Hipertensi

PENERBIT KBM INDONESIA Hipertensi adalah penyakit tidak menular yang cukup berbahaya karena tidak menimbulkan gejala yang spesifik dan secara fisik. Banyak penderita hipertensi yang baru saja menyadari hipertensinya pada 5 tahun terakhir dan didagnosis pada kejadian layanan darurat. Sebagian besar penderita hipertensi tidak rutin mengecek tekanan darahnya walaupun sudah mengetahui komplikasinya secara mendasar. Begitu juga dengan kepatuhan minum obat, banyak penderita hipertensi yang tidak patuh dalam minum obat karena hanya meminum obat disaat timbul gejala. Hal ini menunjukkan kurangnya pemahaman penderita hipertensi terhadap penyakitnya. Penyakit tidak menular atau dikenal dengan New Communicable Diseases merupakan penyebab utama kematian diseluruh dunia. Penyakit tidak menular membunuh lebih banyak orang setiap tahun dibandingkan dengan gabungan semua penyebab kematian lainnya. Hipertensi merupakan penyakit tidak menular, penyakit degeneratif ini banyak terjadi dan mempunyai tingkat mortalitas yang cukup tinggi serta mempengaruhi kualitas hidup dan produktifitas seseorang. Hipertensi sering diberi gelar The Silent Killer karena penyakit ini merupakan pembunuh tersembunyi. Kualitas hidup sebagai sebuah konsep multidimensional yang meliputi dimensi fisik, sosial, psikologis yang berhubungan dengan penyakit dan terapi. Banyak faktor yang mempengaruhi kualitas hidup seperti faktor kesehatan, ekonomi, lingkungan, keagamaan dan lainnya. Perubahan gaya hidup juga telah menyebabkan peningkatan kasus-kasus penyakit tidak menular di Indonesia, termasuk hipertensi serta faktor psikologis telah diyakini mempunyai pengaruh jangka panjang terhadap peningkatan tekanan darah.

Unika Atma Jaya Peduli Mentawai Kondisi Kesehatan Kecamatan Siberut Selatan, Kepulauan Mentawai, Indonesia 2015 - 2018

Penerbit Universitas Katolik Indonesia Atma Jaya kepulauan Mentawai merupakan salah satu kabupaten di Negara Kepulauan Republik Indonesia yang berada di sisi paling barat Pulau Sumatra. Selain itu, Kepulauan Mentawai juga merupakan kabupaten dengan wilayah terluas di provinsi Sumatra Barat. Faktor kondisi geografis tersebut menjadikan pembangunan kesehatan di kabupaten kepulauan Mentawai merupakan tantang tersendiri bagi pemerintah dan masyarakatnya. Buku ini merupakan laporan kegiatan Tim Kesehatan UAJ di kecamatan Siberut Selatan, Kabupaten Kepulauan Mentawai selama empat tahun berturut-turut yakni tahun 2015 sampai dengan 2018 yang secara komprehensif memberikan gambaran dan informasi yang akurat mengenai kondisi kesehatan masyarakat di daerah tersebut yang mencakup enam bidang kesehatan, antara lain: 1. Kesehatan Remaja dan Reproduksi 2. Kesehatan Ibu dan Anak 3. Kesehatan Dewasa dan Lansia, 4. Perilaku Hidup Bersih dan Sehat, 5. Penyakit Infeksi, 6. Tanggap darurat bencana

Hypertension in the Elderly

Springer Science & Business Media A comprehensive review of all aspects of hypertension in the elderly using the most current clinical data. Topics range from basic concepts, epidemiology and trials, and evaluation and management, to pharmacologic treatment, special populations, and adherence, all presented with an emphasis on the optimal management of patients. The authors examine in detail the mechanisms of hypertension in the elderly, the lifestyle trials and outcomes trials that were conducted in older persons, as well as the problems of clinical evaluation, secondary hypertension, adherence, and target organ damage. Extensive discussions of pharmacologic therapy detail the role of all the major drug classes.

The Blood Pressure Cure

8 Weeks to Lower Blood Pressure without Prescription Drugs

Wiley "The book is exceptional in its clarity and depth. I would recommend it to anyone with a tendency to hypertension." —Charles Keenan Jr., M.D., Associate Professor of Family Practice, UCLA "Hypertension is an important member of the

quartet of risk factors for cardiovascular disease--the other three are elevated cholesterol levels, diabetes, and cigarette smoking. Robert Kowalski endeavors to bring all these risk factors under control without resorting to medications. This book presents simple answers to the questions that arise when people take charge of their own health in partnership with their physician." —Calvin Ezrin, M.D., author of *Your Fat Can Make You Thin* "The Blood Pressure Cure offers a comprehensive, nutritionally sound, and easily accessible guide to lowering one's blood pressure safely and effectively." —Kristen Caron, M.A., M.F.T., author of *The Everyday Meal Planner for Type 2 Diabetes* "Robert Kowalski is now doing for blood pressure what he did for cholesterol in his previous books--he is revolutionizing the way we think about the non-pharmaceutical treatment of this important risk factor for heart disease. This well-written, concise book is a must-read for every person suffering from or treating high blood pressure." —Paul Dougherty, M.D., Professor of Medicine, UCLA Robert Kowalski, the bestselling author of *The 8-Week Cholesterol Cure*, presents a clinically proven program that draws on the very latest research on high blood pressure causes, development, and treatment. With the most up-to-date information on herbs, supplements, diet, physical activity, and more, this commonsense, easy-to-follow program can help you lower your blood pressure so that you can decrease your risk of heart attack and stroke—and increase your chances of living a long and healthy life.

Mayo Clinic A to Z Health Guide

Everything You Need to Know About Signs, Symptoms, Diagnosis, Treatment and Prevention

Time Home Entertainment *The best weapon against any condition is knowledge. Learn from the experts in Mayo Clinic's complete guide to identifying, treating, and preventing a broad range of common medical issues.*

Inside you'll find:

- Easy-to-understand explanations of more than 100 health conditions
- Comprehensive lists of frequent signs and symptoms
- Professional insight on tests and procedures used to make a diagnosis
- Essential advice on treatments, including commonly used medications
- Up-to-date prevention guidelines for illnesses that may affect your quality of life

Featuring clear illustrations and accessible writing, *Mayo Clinic A to Z Health Guide* is

a must-have health resource for every home.

Hypertension Control

Report of a WHO Expert Committee

A state-of-the-art review of research findings that contribute to an understanding of hypertension and the best measures for its prevention and control, whether in individual patients or entire populations. Noting that elevated blood pressure is a massive health problem in almost every country, the report argues that programs for hypertension control should be an integral part of all national health care systems. With this goal in mind, the report aims to help policy makers appreciate the significance and complexities of hypertension, understand the options available for control and then select the most appropriate mix of interventions. Details range from recommended procedures for obtaining an accurate assessment of blood pressure through advice on the best drugs for first-line treatment of hypertensive patients to a discussion of ways to educate populations about relevant lifestyle changes. Throughout the report, population-based and individual approaches are presented as complementary, synergistic strategies for hypertension control. To assist physicians as well as policy makers, the report includes abundant recommendations based on the best scientific evidence for the management of different patient groups. A section on the clinical assessment of the hypertensive patient explains the components of a coherent step-wise diagnostic process involving history taking, physical examination and laboratory investigation. Included are an assessment of the most suitable drugs for first-line treatment and guidelines for developing management plans for mild hypertension, moderate and severe hypertension, resistant hypertension and hypertensive emergencies. In view of the need to assure that scarce resources are invested wisely, the report also discusses and compares the cost-effectiveness of different management strategies.

Living with Environmental Change

Social Vulnerability, Adaptation and Resilience in Vietnam

Routledge Vietnam and the neighbouring countries of Southeast Asia face diverse challenges created by the rapid evolution of their social, economic and environmental systems and resources. Taking a multidisciplinary perspective, this book provides a comprehensive assessment of the Vietnamese situation, identifying the factors shaping social vulnerability and resilience to environmental change and considering prospects for sustainable development.

Principles and Practice of Geriatric Sleep Medicine

Cambridge University Press Sleep disorders cause considerable morbidity and distress in the aging population. By highlighting the clinical diagnosis and management of sleep disorders, this volume provides a valuable resource for all those involved in health care of older individuals. The changes in sleep patterns that occur during normal aging are described, followed by authoritative chapters on the presentation of various age-related sleep disorders. The book deals with the range of therapeutic measures available for managing these disorders and gives insight to potential areas of research that have emerged in the last few years, such as the study of circadian rhythms in later life, sleep patterns associated with co-morbidities and the use of quality-of-life measurement tools to determine sleep quality as we age. This volume is relevant to sleep disorders specialists, psychiatrists, geriatricians and gerontologists, and any professionals and researchers working in the interdisciplinary areas of sleep and aging.

Mayo Clinic Internal Medicine Board Review Questions and Answers

Oxford University Press Companion volume to: Mayo Clinic internal medicine board review. 10th ed. c2013.

Home Blood Pressure Monitoring

Springer Nature Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

Pharmaceutical Practice

This edition of Pharmaceutical Practice replaces the 12th edition of Cooper and Gunn's Dispensing for Pharmaceutical Students and has a redesigned and updated content. Written by specialists in pharmacy education and practice it aims to provide

a sound base for all aspects of the work.

Aris 2007

ScriptaWeb

Kaplan's Clinical Hypertension

Lippincott Williams & Wilkins Listed as the #1 reference book for hypertension by the American Society for Hypertension in 2006, this new edition presents up-to-date, practical, evidence-based recommendations for treatment and prevention of all forms of hypertension.

Textbook of Stroke Medicine

Cambridge University Press This concise and informative textbook is aimed at trainee doctors beginning work on a stroke unit or residents embarking on their postdoctoral training in stroke care. It has a practical approach covering all important issues of prevention, diagnosis and treatment of cerebrovascular diseases. Chapters on the basics of neuropathology and pathophysiology are followed by reviews of clinical issues, including neuroimaging, clinical assessment, diagnosis and treatment, stroke in the young, and stroke-related dementia. Topics of rising importance are covered in chapters on stroke unit management, monitoring and management of complications including infections, recommendations for thrombolysis, interventions and neurosurgical procedures, and clear and balanced recommendations for secondary prevention. Finally, neuropsychological syndromes are explained and an up-to-date view on neurorehabilitation is presented. The authors are all experts in their field and many of them teach on the European Master's Program on Stroke Medicine, which is supported and endorsed by the European Stroke Organization.

Nutrition Made Incredibly Easy

Lippincott Williams & Wilkins Using the award-winning *Incredibly Easy!* style, *Nutrition Made Incredibly Easy! Second Edition* presents essential information on nutrition in a light-hearted and appetizing way. Coverage includes the physiologic processes that transform food into energy, nutrient metabolism and recommended allowances, assessment of nutritional status, and the needs of special patient populations. This edition incorporates the Dietary Guidelines for Americans 2005, presents up-to-date information on diabetes, and includes new appendices on fad diets and commonly used herbs and supplements. Logos include Lifespan Lunchbox (age-related considerations); Bridging the Gap (cultural considerations), Menu Maven (sample menus), and NutriTips (nutritional pointers).

Nutritional Assessment

A Laboratory Manual

New York : Oxford University Press This guide to practical dietary, anthropometric, and biochemical nutritional assessment introduces students to the details of standardized protocols while emphasizing the importance of rigorous methodologies. Each receives a comprehensive practical treatment which includes an overview of its relative advantages, limitations, and applicability. Topics include quantitative and qualitative dietary methods and the evaluation of nutrient intakes; the assessment of growth, fat-free mass, and body fat; and the evaluation of anthropometric measurements and reference data from national surveys. Chapters on biochemical assessment deal with specific group nutrients, outlining methods selected for their appropriateness for undergraduate students with limited practical laboratory experience. Interpretive criteria for evaluating the biochemical measurements are included at the end of each method's exposition. This book will be of great use and interest to students studying nutritional assessment in dietetics, home economics, nutritional sciences, public health, and nursing, as well as to health professionals involved in nutritional assessment.

Global Status Report on

Noncommunicable Diseases 2014

This global status report on prevention and control of NCDs (2014), is framed around the nine voluntary global targets. The report provides data on the current situation, identifying bottlenecks as well as opportunities and priority actions for attaining the targets. The 2010 baseline estimates on NCD mortality and risk factors are provided so that countries can report on progress, starting in 2015. In addition, the report also provides the latest available estimates on NCD mortality (2012) and risk factors, 2010-2012. All ministries of health need to set national NCD targets and lead the development and implementation of policies and interventions to attain them. There is no single pathway to attain NCD targets that fits all countries, as they are at different points in their progress in the prevention and control of NCDs and at different levels of socioeconomic development. However all countries can benefit from the comprehensive response to attaining the voluntary global targets presented in this report.--Publisher description.

Hypertension Primer

Lippincott Williams & Wilkins Now in its thoroughly updated Fourth Edition, the Hypertension Primer is a comprehensive, readable source of state-of-the-art scientific and clinical information on hypertension. The book contains 171 short chapters by distinguished experts that cover every aspect of hypertension and its

pathogenesis, epidemiology, impact, and management. Highlights of this edition include updated JNC 7 findings regarding special population therapy and clinical management. Chapters are grouped into three well-organized sections—basic science, population science, and clinical management—and each chapter is cross-referenced to other relevant chapters. Each chapter is easily digestible and begins with a bulleted list of key points.

Hypertension in the Elderly

Springer As the life expectancy of patients with arterial hypertension increases, hypertension in the elderly is becoming a relevant medical and social problem. Indeed, epidemiological trials have shown that the cardiovascular risk in elderly hypertensives is significantly higher than in normotensive subjects of comparable age. However, many characteristics of hypertension in the elderly, such as the haemodynamic pattern, do differ greatly from those of younger hypertensives and therefore the results obtained in younger patients cannot be extrapolated to older hypertensives. In this book, experts on hypertension have examined different aspects of hypertension in the elderly: from the changes in the cardiovascular system associated with ageing, to the role of ambulatory blood pressure measurement in the diagnosis of hypertension and the results of the recent clinical trials into the efficacy and tolerability of antihypertensive drugs. This book covers all the clinical aspects of hypertension in the elderly in such a way that it will become a valuable tool for medical students, general practitioners and specialists in hypertension alike.

Obesity Prevention and Treatment

A Practical Guide

CRC Press The World Health Organization estimates that there are 2.1 billion individuals with obesity globally. Nearly three quarters of adults in the United States are overweight or obese. The average individual with obesity cuts ten years off their life expectancy, yet less than 40% of physicians routinely counsel individuals concerning the adverse health consequences of obesity. Obesity Prevention and Treatment: A Practical Guide equips healthcare practitioners to include effective weight management counselling in the daily practice of medicine. Written by lifestyle medicine pioneer and cardiologist, Dr. James Rippe and obesity expert Dr. John Foreyt, this book provides evidence-based discussions of obesity and its metabolic consequences. A volume in the Lifestyle Medicine Series, it provides evidence-based information about the prevention and treatment of obesity through lifestyle measures, such as regular physical activity and sound nutrition, as well as the use of new medications or bariatric surgery available to assist in weight management. Provides a framework and practical strategies to assist practitioners in safe and effective treatments of obesity. Contains information explaining the relationship between obesity and increased risk of heart disease, diabetes, cancer, osteoarthritis,

and other chronic conditions. Chapters begin with bulleted key points and conclude with a list of Clinical Applications. Written for practitioners at all levels, this user-friendly, evidence-based book on obesity prevention and treatment will be valuable to practitioners in general medicine or subspecialty practices.

Study Guide to Accompany Nursing Research

Principles and Methods

This study guide accompanies Nursing Research, 7th edition - a comprehensive nursing research textbook which continues the expansion of coverage on qualitative research, including important issues for specific qualitative traditions such as ground theory, phenomenology and ethnography.

Global Status Report on Noncommunicable Diseases 2010 (RUSSIAN).

Wild Life

Houghton Mifflin Harcourt *When mother of five Charlotte Bridger Drummond becomes lost in the Great Northwest Woods, she is rescued by an elusive group of quasi-human beasts that force her to examine her previous notions about the differences between animals and humans, men and women, and wilderness and civilization. Reprint. 25,000 first printing.*

Mini Nutritional Assessment (MNA)

Research and Practice in the Elderly

Karger Medical and Scientific Publishers *This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-*

energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly.

Hypertension in Postmenopausal Women

Springer Science & Business Media On the occasion of the symposium on Hypertension in Postmenopausal Women (Monte Carlo, January 19-22, 1994), international scientists and clinicians discussed the various aspects of high blood pressure in older women. This volume presents an overview of this important aspect of both cardiology and gynecology. Special emphasis is given to the different approaches to antihypertension treatment.

Psychodrama

A Beginner's Guide

Jessica Kingsley Publishers This accessible, fully illustrated beginner's guide to psychodrama explains the basics of this active form of group psychotherapy in which individuals' experiences and emotions are explored on stage in a safe, stimulating and non-judgemental environment. The authors introduce psychodrama theory and practice and provide explanations of key terms, descriptions of the range of psychodrama techniques, and a step-by-step guide to running a psychodrama session. Psychodrama is ideal for students and professionals, whether as a fun introduction, or as an opportunity to brush up on the basics.

Fundamentals of Nursing

Lww Packed with clinical examples, proven pedagogy, striking illustrations and online learning tools, this best-selling text takes a holistic approach as it distills the fundamentals that nursing students need to know to respond today's healthcare challenges competently, enthusiastically and accountably.

Hypertension

Evaluation and Treatment

Lippincott Williams & Wilkins

Physical Activity and Health

The Evidence Explained

Taylor & Francis *Physical Activity and Health* explains clearly, systematically and in detail the relationships between physical activity, health and disease, and explores the benefits of exercise in the prevention and treatment of health conditions such as cardiovascular disease, diabetes, obesity, osteoporosis, and cancer.

Gerontologic Nursing

Mosby Incorporated *GERONTOLOGIC NURSING* provides comprehensive coverage of health promotion, gerontologic concepts and issues, and medical-surgical problems associated with the older adult. Divided into seven parts, each chapter follows a consistent organization including learning objectives, emergency boxes, client and family teaching boxes, research boxes, key points, special insights, and new health promotion and nutrition boxes. The second edition also includes a new chapter on health promotion, expanded chapters on nutrition and functional assessment, and a dedicated MERLIN which provides the student and instructor with additional up-to-date tools and resources to enhance and expand their content knowledge. Highlights fundamental aging theories to provide a basis for biological and psychosocial aspects of quality nursing care. Provides complete and comprehensive coverage of assessment recapping normal, deviations from normal and abnormal findings. Uses a 5-step nursing process format to provide the consistent framework for presentation of nursing care. Features care plans with clinical situations for those disorders most prevalent in the elderly. Includes a separate chapter on cultural influences and integrates cultural awareness boxes throughout to focus on specific customs related to how a nurse might care for the aging client. Includes separate chapters focusing on acute, home and long term care to provide a complete discussion of care in each of these settings. Provides detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse to explain potentially complex aspects of aging and the related care. Provides a consistent chapter pedagogy including learning objectives, summary, key points, and critical thinking exercises. Includes Client/Family teaching boxes that emphasize key aspects of practice and teaching for self-care. Highlights Home Care Tips Boxes to promote practical, effective care for the home-bound older client. Integrates Insight boxes that provide realistic vignettes on caring for the elderly and helpful hints from today's practicing gerontological nurses. Provides Emergency Treatment boxes that alert the student to danger signs and list immediate interventions. Includes research boxes with abstracts of current research and implications for practice. Provides a nuts-and-bolts guide to blood-product administration for adult and pediatric patients. Outlines and

explains transfusion reactions. Describes the effect of different types of fluids used in resuscitation. Includes formulas used in fluid administration. Provides the most up-to-date information about oxygen delivery devices. Presents information on how to help a Spanish-speaking child identify his/her level of pain. Includes the pediatric coma scale. Features the pediatric trauma score which is used to help evaluate the severity of injury. Provides information about domestic violence in the Mental Health Conditions chapter. Includes a section on the role of the Sexual Assault Nurse Examiner (SANE) and the latest findings on sexual assault. Presents additional information on mammalian bites and anaphylactic shock. Highlights major points of care for quick reference with bold or italicized text. Presents pediatric and adult content separately in the reference section of the book for fast and easy access. Includes stroke and hypothermia algorithms. Covers the latest information on conscious sedation according to JCAHO standards, including a table on deep sedation. Features several new and updated tables which include the following information: conversion of Centigrade and Fahrenheit, updated normal lab values, updated medication tables, etc. (Includes a FREE MERLIN website at: www.harcourthealth.com/MERLIN/Lueckenotte/)

Introduction to Health Behavior Theory

Jones & Bartlett Learning Health Behavior, Education, & Promotion

Spirituality, Health, and Healing: An Integrative Approach

Jones & Bartlett Publishers "Spiritual, Health, and Healing: An Integrative Approach, Second Edition offers healthcare professionals, instructors, and spiritual care providers a comprehensive guide to the most current research on the connection between spiritual practice and health. This updated Second Edition includes new sections on integral spirituality and the New Thought Movement; healing rituals and healing environments; plus new information on spirituality and aging, caring for the elderly, and spiritual hospice."--Résumé de l'éditeur.

ALAT ANALISIS DATA

Aplikasi Statistik untuk Penelitian Bidang Ekonomi dan Sosial

Buku ini berusaha memenuhi kondisi ideal penggunaan statistik dalam penelitian secara menyeluruh, dimana seluruh alat uji statistik dan contoh kasus pengujian,

sedapat mungkin disajikan secara lengkap dan menyeluruh. Hal inilah yang membuat buku ini memiliki kelebihan. Selain itu, buku ini juga meminimalisir penulisan rumus dan formula matematik sehingga statistik terlihat lebih mudah dan aplikatif.

From Hypertension to Heart Failure

Springer Science & Business Media Arterial hypertension, coronary heart disease and heart failure are the commonest cardiovascular conditions to present in clinical practice. Over the past few years it has become increasingly clear that they are closely and causally interrelated and that their relationship can have a significant bearing on prognosis. Epidemiological studies have shown that arterial hypertension is one of the most important risk factors for developing heart failure. Only one in four patients with hypertension is adequately managed, and in 50% of cases, the hypertension has not been recognised or treated. Patients with pre-existing hypertension who go on to suffer an acute myocardial infarction have usually not previously had typical angina symptoms, the infarct territory is larger, life threatening arrhythmias are commoner and hence in-hospital mortality and long-term prognosis are markedly worse. The presence of raised blood pressure in the post-infarct phase doubles the risk of manifest heart failure. The close relationship between hypertension, coronary heart disease and heart failure makes the choice of therapeutic strategy particularly important. Agents and classes of agents that have prognostic value in all three conditions should be considered first, as synergy might result in additional benefits. In such patients, this sort of therapeutic decision-making might have further advantages. The use of these agents may prevent complications which are not yet clinically obvious (such as heart failure).

ABC of Nutrition

John Wiley & Sons This well established ABC has been updated with new charts, illustrations and guidelines on aspects of nutrition which affect heart disease, blood pressure, chronic diseases such as diabetes and some types of cancer. The book also contains the most current nutritional recommendations for pregnancy and infant feeding as well as advice for children and adults young and old. With chapters covering nutritional deficiencies in both developing and affluent countries as well as eating disorders and obesity, this latest edition has worldwide relevance.

The Heart of Africa

Clinical Profile of an Evolving Burden of Heart Disease in Africa

John Wiley & Sons While many high-income countries observe a relative decline in the population impact of heart disease and deal with the problem of an older patient

population who readily survive earlier non-fatal encounters with the condition, Africa contends with a typically younger population with frequently advanced and often fatal heart disease. While high-income countries exclusively deal with non-communicable forms of heart disease, Africa contends with both communicable and non-communicable forms of heart disease. Designed to provide anyone with an interest in heart disease in Africa with an immediate sense of how the area is progressing from a clinical to research perspective in responding to this evolving epidemic Presents salient research uncovering the evolving burden of communicable and non-communicable forms of heart disease, Includes content on maternal heart disease, infant and childhood heart disease, risk and prevention, heart failure and other common forms of heart disease in rural and urban communities in Africa.

International Dietetics and Nutrition Terminology (IDNT) Reference Manual

Standardized Language for the Nutrition Care Process

Guide for nutrition professionals to implement the four steps of the Nutrition Care Process: assessment, diagnosis, intervention, and monitoring and evaluation.

Birthing Outside the System

The Canary in the Coal Mine

This book investigates why women choose 'birth outside the system' and makes connections between women's right to choose where they birth and violations of human rights within maternity care systems. Choosing to birth at home can force women out of mainstream maternity care, despite research supporting the safety of this option for low-risk women attended by midwives. When homebirth is not supported as a birthplace option, women will defy mainstream medical advice, and if a midwife is not available, choose either an unregulated careprovider or birth without assistance. This book examines the circumstances and drivers behind why women nevertheless choose homebirth by bringing legal and ethical perspectives together with the latest research on high-risk homebirth (breech and twin births), freebirth, birth with unregulated careproviders and the oppression of midwives who support unorthodox choices. Stories from women who have pursued alternatives in Australia, Europe, Russia, the UK, the US, Canada, the Middle East and India are woven through the research. Insight and practical strategies are shared by doctors,

midwives, lawyers, anthropologists, sociologists and psychologists on how to manage the tension between professional obligations and women's right to bodily autonomy. This book, the first of its kind, is an important contribution to considerations of place of birth and human rights in childbirth.

The Queen's Gambit

Penguin *The national bestselling author of The Sword, The Ring and The Chalice returns the royal court intrigue, the castle secrets, and the crown scandals of her acclaimed trilogy. The throne was her destiny, until Princess Pheresa lost her groom, Mandria's heir, to the dark magic that consumed him. Now Pheresa's fate is uncertain, even when the great King Verence names her Princess Royal, because the title comes with one condition: She must take Lervan, a man of acceptable birth and rank, as her husband. Reluctantly, she agrees. Then, without warning, the old king dies. And Pheresa succeeds to the throne. But all is not well. Many fear that Pheresa has been weakened by the evil magic. Her enemies are strong. Her husband plots against her. And her only ally is the last man she would ever choose—and the one man she should never love.*

Family Nursing

Research, Theory & Practice

Pearson *Written for undergraduate/graduate courses in community & family nursing, this popular text teaches a holistic, philosophical approach. The student is guided through generalized concepts & theoretical foundations, reality-based applications, case studies, thorough & updated discussions, assessment, & nursing diagnoses.*
