How Australia Built and Lost its Automotive Industry

Cambridge University Press What can we tell about the future of automobiles and the industries that make them by examining their past? Wormald and Rennick trace the history of powered land transport, the rise and fall of the railways, the spectacular rise of the automobile, and what might come next. Delving into the mighty and complex automotive industry, following the growth of the markets and production, this book illustrates the globalization of vehicle manufacturers and component suppliers, giving form to the development of the industry's business model. A key factor in an auto-industry's successes and failures is the often-difficult relationship it has with government, which varies in nature from country to country. As an illustrative case, Wormald and Rennick present and analyse the entire lifecycle of Australia's automotive history - including its birth, growth, functioning and death - and its shifting relationship with the government that supported it.

The Opera Singer's Career Guide

Understanding the European Fach System

Scarecrow Press Any singer longing to have a career in opera, particularly in Europe, should be familiar with the European system of classifying voices known as Fach. The *Opera Singer's Career Guide: Understanding the European Fach System* presents valuable information to help readers learn, understand, and use the Fach system to their professional advantage. More than just soprano, alto, tenor, or bass, students and professionals alike should know the 25 different Fach categories fully defined here, along with the examples of roles, audition arias, and European opera houses and agents provided. Based on careful research and personal experience, singer and teacher Pearl Yeadon McGinnis describes the features, characteristics, and benefits of the Fach system, including voice categorization and classification and using Fach to train the young voice. She provides practical information on maintaining a career in opera, such as the different types, procedures, and pitfalls of opera auditions; types of opera contracts and contract negotiations; and the value of networking. She explains the different styles of European opera houses and gives an example of life in a state level German opera house, including the various performance spaces, the makeup and responsibilities of an ensemble, and the jobs and functions of opera house personnel. A glossary and several appendixes supply tools for auditioning, such as newly classified roles for Children, Lyric, and Beginner singers; roles for the established Fach categories; lists of opera agents and houses in the German speaking countries; and suggested audition arias by Fach. In addition, practical details are offered about establishing and maintaining residency in Europe, obtaining permission to live and work in Europe, and helpful hints about customs and travel.

Global Latinas

Latin America's Emerging Multinationals

INSEAD Business Press "Most of the research on multinationals has focused on companies from developed markets. Research on multinationals from emerging economies is relatively new and most of the attention has been focused on multinationals from Asia. Little research has been done on the internationalization strategies and challenges of Latin American multinationals. This book aims to fill this void. Studying Latin American multinationals will not only provide insights into specific strategies deployed by successful firms but will also identify best practices that can be employed by the next generation multinationals from emerging markets." --Book Jacket.

Applications of the methods are explained using case studies and are facilitated by the computer scripts added to the book as Electronic Supplementary Material.

How to Do Things with Videogames

U of Minnesota Press In recent years, computer games have moved from the margins of popular culture to its center. Reviews of new games and profiles of game designers now regularly appear in the *New York Times* and the *New Yorker*, and sales figures for games are reported alongside those of books, music, and movies. They are increasingly used for purposes other than entertainment, yet debates about videogames still fork along one of two paths: accusations of debasement through violence and isolation or defensive paeans to their potential as serious cultural works. In *How to Do Things with Videogames*, Ian Bogost contends that such generalizations obscure the limitless possibilities offered by the medium's ability to

create complex simulated realities. Bogost, a leading scholar of videogames and an award-winning game designer, explores the many ways computer games are used today: documenting important historical and cultural events; educating both children and adults; promoting commercial products; and serving as platforms for art, pornography, exercise, relaxation, pranks, and politics. Examining these applications in a series of short, inviting, and provocative essays, he argues that together they make the medium broader, richer, and more relevant to a wider audience. Bogost concludes that as videogames become ever more enmeshed with contemporary life, the idea of gamers as social identities will become obsolete, giving rise to gaming by the masses. But until games are understood to have valid applications across the cultural spectrum, their true potential will remain unrealized. How to Do Things with Videogames offers a fresh starting point to more fully consider games' progress today and promise for the future.

The Routledge Research Companion to Border Studies

Routledge Throughout history, the functions and roles of borders have been continuously changing. They can only be understood in their context, shaped as they are by history, politics and power, as well as cultural and social issues. Borders are therefore complex spatial and social phenomena which are not static or invariable, but which are instead highly dynamic. This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative, state-of-the-art review of all aspects of borders and border research. It is truly global in scope and, besides embracing the more traditional strands of the field including geopolitics, migration and territorial identities, it also takes in recently emerging topics such as the role of borders in a seemingly borderless world; creating neighbourhoods, and border enforcement in the post-9/11 era.

The Atari Video Computer System

MIT Press A study of the relationship between platform and creative expression in the Atari VCS. The Atari Video Computer System dominated the home video game market so completely that “Atari” became the generic term for a video game console. The Atari VCS was affordable and offered the flexibility of changeable cartridges. Nearly a thousand of these were created, the most significant of which established new techniques, mechanics, and even entire genres. This book offers a detailed and accessible study of this influential video game console from both computational and cultural perspectives. Studies of digital media have rarely investigated platforms—the systems underlying computing. This book (the first in a series of Platform Studies) does so, developing a critical approach that examines the relationship between platforms and creative expression. Nick Montfort and Ian Bogost discuss the Atari VCS itself and examine in detail six game cartridges: *Combat*, *Adventure*, *Pac-Man*, *Yars' Revenge*, *Pitfall!*, and *Star Wars: The Empire Strikes Back*. They describe the technical constraints and affordances of the system and track developments in programming, gameplay, interface, and aesthetics. *Adventure*, for example, was the first game to represent a virtual space larger than the screen (anticipating the boundless virtual spaces of such later games as *World of Warcraft* and *Grand Theft Auto*), by allowing the player to walk off one side into another space; and *Star Wars: The Empire Strikes Back* was an early instance of interaction between media properties and video games. Montfort and Bogost show that the Atari VCS—often considered merely a retro fetish object—is an essential part of the history of video games.

Collecting the Contemporary A Handbook for Social History Museums

Many history museums collect contemporary objects, stories, images and sounds. But reasoned collecting strategies and policies are often lacking. The sheer quantity of available material culture and the complexity of contemporary life leave many confused about how best to document and engage with the present. Collecting the

Contemporary addresses one of the most fundamental issues facing today's history museums: why and how to engage with contemporary collecting? In a format which is approachable, attractive - and above all actionable, this handbook is packed with stimulating thinking and international case studies from some of the leading practitioners and thinkers in the field. This overview of contemporary collecting in a social historical context is well overdue. Original source material, ideas, developments and research have never before been brought together in a single volume.

Kingdom of Twilight

Hachette UK HISTORICAL FICTION BOOK OF THE MONTH - THE TIMES One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An S.S. officer is shot dead by a young Polish Jew, Margarita Eizenstain. In retaliation, his commander orders the execution of thirty-seven Poles - one for every year of the dead man's life. First hidden by a German couple, Margarita must then flee the brutal advance of the Soviet army with her new-born baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. KINGDOM OF TWILIGHT follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former S.S. officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from Displaced Persons camps to Lübeck, Berlin, Tel Aviv and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Uhly's epic novel is a finely nuanced and yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity and redemption. For readers of HHHH by Laurent Binet, THE KINDLY ONES by Jonathan Littell, THE ZONE OF INTEREST by Martin Amis, and ALL THE LIGHT WE CANNOT SEE by Anthony Doerr Translated from the German by Jamie Bulloch
