THE FUTURE IS NOW

ANTHROPOSOPHY AT THE NEW MILLENNIUM

Temple Lodge Publishing *Rudolf Steiner spoke at various times of a period that*

encompasses the end of the twentieth century and the beginning of the new millennium. He described it as a time of great spiritual struggle in which forces of destruction would wage war on benevolent forces, and how the future of culture and civilization would depend on the outcome. In his many statements on this matter, Steiner warned, in particular, members of the Anthroposophical Society and movement - that they would be called on to develop vital spiritual capacities that are becoming increasingly critical for human progress. In these eighteen essays, contributors offer their thoughts on the question of where anthroposophy in its earthly manifestation now stands and to what extent it is fulfilling its tasks. This commentary on the challenges ahead offers us all a chance to reassess, prepare, and wake up. This compilation features eighteen essays by Jesaiah ben-Aharon, Mario Betti, Terry Boardman, Peter Bridgmont, Gilbert Childs, Dor Deverell, Michaela Glckler, Sevak Gulbekian, Brien Masters, Thomas Meyer, Bernard Nesfield-Cookson, Sergei O. Prokofieff, Richard Seddon, Nick Thomas, Peter Tradowsky, Hans-peter van Manen, Edward Warren, and Olive Whicher.

THEN, NOW AND IN THE FUTURE

A SEARCH FOR HONESTY AND VALUE BASED LIVING

Christian Faith Publishing, Inc. *The inspiration to write this book came as the result of the encouragement of close friends and family. It is an attempt to express and share the beliefs, thoughts, and experiences that have formed and shaped my life over the years. It reflects a natural movement of my life from "then" till "now." These essays are grouped by theme rather than chronology but are dated to help the reader achieve a sense of the movement from "then" till now. It has been an evolutionary process. The question is, What am I trying to communicate to you, and how? The how is through these essays that represent a personal evolutionary process that began in earnest approximately twenty years ago. I would like to share that process or journey of moving from the status quo toward something beyond, moving to something more personal, toward a sensibility for the truth, and an openness to self-education and questioning.*

CHANGE YOUR FUTURE, NOW!

QUESTIONS, REFLECTIONS & ANSWERS

WebTech Publishing *What should you be in the future? Today, we are confronted with more choices about how to live our lives and develop careers than ever before. Repeatedly, we are thrown into situations where we have to reinvent our professional, personnel, and relationship lines, redefining who we are and where we want to go. Change is an inevitable part of life. Everyone needs to question himself, or herself, on life's journey, opening the mind to new challenges regarding how to be great, how to communicate and network. Change is all about acquiring knowledge and wisdom, planning head, being able to influence, inspire, deal with change, negotiate, disagree, be a good citizen and have some common sense, reduce stress, use humor and have the intuition to facilitate success for a better future. I encourage you to be completely open and transparent as you look inside yourself and answer*

the very challenging and difficult questions posed as you reflect on what you should be in the future.

THE FUTURE STARTS NOW

EXPERT INSIGHTS INTO THE FUTURE OF BUSINESS, TECHNOLOGY AND SOCIETY

Bloomsbury Publishing *The future is an uncertain, uncomfortable prospect for employees, employers and society at large. A flurry of unprecedented events have proven that, despite what some politicians and economists may tell us, the future is not set in stone. Instead, it is constantly being shaped and redefined by the everyday decisions of individuals and organizations. In light of this uncertainty, The Future Starts Now looks toward the various innovations and technologies that may shape our future. Authors Theo Priestley and Bronwyn Williams have brought together the world's leading futurists to articulate and clarify the current trajectories in technology, economics, politics and business. This is a comprehensive history of tomorrow, exploring groundbreaking topics such as AI, privacy, education and the future of work. While the guidance, insight and predictions are fascinating for anyone curious about what the future may hold, the book also functions as an invaluable guide for business professionals looking to steer their career or their organization with foresight and confidence.*

REPORTS

FUTURE WAR

John Wiley & Sons *Will tomorrow's wars be dominated by autonomous drones, land robots and warriors wired into a cybernetic network which can read their thoughts? Will war be fought with greater or lesser humanity? Will it be played out in cyberspace and further afield in Low Earth Orbit? Or will it be fought more intensely still in the sprawling cities of the developing world, the grim black holes of social exclusion on our increasingly unequal planet? Will the Great Powers reinvent conflict between themselves or is war destined to become much 'smaller' both in terms of its actors and the beliefs for which they will be willing to kill? In this illuminating new book Christopher Coker takes us on an incredible journey into the future of warfare. Focusing on contemporary trends that are changing the nature and dynamics of armed conflict, he shows how conflict will continue to evolve in ways that are unlikely to render our century any less bloody than the last. With insights from philosophy, cutting-edge scientific research and popular culture, Future War is a compelling and thought-provoking meditation on the shape of war to come.*

THE FUTURE OF CAPITALISM AND DEMOCRACY

University Press of Amer *Contrary to the thinking of many contemporaries, both capitalism and democracy will not last and are to be superceded one day by post-capitalism and post-democracy. The short-lived triumph of market capitalism and liberal democracy in the post-Cold War era does not imply the coming end of systematic ideology, of structural oppression, or of violent conflict at the rational endpoint of history. Unfortunately, violence does not disappear but only takes a different form of hegemony, as it has throughout history. The difference is, each age has its own form to adjust to, so we believe in ours, and those before us believed in theirs, just as those after us will in theirs. In The Future of Capitalism and Democracy, Peter Baofu evaluates how and why capitalism and democracy have failed at the institutional, organizational, structural, cultural, systemic, cosmological, and bio-psychological levels in order to synthesize the often conflicting ideals of freedom, equality, and fraternity (broadly defined to include all dimensions of life), so much cherished by many minds since the modern era. And this is so, even if democracy and capitalism have different meanings in different cultures and societies. In the end, Baofu shows that capitalism and democracy, hegemonic as they are in the post-Cold War era, are just experiments in history and will not last, just as feudalism and aristocracy before them could not.*

SHAPING THE FUTURE

IDEAS - PLANNING - DESIGN

How the World will Change *This book is an auto-biography of Trausti Valsson, an Icelandic architect, planner, theoretician and a professor of planning at the University of Iceland. It gives a personal account of what shaped planning and design in the world and in Iceland as he experienced it in his lifetime. Valsson e.g. tells about his personal encounter with Ian McHarg, Buckminster Fuller and Christopher Alexander. Early TV started working on a future plan for Iceland, consisting, for*

example, of roads connecting Iceland's settlements, across the Central Highlands. He also started an overlay mapping project, mapping both the hazard- and resource areas of the country, which created a basis for his Iceland-Plan proposals. Work on this he continued at Berkeley and at the University of Iceland as he started teaching there in 1988. Many of his articles and books deal with this subject. In 1980 Valsson started his PhD studies in Environmental Planning at UC Berkeley, California. In the philosophical section of his dissertation he presented his argument that the Western, mechanistic worldview was the underlying cause for today's alienation, and that more holistic and integrative schemes were inherent in Eastern worldviews. TV's dissertation is called *A Theory of Integration for Design and Planning - Based on the Concept of Complementarity* (1987). In 1988 - a year after Valsson returned to Iceland - he got an associate professor position in planning at the Engineering Faculty of the University of Iceland, and later a tenured professor position. The last part of this book describes Valsson's 27 years at the University. The title of this present book: *Shaping the Future - Ideas - Planning - Design*, reflects how wide Valsson's field of his operation has been.

THE FUTURE OF COACHING

VISION, LEADERSHIP AND RESPONSIBILITY IN A TRANSFORMING WORLD

Routledge We live in a world that is volatile, uncertain, complex and ambiguous, in which our work and lives are constantly disrupted and changing. But coaches and leaders are still trained to operate within stable models with a uni-focus on performance. Coaches are starting to question the remit of 'raising performance' within existing systems, many of which are outdated, dysfunctional and even toxic. The role of the coach today must evolve to become fit for purpose in challenging times and coaching must re-articulate its values, as the essential compass for navigating turbulent waters. In *The Future of Coaching*, Hetty Einzig examines the role of coaching and leadership in the twenty-first century, and sets out a compelling vision for its future. Drawing on experience gained over twenty-five years of coaching leaders in the corporate and public sectors, in the UK and globally, she challenges the tenet of coaching neutrality. Rather than simply following the client agenda, she encourages coaches to see themselves as partners in courageous leadership and to work towards building an ethical, holistic and networked coaching approach to help create businesses that serve society and our globalised world. The book asks essential questions of coaches working today: how can leaders and

coaches become 'positive deviants' and transform the rules of the game within cultures where denial and group-think are rife? How can coaches work with the anxious and depressed, embracing the dark as well as the light? Are coaches prepared for the rise of Millennials, women leaders and those over sixty (the Third Actors)? Einzig challenges the model of the Strong Leader in favour of Responsible leadership based on authentic strength, distributed power and responsive thinking. And she shows how this vision of a transformed workplace is essential for the transformations society must undertake to reclaim a positive future. This thought provoking collection of essays, designed to be read in any order, is enlightening and inspiring reading for coaches in practice and in training, HR and L&D professionals and for leaders everywhere.

AN UNWORTHY FUTURE

THE GRIM REALITY OF OBAMA'S GREEN ENERGY DELUSIONS

Archway Publishing It is difficult to find an area of public policy more plagued by misunderstanding than energy policy. Even worse, every time the subject is raised, we are obligated to get mired in pointless arguments about the weather. This book helps set the record straight. Not convinced? Consider some of these inconvenient truths: The cost of 'green energy' climate remediation is anywhere from 10-to-1,000 times greater than the damage from the climate change it attempts to alleviate. Germany, the world's leader in solar energy, will spend more than \$280 billion by 2030 on solar subsidies. But all of that investment will only forestall 22nd century global warming by 37 hours. Obama's carbon tax would cost Americans \$1.2 trillion over just ten years. But it would only reduce the midrange 3 degree modeled 22nd century global temperature increase by 0.038 degrees Celsius. At their current emissions growth rate, it will take China nine months to replace the entire U.S. emissions cut that Obama wants to achieve over seven years, at a staggering cost in American jobs and lost economic growth. The U.S. biofuel program imposes a cost on consumers 9,862 times greater than any climate benefit they or their distant progeny will ever derive. This is not another skeptical global warming polemic but an economic evaluation of how and why green energy will fail. The world has too many pressing needs. For the money Obama squandered on just a single bankrupt crony solar company, the U.S. could have prevented 300,000 childhood malaria deaths in poor countries. A thoroughly researched, heavily documented book by an expert in his field, it will demonstrate in meticulous detail how wasteful and economically inefficient Obama's 'green energy' dead end future will be compared to other worthy alternatives. It's time to end the hysterical climate cynicism and get on humanity's side.
