Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation

Concepts, Case Studies, and Practical Implementation IGI Global Universal design for learning (UDL) has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments. In recent years, UDL has gone beyond the field of disability and been explored with regards to international and indigenous students. There is now a sizable body of literature that details the benefits of implementing UDL in higher education, as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions. There is, however, still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms. Therefore, there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like. The Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats, as well as across the undergraduate and graduate sectors. The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments. While highlighting UDL in areas such as educational technology, student engagement, assignment design, and inclusive education, this book is ideally intended for inservice and preservice teachers, administrators, teacher educators, higher education professors and leaders, practitioners, researchers, academicians, and students interested in the integration of UDL into strategic academic plans. Non-native English-speaking Engineers' Writing at the Workplace Springer Nature Based on 55 semi-structured in-depth interviews, this book investigates 15 high-tech engineering co-op professionals' writing experience in the workplace. It shows how the digital age has had a marked impact on the engineers' methods of communication at work, and how on-the -job writing has affected engineers' technical competence, shaped their professional identities, challenged their views on Chinese and English writing, and hindered their success in the workplace. The book identifies three aspects of writing practice: engineers' linguistic and literacy challenges, the reasons behind these challenges, and coping strategies, which suggest that engineers are underprepared and lack necessary support in the workplace. Lastly, the study shows that engineers need to engage in technical literacy through on-the-job writing so that they can fully deal with workplace discourse and socialize with diverse professional groups. Since the sample group interviewed in this book is engineers who studied at universities in the United States and have a foot in the world of school and work as well as knowledge of both Eastern and Western cultures, the book appeals to teachers, students, engineers and scientists who are interested in scientific and technological writing. It is also valuable for educators who prepare scientists, engineers, and technical communicators for professional roles, as well as for communication practitioners who work with engineers. /div GI Endoscopic Emergencies Springer This volume provides a concise, yet comprehensive, state-of-the art overview of GI endoscopic emergencies. Assessing Writing to Support Learning Turning Accountability Inside Out Taylor & Francis In this book, authors Murphy and O'Neill propose a new way forward, moving away from high-stakes, test-based writing assessment and the curriculum it generates and toward an approach to assessment that centers on student learning and success. Reviewing the landscape of writing assessment and existing research-based theories on writing, the authors demonstrate how a test-based approach to accountability and current practices have undermined effective teaching and learning of writing. This book bridges the gap between real-world writing that takes place in schools, college, and careers and the writing that students are asked to do in standardized writing assessments to offer a new ecological approach to writing assessment. Murphy and O'Neill's new way forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as inquiry. It also brings the outside in, by bridging the gap between authentic writing and writing assessment. Through these two strands, readers learn how assessment systems can be restructured to become better aligned with contemporary understandings of writing and with best practices in teaching. With examples of assessments from elementary school through college, chapters include guidance on designing assessments to address multiple kinds of writing, integrate reading with writing, and incorporate digital technology and multimodality. Emphasizing the central role that teachers play in systemic reform, the authors offer sample assessments developed with intensive teacher involvement that support learning and provide information for the evaluation of programs and schools. This book is an essential resource for graduate students, instructors, scholars and policymakers in writing assessment, composition, and English education. Writing as a Way of Staying Human in a Time that Isn't Vernon Press The human element of our work has never been more important. As Robert Yagelski explains in Writing as a Way of Being (2011), the ideological and social pressures of our institutions put us under increasing pressure to sacrifice our humanity in the interest of efficiency. These problems only grow when we artificially separate self/world and mind/body in our teaching and everyday experiences. Following Yagelski and others, Writing as a Way of Staying Human in a Time that Isn't proposes that intentional acts of writing can awaken us to our interconnectedness and to ways in which we—as individuals and in writing communities—might address the social and environmental challenges of our present and future world. Featuring essays drawn from a range of contexts, including college composition and developmental reading and writing, professional and legal writing, middle school English, dissertation projects,

academic conferences, and an online writing group, the collection outlines three ways writing can help us stay human: caring for ourselves and others; honoring the times and spaces of writing; and promoting justice. Each essay describes specific strategies for using writing as a means for staying human in inhuman times. The authors integrate personal stories, descriptions of classroom assignments and activities, and current research in writing studies. Their work shows that writing can contribute to personal, social, and political transformation by nurturing vulnerability, compassion, and empathy among students and instructors alike.
