Mechanization for Rural Development

A Review of Patterns and Progress from Around the World

Food and Agriculture Organization **This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil disturbance, to allow the soil to be protected under organic cover for as long as possible, and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.**

Marine Diesel Engines

Maintenance, Troubleshooting and Repair

Adlard Coles **Nigel Calder**, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, *Nada*, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

The Great University Gamble

Money, Markets and the Future of Higher Education

Pluto Press In 2010 the UK government proposed huge cuts and market-driven reforms for Universities. The proposals provoked widespread opposition in the form of street protests, occupations, and online campaigns. As the dust settles, Andrew McGettigan surveys the emerging brave new world of Higher Education. Displaying a stunning grasp of the policy details, he looks at the long term impact of the changes, which have been obscured by the focus on tuition fee increases. What will be the role of universities within society? How will they be funded? What kind of experiences will they offer students? Written in a clear and engaging style, *The Great University Gamble* outlines the architecture of the new policy regime, which many find difficult to grasp. It is an urgent warning that our Universities are being transformed from institutions of real learning to profit-driven degree factories.
