SCREEN DESIGN MANUAL

COMMUNICATING EFFECTIVELY THROUGH MULTIMEDIA

Springer Science & Business Media The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning > www.frank-thissen.de Key Topics: - Interactive media - Text for the screen - Effective use of pictures - Video, animation, and sound - Screen layout - Orientation and navigation - Interaction - Emotions and metamesages - Intercultural communication

MODERN ENGINE TUNING

Haynes Publishing Group First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work.

MADE BY THE OFFICE FOR METROPOLITAN ARCHITECTURE

AN ETHNOGRAPHY OF DESIGN

010 Publishers "The book presents an ethnographic account of the design rhythm in the Office for Metropolitan Architecture. Written as a collection of short stories, it draws on the mundane trajectories of models and architects at the OMA and shows how innovation permeates design practice, how everyday techniques and workaday choices set new standards for buildings and urban phenomena. In these stories of invention the "Eureka!" moments are missing. They are replaced by routine gestures of model making, recycling, assembling, recollecting, rescaling. This enquiry on architecture-in-the-making is based on participant observation in the office of Rem Koolhaas, extensive interviews with architects, and photo documentation on various projects: the Seattle Public Library, the Whitney Museum of American Art in New York, the China Central Television (CCTV) in Beijing, the Los Angeles County Museum of Art (LACMA), la Casa da Musica in Porto, and others."--p. PROCESS ENGINEERING AND INDUSTRIAL MANAGEMENT

John Wiley & Sons Process Engineering, the science and art of transforming raw materials and energy into a vast array of commercial materials, was conceived at the end of the 19th Century. Its history in the role of the Process Industries has been quite honorable, and techniques and products have contributed to improve health, welfare and quality of life. Today, industrial enterprises, which are still a major source of wealth, have to deal with new challenges in a global world. They need to reconsider their strategy taking into account environmental constraints, social requirements, profit, competition, and resource depletion. "Systems thinking" is a prerequisite from process development at the lab level to good project management. New manufacturing concepts have to be considered, taking into account LCA, supply chain management, recycling, plant flexibility, continuous development, process intensification and innovation. This book combines experience from academia and industry in the field of industrialization, i.e. in all processes involved in the conversion of research into successful operations. Enterprises are facing major challenges in a world of fierce competition and globalization. Process engineering techniques provide Process Industries with the necessary tools to cope with these issues. The chapters of this book give a new approach to the management of technology, projects and manufacturing. Contents Part 1: The Company as of Today 1. The Industrial Company: its Purpose, History, Context, and its Tomorrow?, Jean-Pierre Dal Pont. 2. The Two Modes of Operation of the Company - Operational and Entrepreneurial, Jean-Pierre Dal Pont. 3. The Strategic Management of the Company: Industrial Aspects, Jean-Pierre Dal Pont. A HANDBOOK ON SUSTAINABLE URBAN MOBILITY AND SPATIAL PLANNING

PROMOTING ACTIVE MOBILITY

United Nations This publication has been designed to assist member States in integrating transport, health, quality of life and environmental objectives into urban and spatial planning policies. It provides many references to case studies, good practices and examples from cities across the Euro-Asian region (and beyond) covering a wide array of thematic areas, including: the future of sustainable urban mobility; spatial planning in function of sustainable urban mobility and accessibility; public transport planning as a cornerstone of sustainable urban mobility; active mobility and how it promotes health and the environment; and the potential of Intelligent Transport Systems in an urban context. The publication puts forward a methodology for sustainable urban transport planning and introduces a concise set of key messages and recommendations as an input to the Fifth High-level Meeting on Transport, Health and Environment which takes place in Vienna from 26-27 November 2020.

A CIRCULAR ECONOMY HANDBOOK FOR BUSINESS AND SUPPLY CHAINS

REPAIR, REMAKE, REDESIGN, RETHINK

Kogan Page Publishers WINNER: Les Plumes des Achats 2018 - Committee Special Prize A Circular Economy Handbook for Business and Supply Chains is an easily digestible and comprehensive handbook

that provides a clear guide to the circular economy, helping the reader create future-fit, sustainable strategies. Real examples across a range of market sectors help businesses, students and policymakers understand the theory and fast-developing practice of the circular economy. To help the reader generate ideas, A Circular Economy Handbook for Business and Supply Chains provides a holistic framework for the design and supply chain and supporting business models, and includes tools the reader can use to get started. Whilst growing global consumption presents fantastic business opportunities, our current linear systems (take some materials, make a product, use it and then throw it away) are not fit for purpose. The circular economy unlocks this problem by decoupling resources from consumption. Engaged businesses are re-thinking product design, material choices, business models and supply chains. A Circular Economy Handbook for Business and Supply Chains is a must-read for anyone who wants to apply the circular economy today. Online resources now available: PowerPoint slides of figures and tables from every chapter created by the author.

THE COLLABORATIVE ECONOMY IN ACTION: EUROPEAN PERSPECTIVES

University of Limerick The book titled The Collaborative Economy in Action: European Perspectives is one of the important outcomes of the COST Action CA16121, From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy (short name: Sharing and Caring; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action Sharing and Caring is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukasiewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Piora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

OFFSHORING AND THE INTERNATIONALIZATION OF EMPLOYMENT

A CHALLENGE FOR A FAIR GLOBALIZATION?

International Labour Organization Are job losses and the degradation of working conditions in the developed world due to globalization and the offshoring of jobs? Contrary to popular beliefs and fears, most economic analysis evaluating the long-term and global implications of the internationalization of employment does not support this view. Yet for workers who have been displaced, a positive global impact does not remove their immediate loss. This study discusses a paradox: globalization may have enhanced the overall well-being of those countries that have participated, and reduced poverty worldwide, but it looks more and more like a monster that devours jobs, as there are few mechanisms to compensate those that have suffered. The book analyzes trends and patterns in the internationalization of employment, looks at losers and winners, and proposes new policies of compensation.

REDUCING INEQUALITIES

A SUSTAINABLE DEVELOPMENT CHALLENGE

The Energy and Resources Institute (TERI) The reduction of inequalities within and between countries stands as a policy goal, and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio+20 Summit in 2012. The 2013 edition of A Planet for Life represents a unique international initiative grounded on conceptual and strategic thinking, and "most importantly" empirical experiments, conducted on five continents and touching on multiple realities. This unprecedented collection of works proposes a solid empirical approach, rather than an ideological one, to inform future debate. The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic, political and cultural realities. These systems combine technical, financial, legal, fiscal and organizational elements with a great deal of applied expertise, and are articulated within a clear, well-understood, growth- and job-generating development strategy. Inequality reduction does not occur by decree; neither does it automatically arise through economic growth, nor through policies that equalize incomes downward via ill conceived fiscal policies. Inequality reduction involves a collaborative effort that must motivate all concerned parties, one that constitutes a genuine political and social innovation, and one that often runs counter to prevailing political and economic forces.

RESTRUCTURING FOR CORPORATE SUCCESS

A SOCIALLY SENSITIVE APPROACH

International Labour Organization This publication explores the use of socially sensitive enterprise restructuring (SSER) approaches by companies to help minimise the social costs for workers of downsizing, drawing on examples of good practice and case studies from different countries. Issues discussed include the importance of good labour management relations; communication strategies; the use of counselling, training and job searching strategies; early retirement, mobility and severance packages; alternative work schedules; and the various stages of the workforce reduction process.

THE ANIMAL RIGHTS STRUGGLE

AN ESSAY IN HISTORICAL SOCIOLOGY

Protest and Social Movements From the beginning of the 19th century to the present day, a host of campaigners have denounced the mistreatment of animals. Relying on a comparison of the British and

French experiences, this book retraces the various strands of the animal protection movement, from their origins to their continuing impact on current debates. The story of the collective mobilizations behind the struggle for animal rights sheds light on several crucial processes in our social and political history: changes in sensibilities and socially approved emotions; the definition of what constitutes legitimate violence; the establishment of norms designed to change what constitutes morally acceptable practices; rivalry between elites having differing conceptions of the forms authority should take; the influence of religious belief on militant activities; and the effects of gender discrimination.--

THE SPECTACLE 2.0

READING DEBORD IN THE CONTEXT OF DIGITAL CAPITALISM

University of Westminster Press Spectacle 2.0 recasts Debord's theory of spectacle within the frame of 21st century digital capitalism. It offers a reassessment of Debord's original notion of Spectacle from the late 1960s, of its posterior revisitation in the 1990s, and it presents a reinterpretation of the concept within the scenario of contemporary informational capitalism and more specifically of digital and media labour. It is argued that the Spectacle 2.0 form operates as the interactive network that links through one singular (but contradictory) language and various imaginaries, uniting diverse productive contexts such as logistics, finance, new media and urbanism. Spectacle 2.0 thus colonizes most spheres of social life by processes of commodification, exploitation and reification. Diverse contributors consider the topic within the book's two main sections: Part I conceptualizes and historicizes the Spectacle in the context of informational capitalism; contributions in Part II offer empirical cases that historicise the Spectacle in relation to the present (and recent past) showing how a Spectacle 2.0 approach can illuminate and deconstruct specific aspects of contemporary social reality. All contributions included in this book rework the category of the Spectacle to present a stimulating compendium of theoretical critical literature in the fields of media and labour studies. In the era of the gig-economy, highly mediated content and President Trump, Debord's concept is arguably more relevant than ever.

INTEGRATING THE DISABLED

THE SITUATIONIST INTERNATIONAL

A CRITICAL HANDBOOK

Pluto Press (UK) From its foundation in 1957 to its self-dissolution in 1972, the Situationist International established itself as one of the most radical revolutionary organisations of the twentieth century. This book brings together leading researchers on the SI to provide a comprehensive critical analysis of the group's key concepts and contexts, from its relationship to earlier artistic avant-gardes, romanticism, Hegelianism, the history of the workers' movement and May '68 to the concepts and practices of 'spectacle', 'constructed situations', 'everyday life' and 'détournement'. The volume also considers historically underexamined areas of the SI, including the situation of women in the group and its opposition to colonialism and racism. With contributions from a broad range of thinkers including Anselm Jappe and Michael Löwy, this account takes a fresh look at the complex workings of a group that has come to define radical politics and culture in the post-war period.
