WHO CREAMED PEACHES, ANYWAY?

Harlequin Books Teddi usually ignored Drew Scoones's warnings to stay out of his cases... After all, who in her right mind would give up steamy post-arrest debriefing sessions with Detective Swoons? But when Drew's partner is accused of murdering Peaches Lipschitz--aka the Hooker Housewife--the department promptly takes Drew off the case. Now he's looking at a major lifestyle change and finally doing the one thing that really rattles Teddi... proposing marriage! So Long Island's Most Dangerous Decorator is doing the impossible: breaking up with Drew to investigate on her own...and making her snobbish mother happy for the first time ever. And she's finding that slipping Drew clues undercover is as hot--and dangerous--as revealing Peaches' secret clientele. But Drew isn't going to stay sidelined for long--or let one irresistible interior decorator get away scot-free....

MANAGING THE TRANSITION TO A LOW-CARBON ECONOMY

PERSPECTIVES, POLICIES, AND PRACTICES FROM ASIA

Brookings Institution Press Asia must be at the center of the global fight against climate change. It is the world's most populous region, with high economic growth, a rising share of global greenhouse gas emissions, and the most vulnerability to climate risks. Its current resource- and emission-intensive growth pattern is not sustainable. This study recognizes low-carbon green growth as an imperative—not an option—for developing Asia. Asia has already started to move toward low-carbon green growth. Many emerging economies have started to use sustainable development to bring competitiveness to their industries and to serve growing green technology markets. The aim of this study is to share the experiences of emerging Asian economies and the lessons learned. The book assesses the low-carbon and green policies and practices taken by Asian countries, identifies gaps, and examines new opportunities for low-carbon green growth.

THE COMPLETE STORY 1951 TO 1971

THE ANTHROPOLOGICAL TURN

FRENCH POLITICAL THOUGHT AFTER 1968

University of Pennsylvania Press A close look at post-1968 French thinkers Régis Debray, Emmanuel Todd, Marcel Gauchet, and Alain de Benoist In *The Anthropological Turn*, Jacob Collins traces the development of what he calls a tradition of "political anthropology" in France over the course of the 1970s. After the social revolution of the 1960s brought new attention to identities and groups that had previously been marginal in French society, the country entered a period of stagnation: the economy slowed, the political system deadlocked, and the ideologies of communism and Catholicism lost their appeal. In this time of political, cultural, and economic indeterminacy, political anthropology, as Collins defines it, offered social theorists grand narratives that could give greater definition to "the social" by anchoring its laws and histories in the deep and sometimes archaic past. Political anthropologists sought to answer the most basic of questions: what is politics and what constitutes a political community? Collins focuses on four influential, yet typically overlooked, French thinkers—Régis Debray, Emmanuel Todd, Marcel Gauchet, and Alain de Benoist—who, from Left to far Right, represent different political leanings in France. Through a close and comprehensive reading of their work, he explores how key issues of religion, identity, citizenship, and the state have been conceptualized and debated across a wide spectrum of opinion in contemporary France. Collins argues that the stakes have not changed since the 1970s and rival conceptions of the republic continue to vie for dominance. Political and cultural issues of the moment—the burkini, for example—become magnified and take on the character of an anthropological threat. In this respect, he shows how the anthropological turn, as it figures in the work of Debray, Todd, Gauchet, and Benoist, is a useful lens for viewing the political and social controversies that have shaped French history for the last forty years.

LOW-CARBON GREEN GROWTH IN ASIA

POLICIES AND PRACTICES

Asia is at a crossroads. It is the world's most populous region, it accounts for a rising share of global greenhouse gas emissions, and it is the region most vulnerable to climate risks. *Low-Carbon Green Growth in Asia: Policies and Practices* recognizes that in order to

develop the region, low-carbon green growth is imperative. The volume reviews low-carbon policy initiatives taken by Asian countries at the national, sectoral, and local levels while assessing their achievements, identifying the remaining gaps, and examining new opportunities. The volume notes that actions taken by several Asian countries to date have been both impressive and replicable and that the region's commitment to low-carbon green growth represents a move away from the old economic notion of "grow first and clean later." However, emerging Asia's carbon emissions remain high, and failure to act swiftly could increase mitigation costs by two to five times and lock in a high-carbon footprint for decades to come.

INDEX OF SPECIFICATIONS (INCLUDING MILITARY (MIL AND JAN) STANDARDS)

MANUAL OF TESTS AND CRITERIA

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

In this new edition, the author has revised and reorganized sections to enhance understanding of physical principles, and he has modified and added examples, as well as homework problems. The new edition also contains a thorough development of computational methods for solving the differential equations of motion for constrained systems.

I WILL SURVIVE

THE BOOK

St. Martin's Press *I Will Survive* is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.
