Historical Seismology

Interdisciplinary Studies of Past and Recent Earthquakes

Springer Science & Business Media Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

Earthquake Design Practice for Buildings

ICE Publishing *Earthquake Design Practice for Buildings*, 3rd edition provides comprehensive, practical and easy to read advice for all engineers, designers and analysts of earthquake resistant structures. This new edition has been completely revised to account for the many developments that had taken place since the publication of the bestselling second edition.

Networked

The New Social Operating System

MIT Press How social networks, the personalized Internet, and always-on mobile connectivity are transforming—and expanding—social life. Daily life is connected life, its rhythms driven by endless email pings and responses, the chimes and beeps of continually arriving text messages, tweets and retweets, Facebook updates, pictures and videos to post and discuss. Our perpetual connectedness gives us endless opportunities to be part of the give-and-take of networking. Some worry that this new environment makes us isolated and lonely. But in *Networked*, Lee Rainie and Barry Wellman show how the large, loosely knit social circles of networked individuals expand opportunities for learning, problem solving, decision making, and personal interaction. The new social operating system of “networked individualism” liberates us from the restrictions of tightly knit groups; it also requires us to develop networking skills and strategies, work on maintaining ties, and balance multiple overlapping networks. Rainie and Wellman outline the “triple revolution” that has brought on this transformation: the rise of social networking, the capacity of the Internet

to empower individuals, and the always-on connectivity of mobile devices. Drawing on extensive evidence, they examine how the move to networked individualism has expanded personal relationships beyond households and neighborhoods; transformed work into less hierarchical, more team-driven enterprises; encouraged individuals to create and share content; and changed the way people obtain information. Rainie and Wellman guide us through the challenges and opportunities of living in the evolving world of networked individuals.

Visualising Facebook

A Comparative Perspective

UCL Press Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.

Digital Anthropology

Taylor & Francis Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of

ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

If on a Winter's Night a Traveller

Random House 'Breathtakingly inventive' David Mitchell You go into a bookshop and buy *If on a Winter's Night a Traveller* by Italo Calvino. You like it. But alas there is a printer's error in your copy. You take it back to the shop and get a replacement. But the replacement seems to be a totally different story. You try to track down the original book you were reading but end up with a different narrative again. This remarkable novel leads you through many different books including a detective adventure, a romance, a satire, an erotic story, a diary and a quest. But the real hero is you, the reader. 'The greatest Italian writer of the twentieth century' Guardian

Bella Mia

The Book of Disquiet

Profile Books Sitting at his desk, Bernardo Soares imagined himself free forever of Rua dos Douradores, of his boss Vasques, of Moreira the book-keeper, of all the other employees, the errand boy, the post boy, even the cat. But if he left them all tomorrow and discarded the suit of clothes he wears, what else would he do? Because he would have to do something. And what suit would he wear? Because he would have to wear another suit. A self-deprecating reflection on the sheer distance between the loftiness of his feelings and the humdrum reality of his life, *The Book of Disquiet* is a classic of existentialist literature.

The Rise of the Network Society

John Wiley & Sons This first book in Castells' groundbreaking trilogy, with a substantial new preface, highlights the economic and social dynamics of the information age and shows how the network society has now fully risen on a global scale. Groundbreaking volume on the impact of the age of information on all aspects of society Includes coverage of the influence of the internet and the net-economy Describes the accelerating pace of innovation and social transformation Based on research in the USA, Asia, Latin America, and Europe

In the Sea There Are Crocodiles

Random House I read somewhere that the decision to emigrate comes from a need to breathe. The hope of a better life is stronger than any other feeling. My mother decided it was better to know I was in danger far from her; but on the way to a different future, than to know I was in danger near her; but stuck in the same old fear. At the age of ten, Enaiatollah Akbari was left alone to fend for himself. This is the heartbreaking, unforgettable story of his journey from Afghanistan to Italy in an attempt to find a safe place to live.

The Complete Prophecies of Nostradamus

Sterling Publishing Company, Inc. Provides the complete prophecies of Nostradamus, accompanied by new interpretations of the seer's predictions with analysis that includes the dates on which the predictions would occur.

Landslides and Engineered Slopes

Protecting Society Through Improved Understanding

CRC Press LLC Two-volume set, includes a free CD containing the full contents of the book. **Landslides and Engineered Slopes: Protecting Society through Improved Understanding** comprises the Proceedings of the 11th International Symposium on Landslides and 2nd North American Symposium on Landslides (Banff, Alberta, Canada, 2-8 June 2012). Included are thirteen keynote and invited papers, the inaugural Heim Lecture, and over 260 technical papers organized under the following themes: • **Landslides and Society - Processes and Impacts • Advances in Investigation & Classification • Understanding Landslide Mechanisms • Simulating and Managing Rock Fall • New Technologies for Investigative and Performance Monitoring • Slope Stability in Practice - Engineered Slopes and Forest Management • Advanced Stability Analyses and Landslide Modelling • Evaluation and Control of Landslides - Avoidance, Prevention, and • Protection Strategies** This two-volume set is intended for landslide practitioners, researchers and decision makers, to serve as a comprehensive reference, summarizing the current state-of-the-art and state-of-practice in landslide investigation, analysis and risk management as viewed by experts from Canada, the U.S. and other countries worldwide in their efforts to better protect society through improved understanding.

Popular Astronomy

The Last Dragon

Paw Prints Struggling to survive in a postapocalyptic world after his village is destroyed, Yorsh, the earth's last elf, must embark on a perilous quest to decipher a powerful prophecy and find the last dragon, who holds the key to saving the world from the Dark Age that has begun. An ALA Notable Children's Book. Reprint.

Participatory Action Research

Theory and Methods for Engaged Inquiry

Routledge Fully revised and updated, this second edition of Participatory Action Research (PAR) provides new theoretical insights and many robust tools that will guide researchers, professionals and students from all disciplines through the process of conducting action research 'with' people rather than 'for' them or 'about' them. PAR is collective reasoning and evidence-based learning focussed on social action. It has immediate relevance in fields ranging from community development to education, health, public engagement, environmental issues and problem solving in the workplace. This new edition has been extensively revised to create a user-friendly textbook on PAR theory and practice, including: updated references and a comprehensive overview of different approaches to PAR (pragmatic, psychosocial, critical); more emphasis on the art of process design, especially in complex social settings characterized by uncertainty and the unknown; developments in the use of Web2 collaborative tools and digital strategies to support real-time data gathering and processing; updated examples and stories from around the world, in a wide range of fields; critical commentaries on major issues in the social sciences, including stakeholder theory, systems thinking, causal analysis, monitoring and evaluation, research ethics, risk assessment and social innovation. This modular textbook provides novel perspectives and ideas in a longstanding tradition that strives to reconnect science and the inquiry process with life in society. It provides coherent and critical treatment of core issues in the ongoing evolution of PAR, making it suitable for a wide range of undergraduate and postgraduate courses. It is intended for use by researchers, students and working professionals seeking to improve or rethink their approach to co-creating knowledge and supporting action for the well-being of all.

Dagon

Lindhardt og Ringhof The man is addicted to morphine, and can think of nothing but death. Only morphine has made his life barely tolerable. He is in this fragile mental state because of the things that happened in the past; because of the things he was forced to encounter. During the First World War he ended up alone on an island - an island that was pure horror. 'Dagon' is a horror short story written by H. P. Lovecraft. It was first published in 1917. H.P. Lovecraft (1890-1937) was an American horror writer. His best known works include 'The Call of Cthulhu' and 'the Mountains of Madness'. Most of his work was originally published in pulp magazines, and Lovecraft rose into fame only after his death at the age of 46. He has had a great influence in both horror and science fiction genres.

Ocean Sea

Canongate Books A handful of disparate lives converge at a remote seaside inn: a lovelorn professor, a renowned painter, an inscrutable seductress - and a beautiful young girl, fatally ill, brought to the sea by a desperate father's last hope. An intricate web of destinies and associations begins to reveal itself, but it is not until the arrival of a mysterious sailor called Adams that the truth in all its dreamlike beauty and cruelty becomes clear. Adams may furnish the key to the girl's salvation, but only the fulfilment of his obsessive secret purpose - to answer murder with murder - can conclude the journey that has brought him from the ends of the earth. Alternately playful and profoundly serious, Baricco's novel surges with the hypnotic power of the ocean sea.

Ad Lucilium Epistulae Morales

Rarebooksclub.com This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: ...hoc bonis 31 malisque conveniet. Erunt qui voluptates laudent, erunt qui labores malint; erunt qui dolorem maximum malum dicant, erunt qui ne malum quidem appellent; divitias aliquis ad summum bonum admittet, alius illas dicet malo vitae humanae repertas, nihil esse eo locupletius, cui quod donet fortuna non invenit. In tanta iudiciorum diversitate referendam bene merentibus gratiam omnes tibi uno, quod aiunt, ore adfirmabunt. In hoc tam discors turba consentiet; cum interim iniurias pro beneficiis reddimus, et prima causa est, cur quis ingratus sit, si satis 32 gratus esse non potuit. Eo perductus est furor, ut periculosissima res sit beneficia in aliquem magna conferre; nam quia putat turpe non reddere, non vult esse, cui reddat. Tibi habe, quod accepisti; we should take counsel regarding them, not with their reputation

but with their nature; those things possess no grandeur wherewith to enthrall our minds, except the fact that we have become accustomed to marvel at them. For they are not praised because they ought to be desired, but they are desired because they have been praised; and when the error of individuals has once created error on the part of the public, then the public error goes on creating error on the part of individuals. But just as we take on faith such estimates of values, so let us take on the faith of the people this truth, that nothing is more honourable than a grateful heart. This phrase will be echoed by all cities, and by all races, even those from savage countries. Upon this point good and bad will agree. Some praise pleasure, some prefer toil; some say that pain is the greatest of evils, some say it is no evil at all; some will include riches in the Supreme Good, others will say that their discovery meant harm to...

Europe and Empire

On the Political Forms of Globalization

Fordham Univ Press The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

Geoethics

the Role and Responsibility of Geoscientists

Geological Society of London This Special Publication will be an important tool for geoscientists, aimed at increasing the awareness of their societal role and responsibility in conducting education, research and practice activities. What are the responsibilities of a geoscientist ? And what motivations are needed to push geoscientists to practice the Earth

sciences in an ethical way? The major environmental challenges affecting human communities require not only a strictly scientific and technical preparation by the geoscientists, but also a reflection on their broader obligations towards society. It is important that geoscientists consider geoethics as an indispensable framework on which to base their training and activity. The principles of geoethics can guide them to pursue the common good by weighing the benefits and costs of each choice, and identifying eco-friendly and society-friendly solutions that guarantee the respect of the right balance between human life and the dynamics of the Earth. Communication and dissemination of geosciences should become core activities in building a knowledge-based society, which is able better to protect itself and the Earth ecosystems in order to guarantee a life in harmony with our planet for future generations.

The Fanaticism of the Apocalypse

Save the Earth, Punish Human Beings

John Wiley & Sons The planet is sick. Human beings are guilty of damaging it. We have to pay. Today, that is the orthodoxy throughout the Western world. Distrust of progress and science, calls for individual and collective self-sacrifice to 'save the planet' and cultivation of fear: behind the carbon commissars, a dangerous and counterproductive ecological catastrophism is gaining ground. Modern society's susceptibility to this kind of thinking derives from what Bruckner calls "the seductive attraction of disaster," as exemplified by the popular appeal of disaster movies. But ecological catastrophism is harmful in that it draws attention away from other, more solvable problems and injustices in the world in order to focus on something that is portrayed as an Apocalypse. Rather than preaching catastrophe and pessimism, we need to develop a democratic and generous ecology that addresses specific problems in a practical way.

The Gift

The Form and Reason for Exchange in Archaic Societies

Routledge First published in 1990. Routledge is an imprint of Taylor & Francis, an informa company.

The Late Mattia Pascal

New York Review of Books Mattia Pascal endures a life of drudgery in a provincial town. Then, providentially, he discovers that he has been declared dead. Realizing he has a chance to start over, to do it right this time, he moves to a new city, adopts a new name, and a new course of life—only to find that this new existence is as insufferable as the old one. But when he returns to the world he left behind, it's too late: his job is gone, his wife has remarried. Mattia Pascal's fate is to live on as the ghost of the man he was. An explorer of identity and its mysteries, a connoisseur of black humor, Nobel Prize winner Luigi Pirandello is among the most teasing and profound of modern masters. *The Late Mattia Pascal*, here rendered into English by the outstanding translator William Weaver, offers an irresistible introduction to this great writer's work

The Skin

New York Review of Books This is the first unexpurgated English edition of Curzio Malaparte's legendary work *The Skin*. The book begins in 1943, with Allied forces cementing their grip on the devastated city of Naples. The sometime Fascist and ever-resourceful Curzio Malaparte is working with the Americans as a liaison officer. He looks after Colonel Jack Hamilton, "a Christian gentleman . . . an American in the noblest sense of the word," who speaks French and cites the classics and holds his nose as the two men tour the squalid streets of a city in ruins where liberation is only another word for desperation. Veterans of the disbanded Italian army beg for work. A rare specimen from the city's famous aquarium is served up at a ceremonial dinner for high Allied officers. Prostitution is rampant. The smell of death is everywhere. Subtle, cynical, evasive, manipulative, unnerving, always astonishing, Malaparte is a supreme artist of the unreliable, both the product and the prophet of a world gone rotten to the core.

The Baron in the Trees

Houghton Mifflin Harcourt Cosimo di Rondó, a young Italian nobleman of the eighteenth century, rebels against his parents by climbing into the trees and remaining there for the rest of his life. He adapts efficiently to an existence in the forest canopy—he hunts, sows crops, plays games with earth-bound friends, fights forest fires, solves engineering problems, and even manages to have love affairs. From his perch in the trees, Cosimo sees the Age of Enlightenment pass by and a new century dawn.

My Mother Is a River

eBook Partnership The sensitive and powerful story of the love between a mother and her daughter, a love "e;gone wrong from the start"e;. When Esperia exhibits the symptoms of dementia, her daughter takes care of her and help her to rebuild her disintegrating identity. Day after day we learn about the characters of the extended family, the small village still without running water or electricity, in a "e;bright and harsh"e; Abruzzo.

Making Strategic Spatial Plans

Innovation in Europe

Psychology Press A pan-European survey of strategic planning issues in response to technological innovation and its spatial consequences, this text should interest all planners, geographers and others concerned with the planning and management of economic development.

A Landscape of Events

MIT Press Phenomena such as urban rioting and media coverage of the Gulf War viewed as evidence of the contemporary acceleration of events. Introduction by Bernard Tschumi. In *A Landscape of Events*, the celebrated French architect, urban planner, and philosopher Paul Virilio focuses on the cultural chaos of the 1980s and 1990s. It was a time, he writes, that reflected the "cruelty of an epoch, the hills and dales of daily life, the usual clumps of habits and commonplaces." Urban disorientation, the machines of war, and the acceleration of events in contemporary life are Virilio's ongoing concerns. He explores them in events ranging from media coverage of the Gulf War to urban rioting and lawlessness. Some will see Virilio as a pessimist discouraged by "the acceleration of the reality of time," while others will find his recording of "atypical events" to be clairvoyant.

Architectures of Time

Toward a Theory of the Event in Modernist Culture

MIT Press An exploration of twentieth-century conceptions of time and their relation to artistic form. In *Architectures of Time*, Sanford Kwinter offers a critical guide to the modern history of time and to the interplay between the physical sciences and the arts. Tracing the transformation of

twentieth-century epistemology to the rise of thermodynamics and statistical mechanics, Kwinter explains how the demise of the concept of absolute time, and of the classical notion of space as a fixed background against which things occur, led to field theory and a physics of the "event." He suggests that the closed, controlled, and mechanical world of physics gave way to the approximate, active, and qualitative world of biology as a model of both scientific and metaphysical explanation. Kwinter examines theory of time and space in Einstein's theories of relativity and shows how these ideas were reflected in the writings of the sculptor Umberto Boccioni, the town planning schema of the Futurist architect Antonio Sant'Elia, the philosophy of Henri Bergson, and the writings of Franz Kafka. He argues that the writings of Boccioni and the visionary architecture of Sant'Elia represent the earliest and most profound deployments of the concepts of field and event. In discussing Kafka's work, he moves away from the thermodynamic model in favor of the closely related one of Bergsonian *duree*, or virtuality. He argues that Kafka's work manifests a coherent cosmology that can be understood only in relation to the constant temporal flux that underlies it.

Endangered heritage

emergency evacuation of heritage collections

UNESCO Publishing

My Brilliant Friend

Beginning in the 1950s Elena and Lila grow up in Naples, Italy, mirroring two different aspects of their nation.

Personalism

Read Books Ltd Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Mountain Landscapes

According with the Alps and Carpathian Conventions, the European Landscape Convention, and the Birds, and Habitats Directives the research project "Access2Mountain", illustrated in this book, aims to promote the improvement of the accessibility in mountain areas, as a crucial factor for

their social, economic and cultural sustainable development, with particular regard for tourism. In the meanwhile, it aims to enlight methods, models and tools for the containment and the reduction of negative impacts of traffic, infrastructures and tourist flows on the environment, landscape and natural-cultural heritage, particularly in the most sensitive areas of South-East Europe. The landscape vision becomes the way to approach the analysis, interpretation and design. It requires a trans-scale dimension, moving from the local level, to the environmental component, the interested context and the model region. The final output is a "system of thinking" for the decision making processes in sensitive mountain landscapes.

ABC of Mental Health

John Wiley & Sons Mental health services have changed completely in the UK, and the new edition of ABC of Mental Health has been thoroughly updated and revised to reflect this. Providing clear practical advice on how to recognise, diagnose and manage mental disorders successfully and safely, with sections on selecting drugs and psychological treatments, and improving compliance, ABC of Mental Health also contains information on the major categories of mental health disorders, the mental health needs of vulnerable groups (such as the elderly, children, homeless and ethnic minorities) and the psychological treatments. Fully up to date with recent mental health legislation, this new edition is as comprehensive as it is invaluable. By covering the mental health needs of special groups, this ABC equips GPs, hospital doctors, nurses, counsellors and social workers with all the information they need for the day to day management of patients with mental health problems.

Earthquakes and Tsunamis in the Past

A Guide to Techniques in Historical Seismology

Cambridge University Press An important reference guide to the latest research methodologies for studying historical earthquakes and tsunamis.

Brave New World Revisited

Turtleback Books Describes the shocking scientific devices and techniques available to any group in a position to manipulate society

Communications/Media/Geographie

S

Routledge Although there are human geographers who have previously written on matters of media and communication, and those in media and communication studies who have previously written on geographical issues, this is the first book-length dialogue in which experienced theorists and researchers from these different fields address each other directly and engage in conversation across traditional academic boundaries. The result is a compelling discussion, with the authors setting out statements of their positions before responding to the arguments made by others. One significant aspect of this discussion is a spirited debate about the sort of interdisciplinary area that might emerge as a focus for future work. Does the already-established idea of communication geography offer the best way forward? If so, what would applied or critical forms of communication geography be concerned to do? Could communication geography benefit from the sorts of conjunctural analysis that have been developed in contemporary cultural studies? Might a further way forward be to imagine an interdisciplinary field of everyday-life studies, which would draw critically on non-representational theories of practice and movement? Readers of *Communications/Media/Geographies* are invited to join the debate, thinking through such questions for themselves, and the themes that are explored in this book (for example, of space, place, meaning, power, and ethics) will be of interest not only to academics in human geography and in media and communication studies, but also to a wider range of scholars from across the humanities and social sciences.

Designer's Guide to EN 1990
