and original in Montesquieu: his theory of climate and its effect on civilization, his desire to show the impact of values and attitudes upon historical events, his narrative strategies, and his constant analytical bent. Montesquieu emerges as a more complex figure than the conventional view of him as exemplar of the age of reason - in fact as a more truly "modern" author."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. EXEMPLARY COMPARISON FROM HOMER TO PETRARCH

DS Brewer This book offers a study of comparison and identification with exemplary figures in literary tradition, ranging widely across the whole European canon up until the late thirteenth and early fourteenth centuries, and therefore providing a comprehensive treatment of the subject. The author begins with Classical authors - Homer, Virgil, Latin poets from Catullus to Ovid - and with late and medieval Latin poets; she then moves on to deal with the troubadour lyric (including Italian and Catalan poets who wrote in Provençal /Occitan), the trouvère lyric, the German lyric, and the Sicilian and Italian lyric, up to and including Petrarch. Representative examples of comparison or identification with an exemplar are given in the original

language, followed by a translation and a textual and literary commentary.
