**Education for Cataloging and the Organization of Information Pitfalls and the Pendulum** Routledge What does the future hold for cataloging education? Written by some of the best-known authors and most innovative thinkers in the field, including Michael Gorman, Sheila S. Intner, and Jerry D. Saye, this comprehensive collection examines education for students and working librarians in cataloging and bibliographic control, emphasizing history, context, the state of the art at present, and suggested future directions. A liberal dose of visual aids—charts, tables, etc.—makes accessing the information quick and easy. From the editor: “The education of catalogers has swung pendulum-like from on-the-job training to graduate education and back again. The place of cataloging in the library school curriculum has swung from one of near pre-eminence to one of near extinction, and has begun to swing back again. The durability of education for cataloging has swung from 'In getting your degree you will learn everything you need to know in your career,' to 'You will have to engage in continuing education throughout your career, beginning virtually as soon as you have your degree.' Making informed decisions about how (and how much) cataloging education is to be provided is full of pitfalls, some of which the profession has fallen into already. What is needed now is a reconsideration of how education for cataloging and bibliographic control is provided.” Education for Cataloging and the Organization of Information: Pitfalls and the Pendulum addresses four main areas: the ways professionals perceive the place, nature, and necessity of cataloging education; the professional, demographic, and academic context within which cataloging education is provided; education regarding special types of materials and special aspects of cataloging; and alternatives to traditional modes of education for cataloging, including: distance education online mentoring Web-based instruction continuing education training for (and via) cooperative projects the role of the “community of catalogers” in the continuing education of those who provide intellectual access to the world of information and much more!

Speaking for Animals Animal Autobiographical Writing** Routledge For thousands of years, in the myths and folktales of people around the world, animals have spoken in human tongues. Western and non-Western literary and folkloric traditions are filled with both speaking animals, some of whom even narrate or write their own autobiographies. Animals speak, famously, in children’s stories and in cartoons and films, and today, social networking sites and blogs are both sites in which animals—primarily pets—write about their daily lives and interests. Speaking for Animals is a compilation of chapters written from a variety of disciplines that attempts to get a handle on this cross cultural and longstanding tradition of animal speaking and writing. It looks at speaking animals in literature, religious texts, poetry, social networking sites, comic books, and in animal welfare materials and even library catalogs, and addresses not just the “whys” of speaking animals, but the implications, for the animals and for ourselves. **NACO Participants' Manual** Library of Congress **Library of Congress Subject Headings Catalog of Copyright Entries. Examine the projects that are moving the information science professions in that direction today! In Authority Control in Organizing and Accessing Information: Definition and International Experience, international experts examine the state of the art and explore new theoretical perspectives. This essential resource, which has its origins in the International Conference on Authority Control (Italy, 2003), addresses standards, exchange formats, and metadata—with sections on authority control for names, works, and subjects. Twenty fascinating case examples show how authority control is practiced at institutions in various nations around the world. Authority Control in Organizing and Accessing Information provides an essential definition of authority control and then begins its sharply focused examinations of essential aspects of authority control with a section entitled “State of the Art and New Theoretical Perspectives.” Here you’ll find chapters focusing on: the current state of the art—with

In this active and quickly-evolving field, new methods of clarification are essential for successful archive management. The articles in Respect for Authority: Authority Control, Context Control, and Archival Description offer an innovative approach by marking and exploring a clear distinction between conventional archival authority files and the broader concept of context control. Intended to not only answer important questions but raise worthy new ones as well, Respect for Authority: Authority Control, Context Control, and Archival Description reveals striking new perspectives in managing archival description more effectively. The engaging essays in this collection tackle key issues of archive authority control and offer sound proposals for advancing a new course. Comprehensive in its approach, this text takes an in-depth look at both the International Standard for Archival Authority Records (ISAAR) and the American standard, Describing Archives: a Content Standard (DACS) and considers the place of authority control in these two standards for archival description. In addition, contributors offer practical answers to the thorny issue of identifying the boundaries of a records-creating entity and present criteria for determining when a new entity is established. International in scope, this book presents groundbreaking case studies by archive professionals from Canada, the United States, Italy, and Australia that document the successes of different institutional applications that describe the records-creator first and then link this description to that of the records themselves. Respect for Authority: Authority Control, Context Control, and Archival Description also includes expert discussions of: the role of standards the nature of archives and their relationships with their creators resources necessary to fully document contextualized content the power of provenance possibilities available through a trinity of descriptive entities—records, agents, and functions the potential of "provenance rediscovery" in American repositories postmodern archive theory, multiple provenance, and the reconceptualization of archive context using ISAAR to document records-creating environments challenges inherent in implementing series-based systems of arrangement and description the National Archives and Records Administration (NARA) and the Archival Resource Catalog (ARC) digitizing and publishing registers and the development of the Online Heritage Resource Manager (OHRM) and many more! Ideal for archive professionals, manuscript librarians, students, and researchers of archival administration, Respect for Authority: Authority Control, Context Control, and Archival Description not only resolves important questions revealed by these new trends but opens new discussions of a major shift in descriptive practice. **Technology in Early**

This book considers the nature of industrial society, contemporary capitalism and the impact of political ideas on social structure. These ideas are discussed by reference to the impact of social democracy on the structure of capitalist society in a comparative analysis of Britain and Sweden — including an interview survey of industrial workers socio-political attitudes. The study is concluded by a general discussion of the role of social democracy in capitalist society. It is argued that the development of social democracy generates 'strains' which, in the long term, question the legitimacy of capitalism among industrial manual workers. **Free-floating Subdivisions An Alphabetical Index The Unique Manual and National Underwriter Life Reports Introduction to Cataloging and Classification** [Libraries Unltd Incorporated](#) The field's foremost authority on the organization of information does it again!
