SURVEY RESEARCH IN CORPORATE FINANCE

BRIDGING THE GAP BETWEEN THEORY AND PRACTICE

Oxford University Press **As there is no current book that deals extensively or exclusively with survey research in corporate finance Survey Research in Corporate Finance is the only one of its kind. For even while there are numerous books on survey methodology, none focus on this methodology as specifically applied to corporate finance. In the book, Baker, Singleton, and Velt do nothing less than provide an overview of survey methodology useful to financial researchers, synthesize the major streams or clusters of survey research in corporate finance, and offer a valuable resource and guide for those interested in conducting survey research in finance. Thus this volume will be an essential reference for practitioners, academics, and graduate students-who all must know the methodology of finance survey research. In addition to methodology, the book identifies areas that will be best served by survey-based research. Researchers will have a wealth of information regarding past surveys and will be aware of suitable candidates for future surveys. Several chapters are devoted to synthesizing survey results on major issues in finance. These will help decision makers in finance and in non-finance firms to acquire knowledge learned from years of communications between academics and practitioners.**

FUNDAMENTALS OF FINANCE

INVESTMENTS, CORPORATE FINANCE, AND FINANCIAL INSTITUTIONS

Walter de Gruyter GmbH & Co KG Finance is the study of how individuals, institutions, governments, and businesses acquire, spend, and manage their money and other financial assets to maximize their value or wealth. Fundamentals of Finance introduces the nuances of finance in a comprehensive yet concise manner and is essential reading for professionals building a career in finance or for students taking a course in finance. The book consists of four parts: Part I: "Introduction to Finance, Money and Interest Rates, and Time Value of Money" focuses on the role financial markets play in the financial system and financial basics that underlie how markets operate. Part II: "Investments and Portfolio Management" discusses the characteristics of stocks and bonds, how securities are valued, the operations of securities markets, formation of optimal portfolios, and derivatives. Part III: "Financial Management/Corporate Finance" explores financial planning, asset management, and fund-raising activities that will enhance a firm's value.

Part IV: "Management of Financial Institutions" focuses on management of financial institutions in general, and risk management in financial institutions in particular. The book's many examples, appendices, graphs and tables provide valuable know-how to a wide audience, making it an excellent resource for professionals as well as students who wish to attain a broad understanding of finance. ENERGY PRODUCTION AND MANAGEMENT IN THE 21ST CENTURY

THE QUEST FOR SUSTAINABLE ENERGY

WIT Press Discussing the future of energy production and management in a changing world, this book contains the proceedings of the first international conference on Energy Production and Management in the 21st Century - The Quest for Sustainable Energy. Developed societies require an ever increasing amount of energy resources, which creates complex technological challenges. The idea is to compare conventional energy sources, particularly hydrocarbons, with a number of other ways of producing energy, emphasising new technological developments. The challenge in many cases is the conversion of new sources of energy into useful forms, while finding efficient ways of storing and distributing energy. Energy policies and management are of primary importance to achieving sustainability, and need to be consistent with recent advances made in energy production and distribution. The book will also discuss the energy use of industrial processes, including the imbedded energy contents of materials, particularly those in the built environment. Energy production, distribution and usage, result in environmental risks which need to be better understood. They are part of the energy economics and relate to human environmental health as well as ecosystems behaviour. Topics covered include: Energy production; Energy management; Energy policies; Energy and economic growth; Energy efficiency; Hydropower; Wind energy; Solar energy; Nuclear energy; Biomass and biofuels; Energy storage; Hydrocarbons; Gas production; Processing of oil and gas; Energy conversion; Energy savings; Energy in the built environment; Energy networks; Pipelines; Energy balance; Energy economics; Heat, pumping systems; Environmental risk; Safety management; Emissions; C-O₂ separation and storage; Imbedded energy; Energy and transport; Energy use in industry; Energy transmission and distribution; Energy industry efficiency; Energy security; Training in energy and sustainability.
