LOVING CHE

Open Road + Grove/Atlantic *In this “evocative first novel,” an elderly woman looks back on the world of revolutionary Cuba as she recalls her intimate, secret love affair with Ernesto “Che” Guevara (Publishers Weekly). A young Cuban woman has been searching in vain for details of her birth mother. All she knows of her past is that her grandfather fled the turbulent Havana of the 1960s for Miami with her in tow, and that pinned to her sweater—possibly by her mother—were a few treasured lines of a Pablo Neruda poem. These facts remain her only tenuous links to her history, until a mysterious parcel arrives in the mail. Inside the soft, worn box are layers of writings and photographs. Fitting these pieces together with insights she gleans from several trips back to Havana, the daughter reconstructs a life of her mother, her youthful affair with the dashing, charismatic Che Guevara and the child she bore by the enigmatic rebel. Loving Che is a brilliant recapturing of revolutionary Cuba, the changing social mores, the hopes and disappointments, the excitement and terror of the times. It is also an erotic fantasy, a glimpse into the private life of a mythic public figure, and an exquisitely crafted meditation on memory, history, and storytelling. Finally, Loving Che is a triumphant unveiling of how the stories we tell about others ultimately become the story of ourselves. “A moving novel from a writer to watch.” —Publishers Weekly “Inventive and hypnotic . . . [An] artful and restless examination of the exile soul.” —Los Angeles Times “[Menendez] captures Cuba’s potential, its desperation and decay, and also its dark humor.” —The New York Times “The writing is consistently beautiful. Highly recommended.” —Library Journal*

DEVELOPING INTELLIGENT AGENT SYSTEMS

A PRACTICAL GUIDE

John Wiley & Sons Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. FOR BETTER OR FOR WORSE? COLLABORATIVE COUPLES IN THE SCIENCES

Springer Science & Business Media In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.

LEARNING-DRIVEN SCHOOLS

A PRACTICAL GUIDE FOR TEACHERS AND PRINCIPALS

The book includes * An overview of the research on knowledge retention; * Real-life samples of lesson plans that address state and local standards; * Strategies on accurately assessing student learning; * Advice for teachers on addressing the needs of struggling, intermediate, and advanced students at the same time; and * Advice for administrators on conducting effective classroom observations. A rallying cry and how-to guide rolled into one, this book is an invaluable resource for anyone passionate about learning. Covering titles as diverse as *Car Wash* and *Apocalypse Now*, *Le Samourai* and *Stalker*, *Shaft* and *Citizen Kane* each entry outlines the film's distinctive contribution to the hitherto underexplored world of sound in cinema. The author guides the reader through an alternative cinema canon of the 'ear' of sonically exciting and remarkable films from all across the world and their amazing diversity of purpose and effect. This guide shows how most critics completely underestimate the significance of sound and how it is caught between the two irreconcilable forces of the 'sound track' and sound design. In his introduction and analysis (or more accurately 'hearing') of 100 films, the author compels the reader to 'listen not look' and to 'think with their ears'. *100 Film Scores and Sound Design* is a provocative and absorbing guide to some of the most exciting uses of sound in popular and international cinema.
