RESOURCES IN EDUCATION

CRC HANDBOOK OF MEDICINAL SPICES

CRC Press "Let food be your medicine, medicine your food."-Hippocrates, 2400 B.C.When the "Father of Medicine" uttered those famous words, spices were as important for medicine, embalming, preserving food, and masking bad odors as they were for more mundane culinary matters. Author James A. Duke predicts that spices such as capsicum, cinnamon, garlic, ginger

MALABAR MANUAL BY WILLIAM LOGAN

VICTORIA INSTITUTIONS, Aaradhana, DEVERKOVIL 673508 India
www.victoriainstitutions.com Commentary William Logan's Malabar is popularly known as 'Malabar Manual'. It is a huge book of more than 500,000 words. It might not be possible for a casual reader to imbibe all the minute bits of information from this book. However, in this commentary of mine, I have tried to insert a lot of such bits and pieces of information, by directly quoting the lines from 'Malabar'. On these quoted lines, I have built up a lot of arguments, and also added a lot of explanations and interpretations. I do think that it is much easy to go through my Commentary than to read the whole of William Logan's book 'Malabar'. However, the book, Malabar, contains much more items, than what this Commentary can aspire to contain. This book, Malabar, will give very detailed information on how a small group of native-Englishmen built up a great nation, by joining up extremely minute bits of barbarian and semi-barbarian geopolitical areas in the South Asian Subcontinent.

BAD BUG BOOK

FOODBORNE PATHOGENIC MICROORGANISMS AND NATURAL TOXINS HANDBOOK

Createspace Independent Publishing Platform The Bad Bug Book 2nd Edition, released in 2012, provides current information about the major known agents that cause foodborne illness. Each chapter in this book is about a pathogen—a bacterium, virus, or parasite—or a natural toxin that can contaminate food and cause illness. The book contains scientific and technical information about the major pathogens that cause these kinds of illnesses. A separate “consumer box” in each chapter provides non-technical information, in everyday language. The boxes describe

plainly what can make you sick and, more important, how to prevent it. The information provided in this handbook is abbreviated and general in nature, and is intended for practical use. It is not intended to be a comprehensive scientific or clinical reference. The *Bad Bug Book* is published by the Center for Food Safety and Applied Nutrition (CFSAN) of the Food and Drug Administration (FDA), U.S. Department of Health and Human Services.

PINCH OF NOM

100 SLIMMING, HOME-STYLE RECIPES

Pan Macmillan THE #1 FASTEST SELLING NON-FICTION BOOK IN THE UK Slimming food has never tasted so good; the must-have first cookbook from the UK's most visited food blog. Sharing delicious home-style recipes with a hugely engaged online community, Pinch of Nom has helped millions of people to cook well and lose weight. The Pinch of Nom cookbook can help novice and experienced home cooks enjoy exciting, flavourful and satisfying meals. Accessible to everyone by not including diet points, all of these recipes are compatible with the principles of the UK's most popular diet programmes. There are a hundred incredible recipes in the book, thirty-three of which are vegetarian. Each recipe has been tried and tested by twenty Pinch of Nom community members to ensure it is healthy, full of flavour and incredibly easy to make. Whether it's Cumberland Pie, Mediterranean Chicken Orzo, Mexican Chilli Beef or Chicken Balti, this food is so good you'll never guess the calorie count. This book does not include 'values' from mainstream diet programmes as these are everchanging. Instead the recipes are labelled with helpful icons to guide you towards the ones that suit you best – whether you're looking for something veggie, fancy a fakeaway, want to feed a family of four or have limited time to spare. Kate Allinson and Kay Featherstone owned a restaurant together in The Wirral, where Kate was head chef. Together they created the Pinch of Nom blog with the aim of teaching people how to cook. They began sharing healthy, slimming recipes and today Pinch of Nom is the UK's most visited food blog with an active and engaged online community of over 1.5 million followers. Showing that dieting should never be a barrier to good food, Pinch of Nom is the go-to home cookbook for mouthwatering meals that tick all the boxes.

DUKE'S HANDBOOK OF MEDICINAL PLANTS OF LATIN AMERICA

CRC Press Finalist for 2009 The Council on Botanical & Horticultural Libraries Literature Award! A Comprehensive Guide Addressing Safety, Efficacy, and Suitability About a quarter of all the medicines we use come from rainforest plants and more than 1,400 varieties of tropical plants are being investigated as potential cures for cancer. Curare comes from a tropical vine and quinine from the cinchona tree. A comprehensive guide to safety, efficacy, and suitability, Duke's Handbook of Medicinal Plants of Latin America responds to continuing interest in medicinal plants and the potential remedies they contain. Determine Which Species Can Be Used for Specific Targets The author of Green Pharmacy Herbal Handbook and CRC Handbook of Medicinal Herbs, James A. Duke covers roughly 500 of the more important Native

Latin American medicinal plants in a highly organized format. After a brief introduction, each entry contains scientific and colloquial names, synonyms, reference to illustrations, notes, biological activities, medicinal indications, dosages, potential hazards, extracts, and references. This format supplies a starting point for determining which species can be used for specific targets. *Better Data Helps You Focus Your Search Year-round moderate temperatures, abundant rainfall, and rich soils make tropical Latin America home to nearly 100,000 of the world's 300,000 known species of plants, and therefore home to untold numbers of potential cures. Focusing on 500 of the most well-known and well-studied plants, this book helps you focus your search for ammunition against constantly evolving pathogens and newly emerging diseases.*

WHO GUIDELINES FOR INDOOR AIR QUALITY

SELECTED POLLUTANTS

World Health Organization This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.
