## Perspectives on Philosophy of Management and Business Ethics Including a Special Section on Business and Human Rights

Springer This book presents a selection of articles with focus on the theoretical foundations of business ethics, and in particular on the philosophy of management and on human rights and business. This implies identifying and discussing conflicts as well as agreement with regard to the philosophical and other foundations of business and management. Despite the general interest in corporate social responsibility and business ethics, the contemporary discussion rarely touches upon the normative core and philosophical foundations of business. There is a need to discuss the theoretical basis of business ethics and of business and human rights. Even though the actions and activities of business may be discussed from a moral perspective, not least in the media, the judgments and opinions relating to business and management often lack deeper moral reflection and consistency. Partly for this reason, business ethicists are constantly challenged to provide such moral and philosophical foundations for business ethics and for business and human rights, and to communicate them in an understandable manner. Such a challenge is also of scientific kind. Positions and opinions in the academic field need to be substantiated by thorough moral and theoretical reflection to underpin normative approaches. Far too often, business ethicists may agree on matters, which they approach from different and sometimes irreconcilable philosophical standpoints, resulting in superficial agreement but deeper-lying disagreement. In other cases, it may be of high relevance to identify philosophical standpoints that despite conflicting fundamentals may arrive at conclusions acceptable to everyone.

## The Philosophy of Management

Routledge Taylorism was criticised for its over-simplistic view of what motivated the worker. Oliver Sheldon's theme was that though Taylorism had helped the development of a science of management, such work should not detract from the predominantly human job of the manager to manage. His work prefigures the human relations approach to management theory of Elton Mayo and F. J. Roethlisberger in rejecting the notion that economic incentives largely explain employee behaviour.

## Research Methods for Business Students

Pearson Education Brings the theory, philosophy and techniques of research to life and enables students to understand the relevance of the research methods. This book helps you learn from worked examples and case studies based on real student research, illustrating what to do and what not to do in your project.

## Business Ethics and Continental Philosophy

Cambridge University Press Business ethics has largely been written from the perspective of analytical philosophy with very little attention paid to the work of continental philosophers. Yet although very few of these philosophers directly discuss business ethics, it is clear that their ideas have interesting applications in this field. This innovative textbook shows how the work of continental philosophers - Deleuze and Guattari, Foucault, Levinas, Bauman, Derrida, Levinas, Nietzsche, Zizek, Jonas, Sartre, Heidegger, Latour, Nancy and Sloterdijk - can provide fresh insights into a number of different issues in business ethics. Topics covered include agency, stakeholder theory, organizational culture, organizational justice, moral decision-making, leadership, whistle-blowing, corporate social responsibility, globalization and sustainability. The book includes a number of features designed to aid comprehension, including a detailed glossary of key terms, text boxes explaining key concepts, and a wide range of examples from the world of business.

## Hume, Passion, and Action

Oxford University Press Elizabeth S. Radcliffe presents an original interpretation of David Hume's famous theory of action and motivation, according to which passion and reason cannot be opposed over the direction of action. She argues that according to Hume beliefs cannot move us to action without feeling, and she explores the implications for Hume's theory of morality.

## Immersive Tabletop Theory By: Jason Booth (PDF Version)

### A Philosophy of Terrain Crafting

Immersive Terrain Immersive Tabletop Theory explore the tabletop crafting hobby from a more philosophical angle. The author will walk you through the thought process that he brings to every project. The hope is that this will give the reader the confidence to create and implement their own beautiful terrain projects. We'll explore the thought process of taking a project from concept to tabletop while simultaneously exploring many of the tools and materials crafters use. We'll cover steps to avoid hobby burnout and ways to ensure that our projects are completed efficiently. The goal is to inspire you with the kind of confidence that can make us all better crafters. There are no step-by-step instructions in this book. Nor are there any tutorials. That's what the Immersive Terrain YouTube Channel is for. This book seeks to lay down the foundation that will take a novice with an idea to a pro with some awesome miniature scenery that they can proudly say they made from scratch.

## The British Study Edition of the Urantia Papers Book [eReader PDF]

Tigran Aivazian The British Study Edition of the Urantia Papers is based on the standard SRT text, but uses the metric system and adds a critical apparatus of textual variants and study notes.

## Contemporary Natural Philosophy and Philosophies - Part 2

MDPI Modern technology has eliminated barriers posed by geographic distances between people around the globe, making the world more interdependent. However, in spite of global collaboration within research domains, fragmentation among research fields persists and even escalates. Disintegrated knowledge has become subservient to the competition in the technological and economic race, leading in the direction chosen not by reason and intellect but rather by the preferences of politics and markets. To restore the authority of knowledge in guiding humanity, we have to reconnect its scattered isolated parts and offer an evolving and diverse but shared vision of objective reality connecting the sciences and other knowledge domains and informed by and in communication with ethical and esthetic thinking and being. This collection of articles responds to the second call from the journal Philosophies to build a new, networked world of knowledge with domain specialists from different disciplines interacting and connecting with the rest of the knowledge-producing and knowledge-consuming communities in an inclusive, extended natural-philosophic, human-centric manner. In this process of reconnection, scientific and philosophical investigations enrich each other, with sciences informing philosophies about the best current knowledge of the world, both natural and human-made, while philosophies scrutinize the ontological, epistemological, and methodological foundations of sciences.

## Philosophy of Media

### A Short History of Ideas and Innovations from Socrates to Social Media

Taylor & Francis Since the late-1980s the rise of the Internet and the emergence of the Networked Society have led to a rapid and profound transformation of everyday life. Underpinning this revolution is the computer - a media technology that is capable of not only transforming itself, but almost every other machine and media process that humans have used throughout history. In *Philosophy of Media*, Hassan and Sutherland explore the philosophical and technological trajectory of media from Classical Greece until today, casting a new and revealing light upon the global media condition. Key topics include: the mediation of politics the question of objectivity automata and the metaphor of the machine analogue and digital technological determinism. Laid out in a clear and engaging format, *Philosophy of Media* provides an accessible and comprehensive exploration of the origins of the network society. It is essential reading for students of philosophy, media theory, politics, history and communication studies.

## Philosophy of Syntax

### Foundational Topics

Springer Science & Business Media Since 1970-ties in the theory of syntax of natural language quite a number of competing, incommensurable theoretic frameworks have emerged. Today the lack of a leading paradigm and kaleidoscope of perspectives deprives our general understanding of syntax and its relation to semantics and pragmatics. The present book is an attempt to reestablish the most fundamental ideas and intuitions of syntactic well-formedness within a new general account. The account is not supposed to compete with any of today's syntactic frameworks, but to provide a deeper understanding of why these frameworks succeed or fail when they do and to show a new way for cooperation between logicians and linguists which may lead in future to a unified, yet more specific account.

### “The main Business of natural Philosophy”

## Isaac Newton's Natural-Philosophical Methodology

Springer Science & Business Media In this monograph, Steffen Ducheyne provides a historically detailed and systematically rich explication of Newton's methodology. Throughout the pages of this book, it will be shown that Newton developed a complex natural-philosophical methodology which encompasses procedures to minimize inductive risk during the process of theory formation and which, thereby, surpasses a standard hypothetico-deductive methodological setting. Accordingly, it will be highlighted that the so-called 'Newtonian Revolution' was not restricted to the empirical and theoretical dimensions of science, but applied equally to the methodological dimension of science. Furthermore, it will be documented that Newton's methodology was far from static and that it developed alongside with his scientific work. Attention will be paid not only to the successes of Newton's innovative methodology, but equally to its tensions and limitations. Based on a thorough study of Newton's extant manuscripts, this monograph will address and contextualize, inter alia, Newton's causal realism, his views on action at a distance and space and time, the status of efficient causation in the *Principia*, the different phases of his methodology, his treatment of force and the constituents of the physico-mathematical models in the context of Book I of the *Principia*, the analytic part of the argument for universal gravitation, the meaning and significance of his *regulae philosophandi*, the methodological differences between his mechanical and optical work, and, finally, the interplay between Newton's theology and his natural philosophy.

## Philosophy and Theory of Artificial Intelligence

Springer Science & Business Media Can we make machines that think and act like humans or other natural intelligent agents? The answer to this question depends on how we see ourselves and how we see the machines in question. Classical AI and cognitive science had claimed that cognition is computation, and can thus be reproduced on other computing machines, possibly surpassing the abilities of human intelligence. This consensus has now come under threat and the agenda for the philosophy and theory of AI must be set anew, re-defining the relation between AI and Cognitive Science. We can re-claim the original vision of general AI from the technical AI disciplines; we can reject classical cognitive science and replace it with a new theory (e.g. embodied); or we can try to find new ways to approach AI, for example from neuroscience or from systems theory. To do this, we must go back to the basic questions on computing, cognition and ethics for AI. The 30 papers in this volume provide cutting-edge work from leading researchers that define where we stand and where we should go from here.

## From Chasing Violations to Managing Risks

### Origins, Challenges and Evolutions in Regulatory Inspections

Edward Elgar Publishing Florentin Blanc focuses specifically on regulatory inspections and enforcement, their historical development, contrasted approaches and methods, and their relative effectiveness in achieving regulatory objectives. Inspections aimed at verifying compliance with regulations are one of the most significant activities of modern states in terms of the number of staff employed or of people affected, and one of the most visible ones - but have long remained relatively under-researched, or at least not considered "as such".

## Cultural Translation of Management Philosophy in Asian Companies Its Emergence, Transmission, and Diffusion in the Global Era

Springer Nature This book discusses management philosophy based on case studies in companies in Japan, Korea and China. In an era of increasing globalization and the internet society, it is time for companies to re-examine their mission and existence. Repeated corporate scandals and global environmental issues have revealed the need for CSR (corporate social responsibility) and business ethics. At the same time, cross-cultural conflicts in the workplace highlight the necessity for management to integrate multiple values. In other words, the importance of value in a company has to be reconsidered. This timely book re-evaluates the issue of management philosophy in the context of the global society. It approaches the issue of management philosophy from the perspective of keiei-jinruigaku, the anthropology of business administration, presenting interdisciplinary research consisting of fields such as management studies, anthropology, religious studies and sociology. By focusing on the phenomena of transmission of management philosophy to other areas by cultural translation, the book reveals the dynamic process of the global transmission of management philosophy.

## Philosophy and Engineering: Reflections on Practice, Principles and Process

Springer Science & Business Media Building on the breakthrough text *Philosophy and Engineering: An Emerging Agenda*, this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering, along with a series of critical reflections by engineering practitioners. The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering methods, design and education. The volume is divided into reflections on practice, principles and process, each of which challenges prevalent assumptions and commitments within engineering and philosophy. The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving. Above all, the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides. The chapters in this volume are from a diverse and international body of authors, including philosophers and engineers, and represent a highly select group of papers originally presented in three different conferences. These are the 2008 Workshop on Philosophy and Engineering (WPE-2008) held at the Royal Academy of Engineering; the 2009 meeting of the Society for Philosophy and Technology (SPT-2009) at the University of Twente in the Netherlands; and the Forum on Philosophy, Engineering, and Technology (fPET-2010), held in Golden, Colorado at the Colorado School of Mines.

## Mission and Business Philosophy

Elsevier *Mission and Business Philosophy* discusses the role of a mission in an organization. The book is comprised of seven chapters; each chapter relates mission to an aspect of an organization. The first chapter discusses the findings of the research done by the author, which help explain how a mission plays a central role in organizational management. Chapters 2 to 6 relate the mission statement to the different aspects of an organization, such as motivation, culture, leadership, and ethics. Chapter 7 provides an advice in writing a mission statement. The book will be of great use to individuals, particularly those who are in leadership position.

## History of Philosophy and the Reflective Society

Walter de Gruyter GmbH & Co KG This book is about innovation, reflection and inclusion. Cultural innovation is something real that tops up social and technological innovation by providing the reflective society with spaces of exchange in which citizens engage in the process of sharing their experiences while appropriating common goods content. We are talking of public spaces such as universities, academies, libraries, museums, science-centres, but also of any place in which co-creation activities may occur. The argument starts with the need for new narratives in the history of philosophy, which can be established through co-creation, the motor of cultural innovation. The result is redefining the history of philosophy in terms of a dialogical civilization by ensuring continuous translations, individual processes of reflection and collective processes of inclusion. Readers will grasp the effectiveness of the history of philosophy in societies that are inclusive, innovative and reflective.

## Marketing of High-technology Products and Innovations

Provide Your Students with the Vital Information They Need to Successfully Market High-tech Products *Marketing of High-Technology Products and Innovations* is the only text on the market that focuses on the unique marketing challenges that surround high-tech products and service. The Third Edition retains all the same concepts and materials of previous editions and includes comprehensive coverage of the latest academic research and leading-edge business practices. "

## Understanding Leadership in Complex Systems

### A Praxeological Perspective

Springer This work proposes that Carl Menger's Subjective Theory of Value (STV), and its subsequent elaboration by Ludwig von Mises as Praxeology, provides a useful alternative to more common methods in the study of action and social phenomena, and more specifically, to leadership in complex social systems. Rather than being based on rationality assumptions and algorithmic predictability, the STV emphasizes transient subjectivity shaped by a complex world of lacking information, mistakes, disequilibrium, uncertainty and attempted error correction that defy mathematization and exact prediction. As such, it is a framework to make sense of human action systems in terms of subjective understanding, learning, and uncertainty, rather than quantitative predictability. Accordingly, the aim of this work is to explain the STV as a general theory of action and to demonstrate its capability in developing adequate qualitative theory and to elaborate on some of the major topics that its implications raise with regard to leadership. The power of the method can be seen in that its procedure naturally branches out to facilitate an understanding of a broad selection of processes and may provide the basis for a universal theory of leadership.

## Interests and Epistemic Integrity in Science

### A New Framework to Assess Interest Influences in Scientific Research Processes

Rowman & Littlefield This book aims to distinguish acceptable from unacceptable interest influences in science. Jan De Winter criticizes existing views on the integrity of science and the roles of financial, political, and other interests in science, and develops an alternative view to shed new light on cases from medical science, aerospace science, climate science, and biology.

## Philosophy of Blockchain Technology - Ontologies

MultiMedia Publishing About the necessity and usefulness of developing a philosophy specific to the blockchain technology, emphasizing on the ontological aspects. After an Introduction that highlights the main philosophical directions for this emerging technology, in Blockchain Technology I explain the way the blockchain works, discussing ontological development directions of this technology in Designing and Modeling. The next section is dedicated to the main application of blockchain technology, Bitcoin, with the social implications of this cryptocurrency. There follows a section of Philosophy in which I identify the blockchain technology with the concept of heterotopia developed by Michel Foucault and I interpret it in the light of the notational technology developed by Nelson Goodman as a notational system. In the Ontology section, I present two developmental paths that I consider important: Narrative Ontology, based on the idea of order and structure of history transmitted through Paul Ricoeur's narrative history, and the Enterprise Ontology system based on concepts and models of an enterprise, specific to the semantic web, and which I consider to be the most well developed and which will probably become the formal ontological system, at least in terms of the economic and legal aspects of blockchain technology. In Conclusions I am talking about the future directions of developing the blockchain technology philosophy in general as an explanatory and robust theory from a phenomenologically consistent point of view, which allows testability and ontologies in particular, arguing for the need of a global adoption of an ontological system for develop cross-cutting solutions and to make this technology profitable. CONTENTS: Abstract Introducere Tehnologia blockchain - Proiectare - Modele Bitcoin Filosofia Ontologii - Ontologii narative - Ontologii de intreprindere Concluzii Note Bibliografie DOI: 10.13140/RG.2.2.24510.33602

## Intentional Practice for Museums
