KEY=HANDBOOK - JAEDEN SHEPPARD

Textbook of Neonatal Resuscitation New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140+ new full-color photographs replacing most line drawings **Wong's Nursing Care of Infants and Children Australia and New Zealand Edition - E-Book FOR PROFESSIONALS Elsevier Health Sciences** This new text has been adapted from the highly trusted Wong's Nursing Care of Infants and Children to provide a reference for professional nurses working in paediatric and child and family health settings in Australia and New Zealand. The content covers all aspects of infant, child and adolescent care, including anatomy and physiology, child and adolescent mental health, nursing care guidelines, critical thinking, family-centred care, rural and remote health, cultural and psychosocial considerations, common presenting conditions, and therapeutic management. With input from leading local expert paediatric clinicians and academics, and carefully curated for practising paediatric nurses, and nurses newly entering paediatrics, the text aligns with local professional standards, health policies, legal and ethical considerations and population data. Well-established, comprehensive text that focuses on clinical relevance for professional nurses Covers all aspects of infant, child and adolescent health through an assessment and management approach Foundational information builds a solid knowledge base in paediatric nursing Written to help nurses develop a deeper understanding of the psychosocial needs of infants, children, adolescents and their families Case studies and research questions to build critical thinking skills Aligned to National Safety and Quality Health Service (NSQHS) Standards User-friendly, accessible content suitable for practising paediatric nurses across a variety of clinical settings and geographic locations **Introduction to Maternity and Pediatric Nursing - E-Book Elsevier Health Sciences** Build the knowledge and clinical judgment you need to succeed in maternity and pediatric nursing! Written in a clear, easy-to-read style, Introduction to Maternity and Pediatric Nursing, 9th Edition describes how you can provide effective, evidence-based care for women during pregnancy, labor, and delivery, and for newborns and growing children. The text spans the continuum of child development, organizing topics from simple to complex and from health to illness; this approach makes it easy to locate information. Another hallmark of the book is its strong focus on family-centered care, health promotion, and illness prevention. Written by noted nursing educator Gloria Leifer, this bestselling text includes new Next-Generation NCLEX® exam-style case studies plus updates on infection control, pandemic responses, and more. Unfolding case studies follow one family through the conception and birth process, and include open-ended critical thinking questions applying the content to practice. More than 25 nursing care plans include nursing diagnoses plus goals, nursing interventions, and rationales, along with critical thinking questions to promote clinical decision-making skills. Detailed nursing skills cover a wide range of maternal and pediatric nursing interventions. Safety alerts highlight the importance of protecting patients and others from accidents, medication errors, and the spread of disease. Nursing tips include practical, evidence-based information applicable in the clinical setting. Nursing guidelines reflect the World Health Organization's Baby Friendly Hospital Initiative, alternative therapies, immunization mandates, emergency preparedness, preventing medication errors, and more. Get Ready for the NCLEX® Examination! at the end of each chapter includes a summary of key points, additional online resources, review questions, and critical thinking questions. Cultural Considerations boxes help you address the needs of culturally diverse patients and families. Patient Teaching boxes help you communicate instructions for self-care with patients and families. Medication tables provide quick access to information about commonly used medications. NEW! Next-Generation NCLEX® examination-style case studies include new-format questions to help you prepare for the licensure examination. NEW! Discussion of the NCSBN Clinical Judgment Measurement Model helps you learn decision making and develop the skills needed to plan effective nursing interventions. NEW! Thorough updates include infection control, pandemic responses, pharmacologic tables, and pediatric treatments. **Clinical Skills in Child Health Practice E-Book E-Book Elsevier Health Sciences** This title is directed primarily towards health care professionals outside of the United States. It is a textbook of clinical skills that offers an excellent resource for all professionals providing care for children and young people. It presents a detailed step-by-step approach to clinical skills that may be used in both hospital and community settings. Each skill is presented with the evidence base required to ensure up-to-date safe practice. Chapters provide rationale for each step of the skill and are enhanced by diagrams and photographs to give the practitioner clear guidance and the confidence to perform unfamiliar skills. The accompanying PowerPoint presentations are a resource for both lecturers teaching clinical skills and individual students who are either encountering a skill for the first time or want to update their knowledge. • A step-by-step guide to the fundamental skills required for child health care which gives clear guidance to help master the skills • Incorporates the latest clinical guidelines to ensure the most up-to-date information is used enabling safe effective practice • Problem-based scenarios provide the opportunity to confirm knowledge and understanding of the skill. • Extensive PowerPoint presentations can be used for teaching or personal guided study in the classroom or skills laboratory. • Colour photos and video clips on the Evolve website present clear guidance on how to perform the skill **Maternal Child Nursing Care - E-Book Elsevier Health Sciences** Get the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX-RN® examination. Written by the foremost experts in maternity and pediatric nursing, the user-friendly Maternal Child Nursing Care, 6th Edition provides both instructors and students with just the right amount of maternity and pediatric content. This new edition includes updated case studies within Nursing Care Plans, as well as a new chapter on pediatric cancer. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Critical thinking case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Nursing Care Plans include rationales for interventions and provide you with an overview and specific guidelines for delivering effective nursing care. Nursing Alerts highlight critical information that you need to know when treating patients. Guidelines boxes outline nursing procedures in an easy-to-follow format. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes in the maternity unit highlight important information nurses need to communicate to patients and families. Cultural Competence boxes equip you with the knowledge you need to deliver culturally competent care. Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care. Medication Guides serve as an important reference of drugs and their interactions. **Maternal Child Nursing Care in Canada - E-Book Elsevier Health Sciences** Featuring the most accurate, current, and clinically relevant information available, Perry's Maternal Child Nursing Care in Canada combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes. **Elsevier's Canadian Comprehensive Review for the NCLEX-RN Examination - E-Book Elsevier Health Sciences** Prepare for success on the NCLEX-RN® exam with the review book written for Canadian nursing students! Elsevier's Canadian Comprehensive Review for the NCLEX-RN® Examination, 2nd Edition provides everything you need to prepare for the NCLEX® exam — complete content review and more than 5,000 NCLEX examination-style questions in the book and online. Proving that not all NCLEX exam review books are the same, only this book includes the kinds of questions that consistently test the critical thinking skills needed to pass today's NCLEX exam. In addition, all answers include detailed rationales and test-taking strategies with tips on how to best approach each question. From Canadian editors Patricia Bradley and Karin Page-Cutrara, and NCLEX review experts Linda Anne Silvestri and Angela Silvestri, this edition integrates Canadian approaches to nursing, making this the only comprehensive review text written from a fully Canadian perspective. It's THE book of choice for NCLEX preparation! More than 5,000 practice questions in the text and online offer ample testing practice. UNIQUE! Detailed test-taking strategy and rationale is included for each question, offering clues for analyzing and uncovering the correct answer option. UNIQUE! Priority Nursing Action boxes provide information about the steps you will take in clinical situations requiring clinical judgement and prioritization. UNIQUE! Pyramid Points icons indicate important information, identifying content that typically appears on the NCLEX-RN® examination. UNIQUE! Pyramid Alerts appear in red text and highlight important nursing concepts. UNIQUE! Priority Concepts — two in each chapter — discuss important content and nursing interventions. New graduate's perspective is offered on how to prepare for the NCLEX-RN, in addition to nonacademic preparation, the CAT format, and test-taking strategies. Mnemonics are included to help you remember important information. 75-question comprehensive exam covers all content areas in the book in the same percentages that they are covered on the actual NCLEX-RN test plan. Practice questions on delegation, prioritization, and triage/disaster management emphasize these areas on the NCLEX exam. Companion Evolve website provides 25 new Next Generation NCLEX® (NGN)-style questions plus all alternate item format questions including multiple response, prioritizing (ordered response), fill-in-the-blank, figure/illustration (hot spot), chart/exhibit, video, and audio questions. Question categories on Evolve are organized by cognitive level, client needs area, integrated process, and content area, allowing completely customizable exams or study sessions. UNIQUE! Audio review summaries on Evolve cover pharmacology, acid-base balance, and fluids and electrolytes. **Wong's Essentials of Pediatric Nursing - E-Book Elsevier**

Health Sciences As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style and encourages a whole-body approach — beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX®-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental tasks and influences at each stage of a child's growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. Chapter on complementary & alternative therapy cover timely topics to aid in providing complete, comprehensive care. Nursing care plans provide a model for planning patient care and include rationales that provide the "why." Research Focus boxes highlight current studies that impact pediatric nursing today. Cultural content and Cultural Considerations boxes are integrated throughout the text to draw attention to customs and beliefs of different cultures that influence childcare. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Nursing tips offer helpful hints and practical, clinical information of a non-emergency nature. Nursing alerts feature critical information that MUST BE considered in providing care. Emergency Treatment sections provide a quick reference in critical situations. Nursing care guidelines provide clear, step-by-step instructions for performing specific skills or procedures.

Assistive Technologies- E-Book Principles and Practice Elsevier Health Sciences Master the assistive strategies you need to make confident clinical decisions and help improve the quality of life for people with disabilities. Based on the Human Activity Assistive Technology (HAAT) model developed by Al Cook, Sue Hussey and Jan Polgar, Assistive Technologies: Principles & Practice, 5th Edition, provides detailed coverage of the broad range of devices, services, and practices that comprise assistive technology. This new text offers a systematic process for ensuring the effective application of assistive technologies — and focuses on the relationship between the human user and the assisted activity within specific contexts. It features over 30 new photos and illustrations, as well as, updated chapters and case studies that reflect current technology. Human Activity Assistive Technology (HAAT) framework locates assistive technology within common, everyday contexts for more relevant application. Focus on clinical application guides application of concepts to real-world situations. Study questions and chapter summaries in each chapter help assessment of understanding and identification of areas where more study is needed. Coverage of changing AT needs throughout the lifespan emphasizes how AT fits into people's lives and contributes to their full participation in society. Principles and practice of assistive technology provide the foundation for effective reasoning. Ethical issues content provides vital information to guide AT service delivery. Explicit applications of the HAAT model in each of the chapters on specific technologies and more emphasis on the interactions among the elements make content even easier to understand. New! Thoroughly updated chapters to reflect current technology and practice. New! Expanded discussion on assistive robotics and smart technologies. New! Review of global initiatives on Assistive Technology. New! Updated art program with 30+ new photos and illustrations. New! Updated case studies to reflect changes in technology and practice since last edition. **All-in-One Nursing Care Planning Resource - E-Book Medical-Surgical, Pediatric, Maternity, and Psychiatric-Mental Health Elsevier Health Sciences** Introducing a plan for success with the only nursing care planning reference book for all core clinical areas! Swearingen's All-In-One Nursing Care Planning Resource, 5th Edition, features over 100 care plans including medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health to help you care for patients in any setting. This new edition is the first in the market to include a unique, interprofessional, "patient problem" focus that teaches students how to speak to patients in conversational terms rather than in nursing-specific language. New non-medical-surgical care plans and updated content throughout reflect the latest evidence-based treatment guidelines for national and international clinical practice. Plus, with its clear approach, easy-to-use format, and straightforward rationales, you can use this one book throughout their entire nursing curriculum! Bolded and highlighted Safety Icons corresponds to the safety competency of the Quality and Safety Education for Nurses (QSEN) initiative for easier recognition. Care plans for all four major clinical areas include medical-surgical, OB/maternity, pediatric, and psychiatric-mental health nursing care plans. A consistent format for each care plan enables you to perform faster searches, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Patient Problems, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized patient problems are listed in order of importance and physiologic patient needs. Detailed rationales for each nursing intervention help you apply concepts to specific patient situations in clinical practice. Full-color design makes the book more user friendly and includes color-coded tabs and improved cross-referencing and navigation aids for faster information retrieval. NEW! UNIQUE! Interprofessional "patient problems" focus familiarizes you with how to speak to patients and other medical colleagues in the consistent interprofessional language of "patient problems," rather than the nursing-specific language of nursing diagnosis. NEW! Care plans helps you to support the lesbian, gay, bisexual, transgender, queer/questioning, or intersex patient. NEW! Updated content throughout reflects the latest evidence-based treatment guidelines and national and international clinical practice guidelines. **Pediatric Skills for Occupational Therapy Assistants E-Book Elsevier Health Sciences** Learn to provide effective therapy for children and adolescents! Pediatric Skills for Occupational Therapy Assistants, 5th Edition covers the entire scope of pediatric OT practice, from normal childhood development to pediatric disorders and treatment planning. Case studies and helpful tips reinforce your understanding and make it easier to apply OT principles to the clinical setting. This edition is thoroughly updated with online videos and new coverage of community systems, physical agent modalities, childhood obesity, Model of Human Occupation assessments, and Kinesio Taping®. Written by noted OTA educators Jean Solomon and Jane O'Brien, this resource is both a comprehensive textbook and a practical clinical reference! Hundreds of case examples provide snapshots of real-life situations and solutions, helping you apply key concepts in a real-life setting. UNIQUE! Clinical Pearls boxes highlight practical advice from the authors and contributors, sharing what they have learned from years of experience. Coverage of evidence-based practice includes clinical trials and outcome studies, especially those relating to evaluation and intervention. Coverage of cultural diversity and sensitivity issues addresses the many different groups of people that OTAs treat in practice. Information on preventive care takes the role of the OTA beyond intervention and treatment. Family-centered perspective uses the terminology of the AOTA Practice Framework in showing how to tailor your treatment to meet the needs of children from different environments. Key terms, outlines, and objectives at the beginning of each chapter prepare readers for the information they're expected to learn from the chapter. Content reviews and questions at the end of each chapter summarize key concepts and help you assess your understanding. Suggested activities in each chapter help readers to bridge the gap between the classroom and the clinic by exploring realistic situations. UNIQUE! Learning resources on the Evolve companion website include video clips and review questions, reinforcing your understanding and demonstrating how concepts apply to actual practice. NEW! Every Moment Counts content is added to The Occupational Therapy Process chapter, promoting pediatric mental health. NEW! Coverage of educational expectations is added to the Educational System chapter. NEW! Coverage of "signature" constraint-induced movement therapy (CIMT) is added to Cerebral Palsy chapter. NEW photographs and illustrations are added throughout the book. NEW video clips on the Evolve companion website show the typical development of children/adolescents. NEW! Extensive assessment and abbreviations appendices are added to Evolve. NEW! Expanded glossary is added to Evolve. **Huether and McCance's Understanding Pathophysiology, Canadian Edition - E-Book Elsevier Health Sciences** Introduction to Pathophysiology provides an entrance to the science of pathophysiology and explains why it is important. Lifespan coverage includes nine separate chapters on developmental alterations in pathophysiology and special sections with aging and pediatrics content. Canadian drug and treatment guidelines familiarize you with aspects of clinical practice you will encounter. Coverage of diseases includes their pathophysiology, clinical manifestations, and evaluation and treatment. Canadian lab values provide the core fundamental information required for practice in Canada. Canadian morbidity statistics provide you with the Canadian context in which you will be practising. Algorithms and flowcharts of diseases and disorders make it easy to follow the sequential progression of disease processes. Health Promotion boxes emphasize evidence-based care and align with the Canadian curriculum. Risk Factors boxes highlight important safety considerations associated with specific diseases. Quick Check boxes test your understanding of important chapter concepts. End-of-chapter Did You Understand? summaries make it easy to review the chapter's major concepts. Key Terms are set in blue, boldface type and listed at the end of each chapter Glossary of approximately 1,000 terms is included on the Evolve website with definitions of important terminology. **Burns' Pediatric Primary Care E-Book Elsevier Health Sciences** Get a comprehensive foundation in children's primary care! Burns' Pediatric Primary Care, 7th Edition covers the full spectrum of health conditions seen in primary care pediatrics, emphasizing both prevention and management. This in-depth, evidence-based textbook is the only one on the market written from the unique perspective of the Nurse Practitioner. It easily guides you through assessing, managing, and preventing health problems in children from infancy through adolescence. Key topics include developmental theory, issues of daily living, the health status of children today, and diversity and cultural considerations. Updated content throughout reflects the latest research evidence, national and international protocols and standardized guidelines. Additionally, this 7th edition been reorganized to better reflect contemporary clinical practice and includes nine new chapters, revised units on health promotion, health protection, disease management, and much, much more! Four-part organization includes 1) an introductory unit on the foundations of global pediatric health, child and family health assessment, and cultural perspectives for pediatric primary care; 2) a unit on managing child development; 3) a unit on health promotion and management; and 4) a unit on disease management. UNIQUE! Reorganized Unit - Health Supervision: Health Promotion and Health Protection - includes health promotion and health protection for developmentally normal pediatric problems of daily living and provides the foundations for health problem management. UNIQUE! Reorganized Unit - Common Childhood Diseases/Disorders has been expanded to sharpen the focus on management of diseases and disorders in children. Comprehensive content provides a complete foundation in the primary care of children from the unique perspective of the Nurse Practitioner and covers the full spectrum of health conditions seen in the primary care of children, emphasizing both prevention and management. In-depth guidance on assessing and managing pediatric health problems covers patients from infancy through adolescence. UNIQUE! Practice Alerts highlight situations that may require urgent action, consultation, or referral for additional treatment outside the primary care setting. Content devoted to issues of daily living covers issues that are a part of every child's growth — such as nutrition and toilet training — that could lead to health problems unless appropriate education and guidance are given. Algorithms are used throughout the book to provide a concise overview of the evaluation and management of common disorders. Resources for providers and families are also included throughout the text for further information. Expert editor team is well-versed in the scope of practice and knowledge base of Pediatric Nurse Practitioners (PNPs) and Family Nurse Practitioners (FNPs). **Advanced Pediatric Assessment, Second Edition Springer Publishing Company** Now in its second edition, Advanced Pediatric Assessment is an in-depth, current guide to pediatric-focused assessment, addressing the unique anatomic and physiological differences among infants, children, and adults as they bear upon pediatric assessment. The second edition is updated to reflect recent advances in understanding of pediatric assessment for PNPs, FNPs, and other practitioners, as well as students enrolled in these advance practice educational programs. This includes a new chapter on the integration of pediatric health history and physical assessment, a Notable Clinical Findings section addressing abnormalities and their clinical significance at the end of each assessment chapter, updated clinical practice guidelines for common medical conditions, updated screening and health promotion guidelines, and summaries in each chapter. Based on a body-system framework, which highlights developmental and cultural considerations, the guide emphasizes the physical and psychosocial principles of growth and development, with a focus on health promotion and wellness. Useful features include a detailed chapter on appropriate communication techniques to be used when assessing children of different ages and developmental levels and chapters on assessment of child abuse and neglect and cultural considerations during assessment. The text presents nearly 300 photos and helpful tables and boxes depicting a variety of commonly encountered pediatric physical findings, and sample medical record documentation in each chapter. NEW TO THE SECOND EDITION: A chapter on the integration of pediatric health history and physical assessment Notable Clinical Findings addressing important abnormalities and their clinical significance in each assessment chapter Updated clinical practice guidelines for common medical conditions Updated screening and health promotion guidelines Accompanying student case study workbook (to be purchased separately) KEY FEATURES: Focuses exclusively on the health history and assessment of infants, children, and adolescents Provides the comprehensive and in-depth information needed by APN students and new practitioners to assess children safely and accurately Includes family, developmental, nutritional, and child mistreatment assessment Addresses cultural competency, including specific information about the assessment of immigrant and refugee children Fosters confidence in APNs new to primary care with children Ellen M.

Chiocca, MSN, CPNP, APN, RNC-NIC, is a clinical assistant professor in the School of Nursing at DePaul University. She received a master of science degree in nursing and a postmaster nurse practitioner certificate from Loyola University, Chicago, and a bachelor of science degree in nursing from St. Xavier University. Prior to joining the faculty at DePaul University, she taught at Loyola University, Chicago, from 1991 to 2013. Ms. Chiocca's clinical specialty is the nursing of children. Her research focuses on how various forms of violence affect children's health. She is certified in neonatal intensive care nursing and as a pediatric nurse practitioner. In addition to teaching at DePaul, Ms. Chiocca also continues clinical practice as a pediatric nurse practitioner at a community clinic in Chicago. Ms. Chiocca has published more than 25 journal articles and book chapters, and is also a peer reviewer for the journal Neonatal Network. She is currently pursuing a PhD in nursing. **Handbook on Homoeopathy for Mother & Child Care Maternal-Child Nursing - E-Book Elsevier Health Sciences** Build your skills in the science and art of maternity and pediatric nursing! Maternal-Child Nursing, 6th Edition makes it easy to understand the essentials of women's health, maternity, and children's nursing care. It simplifies the steps of the nursing process and relates them to care, helping you develop clinical judgment skills and provide safe, effective care in evidence-based practice. This edition adds case studies preparing you for the new Next Generation NCLEX® examination. Best of all, active learning tools and features make it fun to master nursing concepts, offering plenty of opportunities to apply your knowledge to the practice setting. Nursing Care Plans help students apply the nursing process to plan individualized care in the most common maternity and pediatric situations. Clinical Reference sections in pediatrics chapters provide basic information on disorders and their related anatomy and physiology, differences in body systems between children and adults, commonly used drugs, lab values, diagnostic tests, and procedures. Clinical Judgment boxes highlight situations designed to test clinical judgment skills. Health Promotion boxes highlight information needed to perform a comprehensive assessment of well infants and children at various ages. Safety Alerts emphasize what is important to remember when providing safe and optimal quality care. Pathophysiology boxes present an illustrated overview of illnesses and how to manage them. Want to Know boxes provide teaching guidelines, including sample answers for questions that are likely to be asked or topics that need to be taught. Communication Cues offer practical tips for verbal and nonverbal communication with patients and families. Glossary at the end of the book gives students quick access to all key terms and definitions. NEW! Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW! Updated Drug Guides summarize the latest information on medications. **The Practice of Chinese Medicine E-Book The Treatment of Diseases with Acupuncture and Chinese Herbs Elsevier Health Sciences** Use Traditional Chinese Medicine in diagnosing and treating disease! Maciocia's The Practice of Chinese Medicine, 3rd Edition describes how to apply TCM theory to the diagnosis and treatment of disorders and conditions frequently encountered in practice. Covering common, chronic, and acute conditions, Maciocia's provides guidelines to treatment with both acupuncture and Chinese herbs. Case studies offer real-world insights into determining effective treatment care. From an expert team of editors who were close to the late Giovanni Maciocia and who practice "the Maciocia way," this practical, illustrated text makes it easier to apply TCM in Western medical practice. Coverage of Traditional Chinese Medicine includes the diagnosis and treatment of 48 common diseases, conditions, and disorders. Discussion of aetiology, pathology, and differential diagnoses according to TCM is provided for each disease, condition, and disorder. UNIQUE! Summaries of Western differential diagnoses provide alternative treatment options. Coverage of treatments includes acupuncture and herbs, with explanations of choices. Reviews of clinical trials and modern Chinese literature report the experience of noted doctors of Chinese medicine. Practical appendices include Identification of Patterns According to the Six Stages, the Four Levels, and the Three Burners; Prescriptions; and Suggested Substitutions of Chinese Herbs. English-Pinyin Glossary of Chinese Terms is included. NEW and UNIQUE! Clinical Tips provide practical guidelines to diagnosing and treating diseases. NEW and UNIQUE! Red Flags list symptoms that may necessitate a referral to a Western physician. NEW! Updated clinical trials and references are added. NEW! Updated Western differential diagnosis sections are added. NEW discussion on sexuality in Chinese medicine is added. NEW! Additional tongue photos aid in diagnosing diseases, based on Chinese medicine protocols. NEW! Updated, full-color photos are added. NEW! Four new appendices are added, for a total of 10 appendices. NEW! Reorganization of material provides easier access to key topics. **Children and Young People's Nursing at a Glance John Wiley & Sons** Children and Young People's Nursing at a Glance, is the perfect companion for study and revision for pre-registration children's nursing students from the publishers of the market-leading at a Glance series. Divided into seven sections it explores assessment and screening, working with families, the newborn infant, the developing child, child health policy, nursing the sick child and young person and chronic and life-limiting conditions. This comprehensive book is an invaluable resource for pre-registration nursing students as well as newly qualified nurses wanting to consolidate and expand their knowledge of children and young people's nursing. Breaks down complex aspects of child health care in an accessible and un-intimidating way The perfect revision and consolidation textbook Linked closely with the NMC standards for pre-registration nursing education, and the essential skills clusters framework Highly visual colour presentation, with approximately 130 illustrations Includes boxes, summary boxes, key points and recommendations for practice to improve the learning experience Supported by a companion website featuring over 500 interactive multiple choice questions (www.ataglanceseries.com/nursing/children) Available in a range of digital formats - perfect for 'on the go' study and revision **Kozier & Erb's Fundamentals of Nursing Australian Edition Pearson Higher Education AU** Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern. **Handbook of Visual Communication Theory, Methods, and Media Routledge** This Handbook of Visual Communication explores the key theoretical areas and research methods of visual communication. With chapters contributed by many of the best-known and respected scholars in visual communication, this volume brings together significant and influential work in the discipline. The second edition of this already-classic text has been completely revised to reflect the metamorphosis of communication in the last fifteen years and the ubiquity of visual communication in our modern mediated lifestyle. Thirteen major theories of communication are defined by the top experts in their fields: perception, cognition, aesthetics, visual rhetoric, semiotics, cultural studies, ethnography, narrative, media aesthetics, digital media, intertextuality, ethics, and visual literacy. Each of these theory chapters is followed by an exemplar study or two in the area, demonstrating the various methods used in visual communication research as well as the research approaches applicable for specific media types. The Handbook serves as an invaluable reference for visual communication theory as well as a useful resource book of research methods in the discipline. It defines the current state of theory and research in visual communication and serves as a foundation for future scholarship and study. The Handbook of Visual Communication is a theoretical and methodological handbook for visual communication researchers and a compilation for much of the theoretical background necessary to understand visual communication. It is required reading for scholars, researchers, and advanced students in visual communication, and it will be influential in other disciplines such as advertising, persuasion, and media studies. The volume will also be essential to media practitioners seeking to understand the visual aspects of how audiences use media to contribute to more effective use of each specific medium. **Health Promotion Throughout the Life Span - E-Book Elsevier Health Sciences** Health Promotion Throughout the Life Span - E-Book **Edelman and Kudzma's Canadian Health Promotion Throughout the Life Span - E-Book Elsevier Health Sciences** Learn the ins and outs of health promotion and disease prevention in Canada with Edelman and Kudzma's Canadian Health Promotion Throughout the Lifespan. This all-new, comprehensive text grounds you in the Canadian health objectives for promotion and prevention which aims to improve the health of the entire population and to reduce health inequities among population groups. Among the text's chapters you'll find extensive coverage of growth and development throughout the life span — including coverage of the normal aspects, the unique problems, and the health promotion needs that are found in each age and stage of development. Separate chapters discuss each population group — the individual, the family, and the community — and highlight the unique aspects of caring for each of these groups. In all, this comprehensive and culturally relevant text provides all the tools needed to stay up on the latest research and topics in Canadian health promotion. **Neonatal Nursing in Australia and New Zealand Principles for Practice Elsevier Health Sciences** Neonatal Nursing in Australia and New Zealand: Principles for Practice uniquely reflects the local practice, context and standards of neonatal nursing in Australia and New Zealand. Edited by Victoria Kain and Trudi Mannix, the content spans all neonatal care settings, addressing the considerations of all levels, including special care and intensive care units, while highlighting the collaborative nature of neonatal care and interdisciplinary teamwork within this environment. The text comprehensively addresses ANZ-specific perspectives, including the neonatal context for First Peoples; the neonatal nurse practitioner and advanced practice roles; workplace culture; newborn screening, resuscitation, retrievals and transport; stabilisation of the high-risk newborn; the range of disorders by body system; legal and ethical issues; and end-of-life care in the neonatal unit. Supported by international and ANZ neonatal network data Aligned to the Australian College of Neonatal Nurses and New Zealand Nurses Organisation Standards Key learning objectives emphasised Nursing and midwifery-focused Case studies provide the vital link between theory and practice Clinical Practice and Reflections features further reader insight and knowledge Evidence-based practice research underpins all chapters Family-centred care is reinforced throughout Evolve resources included to enhance teaching and learning: eBook on VitalSource Student and Lecturer resources, for each chapter: Test banks of MCQ and short answer questions Additional online case studies Journal articles related to practice and critical thinking questions Answer guide to in-text and online case study, test bank and article questions **Principles of Social Psychiatry John Wiley & Sons** Social psychiatry is concerned with the effects of the social environment on the mental health of the individual, and with the effects of the person with a mental disorder on his/her social environment. The field encompasses social interventions, prevention and the promotion of mental health. This new edition of Principles of Social Psychiatry provides a broad overview of current thinking in this expanding field and will be a source of ideas both in research and for the management of mental disorder. It opens by putting social psychiatry in perspective, within both psychiatry and the social sciences. From the patient's perspective, the outermost influence is the culture in which they live, followed by their neighbourhoods, workmates, and friends and family. The next section considers how we conceptualize the social world, from families through cultural identity and ethnicity to the wider social environment. The book reviews the social determinants and consequences of the major mental disorders before considering interventions and service delivery at various levels to mitigate these. It closes with a review of the social impact of mental illness around the world and a thoughtful essay by the editors on the current state of social psychiatry and where it is heading. **Advanced Pediatric Assessment Lippincott Williams & Wilkins** Advanced Pediatric Assessment provides a detailed and comprehensive approach to obtaining the history and physical examination of children. It addresses the unique anatomic and physiologic differences between infants, children and adults so that PNs, FNPs, and other practitioners can provide an accurate assessment during health and illness. Using a body system framework that highlights developmental and cultural considerations, the book emphasizes the physical and psychosocial principles of growth and development. Advanced Pediatric Assessment carries increased relevance today, with a focus on health promotion and wellness. **Tabbner's Nursing Care Theory and Practice Elsevier Health Sciences** Written by Gabby Koutoukidis and Kate Stainton, Tabbner's Nursing Care: Theory and Practice 8th edition provides students with the knowledge and skills they will require to ensure safe, quality care across a range of healthcare settings. Updated to reflect the current context and scope of practice for Enrolled Nurses in Australia and New Zealand, the text focuses on the delivery of person-centred care, critical thinking, quality clinical decision making and application of skills. Now in an easy to handle 2 Volume set the textbook is supported by a skills workbook and online resources to provide students with the information and tools to become competent, confident Enrolled Nurses. Key features All chapters aligned to current standards including the NMBA Decision Making Framework (2020), the Enrolled Nurse Standards for Practice (2016) and the National Safety & Quality Health Services Standards (2018) Clinical skills videos provide visual support for learners Supported by Essential Enrolled Nursing Skills Workbook 2nd edition An eBook included in all print purchases New to this edition Chapter 5 Nursing informatics and technology in healthcare focuses on competency in nursing informatics for beginning level practice, aligned to the National Nursing and Midwifery Digital Capability Framework 2020 An increased focus on cultural competence and safety Supported by Elsevier Adaptive Quizzing Tabbner's Nursing Care 8th edition **Potter & Perry's Fundamentals of Nursing ANZ edition - eBook Elsevier Health Sciences** Now in its 6th edition, this trusted reference for nursing students supports the development of safe, effective and person-centred practice. The text has been comprehensively revised by nursing leaders and experts from across the spectrum of clinical practice, education, research and health policy settings; and a highly experienced editorial team, which includes Jackie Crisp, Clint Douglas, Geraldine Rebeiro and Donna Waters. Chapters of Potter & Perry's Fundamentals of Nursing, 6e engage students with contemporary concepts and clinical examples, designed to build clinical reasoning skills. Early chapters introduce frameworks such as Fundamentals of Care and cultural safety, as ways of being and practising as a nurse. These frameworks are then applied in clinical and practice context chapters throughout. Reflection points in each chapter encourage curiosity and creativity in learning, including the importance of self-care and self-assessment. 79

Written by midwifery educators Ruth Johnson and Wendy Taylor, the book makes learning easy with background information, learning outcomes, helpful diagrams and lists to represent the skill flow. It explains the underlying physiology associated with pregnancy and childbirth, and clearly defines the nature and extent of current practice. This version is fully updated and referenced throughout to provide a detailed evidence base to support learning and further study. It is ideal for midwives in training, qualified midwives returning to practice, as well as other members of the obstetric healthcare team. Clear and logical – easy to follow and understand for training midwives Accurate, up-to-date evidence base that is relevant to contemporary midwifery practice Each skill contextualized with background, indications and contraindications to support both clinical practice and study Learning objectives and end-of-chapter self-assessment exercises allow readers to monitor their progress New to this edition Latest guidelines and standards New information on resuscitation and other emergencies Now in full color throughout Expanded chapter on the use of standard precautions in light of the global pandemic Developed discussion of alternative feeding methods **Essentials of Pediatric Nursing Lippincott Williams & Wilkins** "Essentials of Pediatric Nursing is intended for Pediatric Nursing courses with an integrated pediatric curriculum. It provides a unique concept-based approach and nursing process focus, that helps students go from concept to application by building on previously mastered knowledge from other courses. Organized into four logical units, Kyle: Essentials of Pediatric Nursing covers a broad scope of topics with an emphasis on common issues and pediatric-specific information. In addition, it has a variety of learning features to ensure student retention, such as, Healthy People 2010 boxes, Threaded Case Studies and Comparison Charts highlighting common diseases. Plus, it includes a BONUS CD-ROM and companion website that provide numerous resources for both students and instructors, including video clips of each developmental stage and care of the hospitalized child! **Maternity and Women's Health Care E-Book Elsevier Health Sciences** Stay up-to-date with the latest in women's health! Maternity and Women's Health Care, 12th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. The new edition is thoroughly updated and consistent with the NCLEX® test plan, focusing on prioritization of care and how best to work among interprofessional teams. As in previous editions, this text emphasizes childbearing concerns like newborn care, wellness promotion and the management of women's health problems. The 12th edition integrates the continuum of care throughout, focusing on the importance of understanding family, culture, and community-based care along with new medication alerts, future trends in contraception, human trafficking, the Zika virus, and more! Content on many high-risk conditions has been updated to reflect newly published guidelines. Expert authors of the market-leading maternity nursing textbook deliver the most accurate, up-to-date content. Clinical Reasoning Case Studies provide you with opportunities to critically analyze a client situation and utilize clinical reasoning skills to identify priorities in care." Community Activity boxes focus on maternal and new born activities that can be pursued in local community settings and online and illustrate nursing care in a variety of settings including assisting clients locating resources. Cultural Considerations stress the importance of considering the beliefs and health practices of clients and their families from various cultures when providing care. Emergency boxes provide information about various emergency situations and offer a quick reference in critical situations. Medication Guides provide key information about commonly used medications with specific nursing implications. Nursing Care Plans identify priority client problems and concerns along with appropriate interventions and rationale. Highlighted Safety alerts integrated within the content draw attention to developing competencies related to safe nursing practice. Signs of potential complications highlight vital concerns, alerting you to signs and symptoms of complications and the immediate interventions to provide. Teaching for Self-Management boxes highlight important information that you need to communicate to patients and families for follow-up care. Medication Alerts highlighted and integrated within the content alert you to critical drug information that must be considered to provide safe client care. **Ebook: Life-Span Development McGraw Hill** Ebook: Life-Span Development **Guiding Children's Social Development and Learning: Theory and Skills Cengage Learning** Updated throughout and featuring an emphasis on NAEYC and other standards, GUIDING CHILDREN'S SOCIAL DEVELOPMENT AND LEARNING: THEORY AND SKILLS, Ninth Edition, provides a comprehensive overview of child guidance and social development. Focusing on children from ages birth through 12 years, it provides a seamless transition from the pre-primary to the primary years and addresses the needs of practitioners working with children in a variety of group settings. Readers learn how to help children develop social competence and positive feelings about themselves, and how to work with children and families from many different backgrounds and circumstances. The book eliminates much of the guesswork and frustration that can hinder practitioners' efforts to influence children's social development and behavior -- providing a unified framework for decision-making and professional practice that incorporates sound principles of children's development, relationship enhancement, and behavior management. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **The Routledge Handbook of Digital Literacies in Early Childhood Routledge** As fast-evolving technologies transform everyday communication and literacy practices, many young children find themselves immersed in multiple digital media from birth. Such rapid technological change has consequences for the development of early literacy, and the ways in which parents and educators are able to equip today's young citizens for a digital future. This seminal Handbook fulfils an urgent need to consider how digital technologies are impacting the lives and learning of young children; and how childhood experiences of using digital resources can serve as the foundation for present and future development. Considering children aged 0-8 years, chapters explore the diversity of young children's literacy skills, practices and expertise across digital tools, technologies and media, in varied contexts, settings and countries. The Handbook explores six significant areas: Part I presents an overview of research into young children's digital literacy practices, touching on a range of theoretical, methodological and ethical approaches. Part II considers young children's reading, writing and meaning-making when using digital media at home and in the wider community. Part III offers an overview of key challenges for early childhood education presented by digital literacy, and discusses political positioning and curricula. Part IV focuses on the multimodal and multi-sensory textual landscape of contemporary literary practices, and how children learn to read and write with and across media. Part V considers how digital technologies both influence and are influenced by children's online and offline social relationships. Part VI draws together themes from across the Handbook, to propose an agenda for future research into digital literacies in early childhood. A timely resource identifying and exploring pedagogies designed to bolster young children's digital and multimodal literacy practices, this key text will be of interest to early childhood educators, researchers and policy-makers. **Foundations of Nursing - E-Book Elsevier Health Sciences** Part of the popular LPN Threads series, this comprehensive text prepares you for safe and effective nursing practice in today's fast-paced healthcare environment. Covering maternal and neonatal, pediatric, geriatric, mental health, and community nursing, Foundations of Nursing, 6th Edition, includes all of the essential LPN/LVN content you need. Companion CD includes animations and audio clips depicting physiologic processes, physical assessment video clips, an English/Spanish glossary with definitions and audio pronunciations, an anatomy coloring book, and a fluid and electrolytes tutorial. The consistent, logical framework of the nursing process connects specific disorders to patient care. A mathematics review chapter provides a complete review of basic arithmetic skills and practice in drug dosage calculation to ensure safe medication administration. Safety Alert boxes help you implement The Joint Commission's safety guidelines in all settings, with considerations for special populations. Nursing Diagnosis boxes, screened and highlighted in the text, include nursing diagnoses paired with the appropriate nursing interventions. More than 100 skills in a step-by-step format with full-color illustrations present clearly defined nursing actions with rationales for the skills and techniques you'll use in practice. Medication tables are meticulously detailed and provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Nursing Care Plans, presented in a case-study format, emphasize patient goals and outcomes and end with Critical Thinking Questions to develop your clinical decision-making skills. Coordinated Care boxes emphasize parameters for prioritizing tasks, as well as assigning tasks to and supervising unlicensed assistive personnel. Patient Teaching boxes and Family Teaching boxes include post-hospital discharge guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Life Span Considerations for Older Adults boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Home Care Considerations boxes discuss the issues facing patients and caregivers in the home health care setting. Health Promotion boxes provide key information on staying healthy and preventing disease, with tips on wellness from Healthy People 2010. Cultural Considerations boxes discuss how to address the health needs of a culturally diverse patient population when planning care. Enhanced focus on the NCLEX® Examination offers end-of-chapter Get Ready for the NCLEX Examination! sections with key points for self-guided study and remediation and an extensive set of review questions for thorough self-assessment. Additional review questions on Evolve provide instant feedback with correct answer and rationale for even more test-taking practice. Evidence-Based Practice boxes summarize the latest research findings and highlight how they apply to LPN/LVN practice. Updated, vibrant full-color design highlights key information and enhances your understanding of important concepts. **Fun-Schooling Spelling Journal - Ages 5 and Up Teach Your Child to Read, Write and Spell SALE!** Normal Price \$27.50 A homeschooling spelling curriculum that you and your child will love using! This spelling journal was created to be loved by creative and inquisitive children. "I was looking for something that would help my very distracted son when it comes to writing and spelling. I had heard about these books so I looked them up. I joined the Facebook page and began to see how many homeschoolers loved them. So I decided to purchase this one. I have never been so happy. My son loves the pages of the book, he loves walking around the house to find words to spell. This book has changed the way I think about homeschooling, it has given me a little more freedom and creative ideas. One of the best parts of this book is in the back there is a create your own comics, my son is a super big fan of comics so he is looking forward to working on these pages. Great for struggling learners." - Mani This spelling method is best for 2nd, 3rd, 4th and 5th grade, but with mom's help it can be used for children as young as five years old. the activity book can be used for Dyslexic children and children who are hyper-active, have ADHD or Autism. Struggling learners thrive with this method! There are 180 activity pages so that you can use one page per day during the school year. The method used is a unique approach for teaching visual thinkers who are artistic and intelligent, but may not be doing well with phonics and memorization. It has been said that if children can no learn the way we teach, we must teach the way they learn. That is why this book is so different from other spelling books! This book uses very creative ways of teaching children how to become naturally good spellers. Do not worry about correcting your child's work until they get to the part of the book where they are writing their own short stories. By reading their short stories you can identify all the words that the child has trouble spelling. You can teach them those words by having them write each one down seven times in different colors. Do not make any marks or corrections on the child's book, this is his or her spelling journal, and should not be damaged by grades, or marks. Celebrate everything your child shows you in this journal, and remember learning to spell is like learning to talk. Your child will have some very "cute" ways of spelling in the beginning, and all you have to do is play the COLOR GAME with those words, once the child finishes this journal. As the child works through the journal they may start by spelling some things very "creatively" don't worry! When you read their stories at the end of the book you will see that many spelling problems have "self corrected" because of all the spelling games and activities in this book. Spelling can be fun! The Color Game: There is no need to give a child random spelling lists. Just find out what words the child misspells and have them write their word 7 times on the Fun Page. Use a different color each time. **Pharmacology for Health Professionals Elsevier Australia** "Pharmacology for Health Professionals provides a comprehensive introduction to important pharmacology principles and concepts, with a strong focus on therapeutics." "The text has been extensively updated to reflect the latest information on the clinical use of drugs, local aspects of scheduling, drug legislation and ethics." -- Book Jacket. **Lewis's Medical-Surgical Nursing in Canada - E-Book Assessment and Management of Clinical Problems Elsevier Health Sciences** Master the role and skills of the medical-surgical nurse in Canada with the book that has it all! Lewis's Medical-Surgical Nursing in Canada: Assessment and Management of Clinical Problems, 5th Edition reflects the expertise of nurses from across Canada with evidence-informed guidelines, a focus on clinical trends, and a review of pathophysiology. Clear examples make it easy to understand every concept in nursing care — from health promotion to acute intervention to ambulatory care. An Evolve website includes new case studies to enhance your skills in clinical judgement and prepare you for the Next Generation NCLEX®, CPNRE®, and REX-PNTM. From Canadian educators Jane Tyerman and Shelley L. Cobbett, this comprehensive guide provides a

solid foundation in perioperative care as well as nursing care of disorders by body system. Easy-to-understand content is written and reviewed by leading experts in the field, ensuring that information is comprehensive, current, and clinically accurate. More than 800 full-colour illustrations and photographs demonstrate disease processes and related anatomy and physiology. Focus on key areas includes the determinants of health, patient and caregiver teaching, age-related considerations, collaborative care, cultural considerations, nutrition, home care, evidence-informed practice, and patient safety. Nursing Assessment chapters focus on individual body systems and include a brief review of related anatomy and physiology, a discussion of health history and non-invasive physical assessment skills, and note common diagnostic studies, expected results, and related nursing responsibilities. Unfolding case studies in each assessment chapter help you apply important concepts and procedures to real-life patient care. **UNIQUE!** Levels of Care approach organizes nursing management into three levels: health promotion, acute intervention, and ambulatory and home care. Nursing Management chapters focus on the pathophysiology, clinical manifestations, laboratory and diagnostic study results, interprofessional care, and nursing management of various diseases and disorders, and are organized to follow the steps of the nursing process (assessment, nursing diagnoses, planning, implementation, and evaluation). Safety Alerts and Drug Alerts highlight important safety issues in patient care. Informatics boxes discuss the importance and use of technology with topics such as use of social media in the context of patient privacy, teaching patients to manage self-care using smartphone apps, and using Smart infusion pumps. Cultural Competence and Health Equity in Nursing Care chapter discusses culture as a determinant of health, especially in regard to Indigenous populations; health equity and health equality issues as they relate to marginalized groups in Canada; and practical suggestions for developing cultural competence in nursing care. More than 60 comprehensive nursing care plans on the Evolve website include defining characteristics, expected outcomes, specific nursing interventions with rationales, evaluation criteria, and collaborative problems. **Red Book 2021 Report of the Committee on Infectious Diseases** The AAP's authoritative guide on preventing, recognizing, and treating more than 200 childhood infectious diseases. Developed by the AAP's Committee on Infectious Diseases as well as the expertise of the CDC, the FDA, and hundreds of physician contributors. **Week by Week: Plans for Documenting Children's Development Cengage Learning** Nielsen's WEEK BY WEEK: PLANS FOR DOCUMENTING CHILDREN'S DEVELOPMENT, 8th Edition helps pre-service and in-service teachers manage detailed documentation of student development and achievement while attending to the other functions necessary to keep children safe and actively involved in learning. This all-purpose guide provides a concrete, systematic plan for recording each child's growth in all developmental areas. It also presents observation methods, reviews principles of child development as a framework for observation and applies appropriate practice to authentic assessment. NAEYC standards and Developmentally Appropriate Practices and learning objectives are integrated throughout. Real-life anecdotes, practical tips, observation forms with clear instructions and step-by-step guidelines make this a valuable resource for teachers in training and practicing professionals. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Textbook of Diagnostic Microbiology - E-Book Elsevier Health Sciences** Learn to develop the problem-solving skills necessary for success in the clinical setting! The Textbook of Diagnostic Microbiology, 6th Edition uses a reader-friendly "building-block" approach to the essentials of diagnostic microbiology. This updated edition has new content on viruses like Zika, an expanded molecular chapter, and the latest information on prevention, treatment modalities, and CDC guidelines. Updated photos offer clear examples of automated lab instruments, while case studies, review questions, and learning objectives present information in an easy-to-understand, accessible manner for students at every level. A building-block approach encourages you to use previously learned information to sharpen critical-thinking and problem-solving skills. Full-color design, with many full-color photomicrographs, prepares you for the reality of diagnostic microbiology. A case study at the beginning of each chapter provides you with the opportunity to form your own questions and answers through discussion points. Hands-on procedures describe exactly what takes place in the micro lab, making content more practical and relevant. Agents of bioterrorism chapter furnishes you with the most current information about this hot topic. Issues to Consider boxes encourages you to analyze important points. Case Checks throughout each chapter tie content to case studies for improved understanding. Bolded key terms at the beginning of each chapter equip you with a list of the most important and relevant terms in each chapter. Learning objectives at the beginning of each chapter supply you with a measurable outcome to achieve by completing the material. Review questions for each learning objective help you think critically about the information in each chapter, enhancing your comprehension and retention of material. Learning assessment questions at the conclusion of each chapter allow you to evaluate how well you have mastered the material. Points to Remember sections at the end of each chapter identify key concepts in a quick-reference, bulleted format. An editable and printable lab manual provides you with additional opportunities to learn course content using real-life scenarios with questions to reinforce concepts. Glossary of key terms at the end of the book supplies you with a quick reference for looking up definitions. **NEW!** Content about Zika and other viruses supplies students with the latest information on prevention, treatment modalities, and CDC guidelines. **NEW!** Expanded Molecular Diagnostics chapter analyzes and explains new and evolving techniques. **NEW!** Updated photos helps familiarize you with the equipment you'll use in the lab. **NEW!** Reorganized and refocused Mycology chapter helps you better understand the toxicity of fungi. **NEW!** Updated content throughout addresses the latest information in diagnostic microbiology.
