It directly addresses the needs of Chinese learners and takes full account of their first language in helping them understand how English works by systematically requiring them to think about grammar, and to come up with their own hypotheses about how it works on the basis of the given data. The book is designed for students' learning on their own as well as in a classroom. Each chapter is accompanied by a separate 'students' notes', which the students can consult after working through all the data and exercises in each chapter, to check their own answers and to read further explanations on the grammatical points in question. This book therefore appeals to the growing number of students learning through self-access, as well as promotes independent learning among those enrolled in

educational institutions. Key features: - Directly addresses the needs of Chinese learners of English - Concise, user-friendly grammar presentations followed by examples of correct use - Innovative exercises offering learners in-depth practice of key grammar points - Detailed students' notes section and a full answer key for easy reference - Suitable for use in class, or for self-study

AWS A5. 1/A5. 1M-2012, Specification for Carbon Steel Electrodes for Shielded Metal Arc Welding This specification establishes the requirements for classification of carbon steel electrodes for shielded metal arc welding. The requirements include mechanical properties of weld metal, weld metal soundness, and usability of electrode. Requirements for composition of the weld metal, moisture content of low-hydrogen electrode coverings, standard sizes and lengths, marking, manufacturing, and packaging are all included. A guide to the use of the standard is included in an annex. Optional supplemental requirements include improved toughness and ductility, lower moisture contents, and diffusible hydrogen limits. This specification makes use of both U.S. Customary Units and the International System of Units (SI). Since these are not equivalent, each system must be used independently of the other.

Transforming Learning and Teaching Heuristics for Educative and Responsible Practices *BRILL* This book consists of 19 chapters on heuristics - reflexive tools, designed to heighten awareness of actions and catalyze desired changes. Thirty-three heuristics address six foci: teaching and
