FELINE INTERNAL MEDICINE SECRETS

Elsevier Health Sciences This book covers the breadth of feline diagnosis and management in the textbook-in-question-and-answer format of **The Secrets Series®**. After years of being treated under the basic medical model of the canine, feline medicine has reached greater prominence in the past few years, and has become a hot topic in veterinary medicine, yielding several successful books. Michael Lappin is one of the major names in modern feline medicine, and he has assembled a cast of contributors featuring many of the major feline authorities in the U.S. Each chapter presents a brief overview of, discusses the diagnostic plan, and then focuses on the key concepts for each topic.

SMALL ANIMAL EMERGENCY AND CRITICAL CARE

CASE STUDIES IN CLIENT COMMUNICATION, MORBIDITY AND MORTALITY

John Wiley & Sons **Small Animal Emergency and Critical Care: Case Studies in Client Communication, Morbidity and Mortality** provides a unique opportunity to learn from real-life case examples. Presented as a collection of short case studies, the book examines a wide range of situations likely to arise in emergency practice. The approach is modeled on the **Morbidity and Mortality Conferences** which were first established as a training and educational tool for medical doctors. They have now been successfully adopted in veterinary medicine as a forum for case review and learning opportunities, encouraging thorough review from different perspectives. Each chapter presents a real case, and highlights the pitfalls that both novice and experienced veterinarians can encounter. A key theme of the book is on communication issues. Owner perspectives are discussed, as well as how communications between clinicians and owners can be optimized to allow veterinarians to better meet owner expectations. The cases were provided by a variety of experienced veterinarians, primarily specialists in veterinary emergency and critical care, as well as other specialties, general practice, universities, and private institutions. This highly readable book is suitable either to absorb from cover to cover, or for reference to a specific case or situation. It highlights a number of common clinical problems and communication issues that either did or may lead to difficulties in case management, helping you to avoid these situations.

PRACTICAL EMERGENCY AND CRITICAL CARE VETERINARY NURSING

STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

100 CASES IN CLINICAL MEDICINE, SECOND EDITION

CRC Press **100 Cases in Clinical Medicine** is an indispensable revision tool for medical students preparing for clinical examinations or OSCEs. Using scenarios which mimic daily life, the cases will interest students in clinical problems and help them develop their clinical reasoning skills, with each case presenting details of a patient's medical history and the key findings of a clinical examination, together with initial investigation results for evaluation. Key questions then prompt the student to evaluate the patient, and reach a decision regarding their condition and the possible management plan, while the answer pages will help the student to understand the processes that a clinician goes through in dealing with the problems presented. Contents are organised to provide a quick review of each body system, with a selection of cases relevant to that specific system, then the majority are presented randomly to mimic real life in a GP surgery or emergency department. New to this edition: a review of each body system as well as random cases; new page design with a second colour used throughout; and brought up-to-date with 25% new cases.

THE EAGLE AND THE DRAGON

GLOBALIZATION AND EUROPEAN DREAMS OF CONQUEST IN CHINA AND AMERICA IN THE SIXTEENTH CENTURY

John Wiley & Sons In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history

and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

THE ENGLISH CONSTITUTION

Createspace Independent Publishing Platform There is a great difficulty in the way of a writer who attempts to sketch a living Constitution-a Constitution that is in actual work and power. The difficulty is that the object is in constant change. An historical writer does not feel this difficulty: he deals only with the past; he can say definitely, the Constitution worked in such and such a manner in the year at which he begins, and in a manner in such and such respects different in the year at which he ends; he begins with a definite point of time and ends with one also. But a contemporary writer who tries to paint what is before him is puzzled and a perplexed: what he sees is changing daily. He must paint it as it stood at some one time, or else he will be putting side by side in his representations things which never were contemporaneous in reality.
