Historical Materialism

A System of Sociology

Routledge First published in English in 1926, this work by Nikolai Bukharin, a highly influential Marxist and Soviet Politician who would later become one of the most famous victims of Stalin's show trials, expands upon Karl Marx's theory of historical materialism. Offering a Marxist interpretation of sociology, this reissue is important not only from a sociological and economic perspective, but is also extremely valuable as a socio-historical document of contemporary thought in the Soviet Union in the years following the Bolshevik revolution.

Biodiversity

A Challenge for Development Research and Policy

Springer Science & Business Media Biodiversity, sometimes simply understood as "diversity of species", is a specific quality of life on our planet, the dimensions and importance of which have just lately been fully realized. Today we know that "biological diversity is a global asset of incalculable value to present and future generations" (Kofi Annan). Biodiversity is spread unequally over the world: in fact, the main share of biological resources worldwide is harboured predominantly by the so-called developing countries in the tropics and sub tropics. Therefore, Biodiversity - A Challenge for Development Research and Policy was chosen as the title for an international conference which was held in Bonn in 1997 as one of the first major events organized by the then newly established North-South Centre for Development Research (ZEF) at Rheinische Friedrich-Wilhelms-Universität Bonn (Germany). Since the ZEF, founded by the Senate of the University of Bonn in 1995, has played a central role in turning Bonn into a centre for international cooperation and

North-South dialogue. The Centre is a product of the Bonn Berlin agreement of July 1994 which was adopted to offset the effects caused by the Parliament and much of the Government moving to Berlin. It fits in well with the double strategy to strengthen Bonn's position as an international science arena and as an eminent place for development policy and the national and supranational agencies dealing with this issue.

## The Count of Monte Cristo

BookRix The Count of Monte Cristo is an adventure novel by French author Alexandre Dumas. It is one of the author's most popular works, along with The Three Musketeers. Like many of his novels, it is expanded from plot outlines suggested by his collaborating ghostwriter Auguste Maquet. The story takes place in France, Italy and islands in the Mediterranean during the historical events of 1815-1838. It begins from just before the Hundred Days period (when Napoleon returned to power after his exile) and spans through to the reign of Louis-Philippe of France. The historical setting is a fundamental element of the book. An adventure story primarily concerned with themes of hope, justice, vengeance, mercy and forgiveness, it focuses on a man who is wrongfully imprisoned, escapes from jail, acquires a fortune and sets about getting revenge on those responsible for his imprisonment. However, his plans have devastating consequences for the innocent as well as the guilty. In addition, it is a story that involves romance, loyalty, betrayal and selfishness, shown throughout the story as characters slowly reveal their true inner nature. The book is considered a literary classic today. According to Luc Sante, "The Count of Monte Cristo has become a fixture of Western civilization's literature, as inescapable and immediately identifiable as Mickey Mouse, Noah's flood, and the story of Little Red Riding Hood."

## Homo Ludens

### A Study of the Play-Element in Culture

Beacon Press In *Homo Ludens*, the classic evaluation of play that has become a "must-read" for those in game design, Dutch philosopher Johan Huizinga defines play as the central activity in flourishing societies. Like civilization, play requires structure and participants willing to create within limits. Starting with Plato, Huizinga traces the contribution of *Homo Ludens*, or "Man the player" through Medieval Times, the Renaissance, and into our modern civilization. Huizinga defines play against a rich theoretical background, using cross-cultural examples from the humanities, business, and politics. *Homo Ludens* defines play for generations to come. "A happier age than ours once made bold to call our species by the name of *Homo Sapiens*. In the course of time we have come to realize that we are not so reasonable after all as the Eighteenth Century with its worship of reason and naive optimism, though us; hence modern fashion inclines to designate our species as *Homo Faber*: Man the Maker. But though *Faber* may not be quite so dubious as *Sapiens* it is, as a name specific of the human being, even less appropriate, seeing that many animals too are makers. There is a third function, however, applicable to both human and animal life, and just as important as reasoning and making—namely, playing. It seems to me that next to *Homo Faber*, and perhaps on the same level as *Homo Sapiens*, *Homo Ludens*, Man the Player, deserves a place in our nomenclature."—from the Foreword, by Johan Huizinga

## Combating Tax Avoidance in the EU

## Harmonization and Cooperation in Direct Taxation

Kluwer Law International B.V. Following each Member State's need to rebuild a strong and stable economy after the 2007 financial crisis, the European Union (EU) has developed a robust new transparency framework with binding anti-abuse measures and stronger instruments to challenge external threats of base erosion. This is the first and only book to provide a complete detailed analysis of the Anti-Tax Avoidance Package and other recent and ongoing European actions taken in direct taxation. With contributions from both prominent tax academics and Spain's delegates to the European meetings where these rules are debated and promulgated, the book covers such issues and topics as the following: - the development of the EU Strategy towards Aggressive Tax Planning; - recent tax-related jurisprudence of the European Court of Justice; - the Anti-Tax Avoidance Directive; - tax treaties and non-tax treaties with tax consequences both between Member States and between Member States and third countries; - code of conduct for business taxation; - automatic exchange of information; - country-by-country reporting; - arbitration in tax matters; - external strategy for effective taxation regarding non-EU countries; - competition and state aid developments in direct taxation; - the Common Consolidated Tax Base; and - digital significant presence and permanent establishment. As the EU pursues its ambitious tax agenda, taxation's contribution to EU growth and competitiveness and its part in relations with the rest of the world will come into ever clearer focus. In addition to its insights into these trends, the book's unparalleled practical information and analysis will be of great value to tax practitioners dealing with investment analysis, tax planning schemes, and other features of the current international tax landscape.

## Dialogues of Love

University of Toronto Press First published in Rome in 1535, Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Miguel de Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'On the Origin of Love' - that take place over a period of three subsequent days. They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover and teacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides an invaluable resource for today's readers.

## Soil and Sediment Remediation

## Mechanisms, Technologies and Applications

**IWA Publishing Soil and Sediment Remediation** discusses in detail a whole set of remediative technologies currently available to minimise their impact. Technologies for the treatment of soils and sediments in situ (landfarming, bioscreens, bioventing, nutrient injection, phytoremediation) and ex situ (landfarming, bio-heap treatment, soil suspension reactor) will be discussed. The microbiological, process technological and socio-economical aspects of these technologies will be addressed. Special attention will be given to novel biotechnological processes that utilise sulfur cycle conversions, e.g. sulfur and heavy metal removal from soils. Also the potential of phytoremediation will be highlighted. In addition, treatment schemes for the clean-up of polluted megasites, e.g. harbours and Manufactured Gaswork Plants (MGP), will be elaborated. The aim of **Soil and Sediment Remediation** is to introduce the reader in: the biogeochemical characteristics of soil and sediments- new techniques to study soil/sediment processes (molecular probes, microelectrodes, NMR) clean up technologies for soils polluted with organic (PAH, NAPL, solvents) or inorganic (heavy metals) pollutants- preventative and remediative strategies and technologies available in environmental engineering novel process applications and bioreactor designs for bioremediation the impact of soil pollution on society and its economic importance.

## Investing in Cultural Diversity and Intercultural Dialogue

**UNESCO** This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

## Foreign Women Authors under Fascism and Francoism

## Gender, Translation and Censorship

**Cambridge Scholars Publishing** This collection of essays highlights cultural features and processes which characterized translation practice under the dictatorships of **Benito Mussolini (1922-1940)** and **Francisco Franco (1939-1975)**. In spite of the different timeline, some similarities and parallelisms may be drawn between the power of the Fascist and the Francoist censorships exerted on the Italian and Spanish publishing and translation policies. Entrusted to European specialists, this collection of articles brings to the fore the

“microhistory” that exists behind every publishing proposal, whether collective or individual, to translate a foreign woman writer during those two totalitarian political periods. The nine chapters presented here are not a global study of the history of translation in those black times in contemporary culture, but rather a collection of varied cases, small stories of publishers, collections, translations and translators that, despite many disappointments but with the occasional success, managed to undermine the ideological and literary currents of the dictatorships of Mussolini and Franco.
