KEY=PEDIATRICS - JAZMIN EMERSON

Neonatal and Pediatric Respiratory Care - E-Book

Elsevier Health Sciences Master the principles and skills of respiratory care for neonates, infants, and children! Neonatal and Pediatric Respiratory Care, 6th Edition provides a solid foundation in the assessment and treatment of respiratory disorders in children. Clear, full-color coverage simplifies the concepts of respiratory care while emphasizing clinical application. Reflecting the changing face of this profession, this edition unpacks care strategies with coverage of the newest treatment algorithms, interventions, mechanical ventilation technologies, and more. From an expert team of contributors led by Brian K. Walsh, an experienced respiratory therapist and researcher, this text is an excellent study tool for the NBRC's Neonatal/Pediatric Specialty examination. Authoritative, evidence-based content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application, with an emphasis on an entry-level BS degree. Nearly 500 full-color illustrations — plus clear tables and graphs — make it easier to understand key concepts. Case studies include a brief patient history and questions for each, showing how concepts apply to the more difficult areas of care for neonatal and pediatric disorders. Complete test preparation is provided through coverage of all the content in the matrix for the 2020 NBRC neonatal/pediatric specialty (NPS) credentialing exam. Learning Objectives at the beginning of each chapter break down key content into measurable behaviors, criteria, and conditions. Key Points at the end of each chapter summarize the more important information in a bulleted format. Assessment Questions at the end of each chapter are written in the NBRC

multiple-choice style as found on the Neonatal/Pediatric Specialty (NPS) exam, helping you become familiar with the NBRC testing format. Glossary makes it easy to find definitions of all of the book's key terminology. Answers to assessment and case study questions are provided on the Evolve website. **NEW!** Logical, easy-to-use organization divides the content into three sections of 1) Neonatal, 2) Pediatrics, and 3) Neonatal and Pediatric combined, mirroring the academic approach of most respiratory care programs. **NEW!** Updated content reflects the new matrix for the 2020 NBRC Neonatal/Pediatric Specialty (NPS) exam. **NEW!** Assessment Questions at the end of each chapter are updated to reflect the changes to the 2020 NBRC exam. **NEW!** Additional treatment algorithms of care are added to relevant chapters.

Maternal-Child Nursing - E-Book

Elsevier Health Sciences Build your skills in the science and art of maternity and pediatric nursing! *Maternal-Child Nursing, 6th Edition* makes it easy to understand the essentials of women's health, maternity, and children's nursing care. It simplifies the steps of the nursing process and relates them to care, helping you develop clinical judgment skills and provide safe, effective care in evidence-based practice. This edition adds case studies preparing you for the new Next Generation NCLEX® examination. Best of all, active learning tools and features make it fun to master nursing concepts, offering plenty of opportunities to apply your knowledge to the practice setting. Nursing Care Plans help students apply the nursing process to plan individualized care in the most common maternity and pediatric situations. Clinical Reference sections in pediatrics chapters provide basic information on disorders and their related anatomy and physiology, differences in body systems between children and adults, commonly used drugs, lab values, diagnostic tests, and procedures. Clinical Judgment boxes highlight situations designed to test clinical judgment skills. Health Promotion boxes highlight information needed to perform a comprehensive assessment of well infants and children at various ages. Safety Alerts emphasize what is important to remember when providing safe and optimal quality care. Pathophysiology boxes present an illustrated overview of illnesses and how to manage them. Want to Know boxes provide teaching guidelines, including sample answers for questions that are likely to be asked or topics that need to be taught. Communication Cues offer practical tips for verbal and nonverbal communication with patients and families. Glossary at the end of the book gives students quick access to all key terms and definitions. **NEW!** Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. **NEW!** Updated Drug Guides summarize the latest information on medications.

Pediatric Education for Prehospital

Professionals (PEPP), Fourth Edition

Jones & Bartlett Learning Pediatric Education for Prehospital Professionals (PEPP), Fourth Edition is an evidence-based resource of essential medical content for the assessment and management of infants and children in the field. This respected and ground-breaking program paired physicians and EMS providers together to ensure the content reflects current best practices and the realities of the field. Developed by the American Academy of Pediatrics, PEPP is designed to give prehospital professionals the knowledge, skills, and confidence they need to effectively assess and manage pediatric patients. PEPP combines world-class content with engaging features and an interactive course to truly prepare prehospital professionals to care for pediatric patients. The Fourth Edition Includes: A new chapter on Behavioral Emergencies A top-flight EMS author team working with AAP physician reviewers to ensure exceptional medical content with a focus on how it is applied in the "streets" New procedures on tourniquet application and intranasal medication administration Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin. The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process. Case Studies provide an opportunity for students to apply the foundational knowledge presented in the chapter and strengthen their critical-thinking skills. Procedures provide step-by-step explanations and visual summaries of vital BLS and ALS pediatric care skills. Flexible Course Options: PEPP Course Coordinators may offer a 2-day onsite course or a 1-day enhanced hybrid course at the BLS or ALS level. The onsite course features interactive case-based lectures where students apply their knowledge in a safe environment. The hybrid course features case-based online modules with engaging interactivities, including rapid skills demonstration videos that students complete before attending the onsite portion for hands-on skill station coaching and small-group discussions. The BLS-level courses are geared toward emergency responders and EMTs, while the ALS-level courses are geared toward AEMTs and Paramedics.

Wong's Essentials of Pediatric Nursing

Mosby

Maternal Child Nursing Care in Canada - E-Book

Elsevier Health Sciences Featuring the most accurate, current, and clinically relevant information available, Perry's Maternal Child Nursing Care in Canada combines essential maternity and pediatric nursing information in one text. Comprehensive

coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

Study Guide for Introduction to Maternity and Pediatric Nursing - E-Book

Elsevier Health Sciences Leifer's Study Guide for Introduction to Maternity and Pediatric Nursing is a rich resource that enhances your comprehension and application of material from every chapter of the textbook. With a variety of learning activities, critical thinking exercises, case studies, and review questions, this study guide reinforces your mastery of the essential maternity and pediatric nursing concepts and skills you need to pass the NCLEX-PN® Examination and succeed in your nursing career. NCLEX exam-style multiple-choice review questions at the end of each chapter test basic chapter knowledge as well as ask for appropriate nursing actions, what the nurse should expect in terms of medical care of the patient, and

what complications the patient is at risk of developing. Case Studies and Applying Knowledge activities provide additional opportunities to apply learned information to clinical care. Thinking Critically activities require you to apply what you've learned in the textbook to new situations and draw conclusions based on that knowledge. Learning activities include matching, labeling, and completion exercises to help you learn basic concepts of maternity and pediatric nursing. Crossword puzzles in selected chapters are a nice way to change up the format when testing comprehension of terms and concepts. Answer key is located on the student's Evolve website. Several Thinking Critically sections and case studies with critical thinking questions have been added. Alternate-item format questions are included in the review questions for the NCLEX® Examination.

Maternal Child Nursing Care - E-Book

Elsevier Health Sciences Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! Maternal Child Nursing Care, 7th Edition covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps you prepare to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes describe how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care.

Introduction to Maternity and Pediatric Nursing

Elsevier Health Sciences The seventh edition of this textbook for nursing undergraduates "encompasses the core aspects of evidence-based maternal-child nursing in health and illness, incorporating updates in clinical care and technology."-- Page xi.

Pediatric Education for Prehospital Professionals

Jones & Bartlett Learning Pediatric Education for Prehospital Professionals (PEPP) represents a comprehensive source of prehospital medical information for the emergency care of infants and children.

Clinical Cases in Pediatric Dentistry

John Wiley & Sons Maintaining the original popular format enjoyed by so many readers, this Second Edition features comprehensive updates to all 66 cases to include the latest diagnostic and treatment techniques. Each chapter also includes brand-new cases, for a total of 13 entirely new cases. The most current references to the literature, best practices, and evidence based clinical guidelines, plus new and updated self-assessment questions with detailed answers and explanations, have been added to all the cases. This second edition maintains the same aim of presenting actual clinical cases to question and educate the reader on pediatric dentistry, using a clear, concise, and consistent format to offer a case history, diagnostics and treatment plans for each case. Clinical Cases in Pediatric Dentistry, Second Edition is based on the most current evidence, with standards of care and policies as adopted by relevant associations and societies. This important resource: Presents updated content, clinical guidelines, and references in existing cases, with thirteen brand new case scenarios Takes an easy-to-follow format, with patient history and diagnostics, questions, and answers, and explanations for each case Part of the "Clinical Cases" series applying both theory and practice to actual clinical cases Includes access to a companion website featuring additional case studies, charts, tables, web links, and the figures from the book in PowerPoint Presenting real-world cases that encompass all-important areas of pediatric dentistry, Clinical Cases in Pediatric Dentistry, Second Edition is an essential resource for pre-doctoral dental students, post-graduate residents, and pediatric dentists preparing for board examinations and recertification. It's also an excellent guide for students and faculty in pediatric dentistry departments, as well as practicing pediatric dentists and family dentists.

Clinical Chemistry: Principles, Techniques, and Correlations

Jones & Bartlett Learning "Medical Lab Science students need a strong foundation in applied chemistry need to learn and demonstrate mastery of the required knowledge, skills and competencies as specified by certifying bodies and accreditation organizations to be prepared for certification and employment as a professional medical assistant. ear explanations that balance analytic principles, techniques, and correlation of results with coverage of disease states. For over 30 years and 8 editions Bishop has gained the reputation in the market as the trusted resource written by Clinical Lab Scientists specifically for CLS students. Many of the leading books on the market are adapted from general chemistry textbooks, while Bishop sets itself apart from the competition by its logical organization reorganize the chapter order to reflect clinical chemistry flow in most courses today. Individual chapter content will be based on the ASCLS Entry Level Curriculum. A map of how the textbook correlates to the ASCLS curriculum will be provided as an instructor resource. Bishop not only demonstrates the how of clinical testing, but also the what, why, and when of testing correlations to help students develop the knowledge and interpretive and analytic skills they will need in their future careers"--

Introduction to Maternity and Pediatric Nursing - E-Book

Elsevier Health Sciences Get a solid foundation in maternity and pediatric nursing! Written in a clear, concise, friendly style, Introduction to Maternity and Pediatric Nursing, 8th Edition is the complete guide to caring for maternity and pediatric patients. This best-selling text is organized by developmental stages, discussions of pediatric disorders by body system from simple-to-complex and health-to-illness, and includes a focus on family health. This edition also contains newly updated NCLEX® style review questions, new case studies, new content on zika virus, QSEN and safety, and expanded phases of pregnancy. Evidence-based maternal-child content prepares you for the LVN/LPN to achieve higher levels of learning, a goal expressed by the IOM Committee on the Future of Nursing. Over 42 detailed, updated nursing skills introduce you to skills unique to maternity and pediatric care. Over 25 nursing care plans feature seven different formats/themes/styles, including unfolding case studies. The beginning concepts of critical thinking introduces you to this idea as a basis for clinical nursing care. Updated content on the influence of microbiomes on non-invasive pregnancy and newborn nursing care addresses its impact on the adult health of the newborn. Step-by-step application of the nursing process covers the hospital, home, community and use in improving global health. Expanded cultural practices as they relate to pregnancy, delivery and pediatric care in the community. Coverage of the use of expanding new technologies and computerized medication

administration reinforce the nursing process and strengthen problem-solving skills as applied to maternity nursing. **NEW!** Discussion of new health threats include in-depth coverage of the Zika virus and Influenza **NEW!** Updated guidelines for hypertension and immunizations for infants and children. **NEW!** Updated QSEN goals and nursing responsibilities reflect the most recent changes. **NEW!** Expanded phases of pregnancy includes preconceptual, prenatal, intrapartum, postpartum and interconceptual care and nursing responsibilities. **NEW!** Updated nursing responsibilities related to global health reflect the "Baby Friendly Hospital" WHO initiative and interprofessional nursing communication related to nursing "hand-off care" and shift change reports. **NEW!** Updated NCLEX® exam-style review questions have been revised with alternate item formats at the end of each chapter. **NEW!** Expanded nursing and safety tips throughout include evidence-based online resources which provide pertinent information applicable in the clinical setting that reinforces what you have just learned while building on previously learned information. **NEW!** Expanded coverage of bioterrorism better reflects trauma related to pregnancy and pediatric care.

Pediatric Nursing

An Introductory Text

*Elsevier Health Sciences Part of the popular LPN Threads series, the new edition of this market-leading textbook presents a clear, well-organized exploration of pediatric nursing for LPN/LVN students. It integrates cutting edge information with updated content, offering useful learning tools to reinforce fundamental concepts. Organized according to developmental stages, the book covers pediatric nursing from infancy to adolescence, with a separate chapter on end-of-life care for children and their families. With its easy-to-read, clear writing style, it provides exactly the right depth and breadth of content for LPN/LVNs. Organization by developmental stages. **UNIQUE!** Pediatric psychophysiologic responses to bioterrorism and threats of bioterrorism are found in Chapter 1. **UNIQUE!** Nursing Briefs stress important content-related points and help you prioritize information. **Communication Alert** boxes identify key tips, specific to establishing successful nurse-patient-family communication. **UNIQUE!** **Community Cues** address home care and community-based care issues and tie in nursing care with larger community-based problems, such as nutrition, immunization, and health promotion. **UNIQUE!** **Data Cues** list assessment data to help you recognize possible pediatric disorders. **Nursing Care Plans with Critical Thinking Questions** reinforce the nursing process as applied to pediatric disorders. **13 Skills** follow the nursing process and are clearly presented in an **Action/Rationale** format and teach basic procedures used by the LPN/LVN in pediatric nursing settings. **UNIQUE!** Chapter 3 includes a section on **NIC/NOC**, classification systems used in many clinical and hospital settings. **Online Resources** appear at the end of each chapter and provide an opportunity for further study. **Perforated Self-Assessment Workbook** included at the back of the book features a variety of matching, multiple-choice, study questions, case studies with critical*

thinking questions, and Internet activities. UNIQUE! Critical Thinking Snapshots of selected clinical situations with brief scenarios are located after the Critical Thinking Questions at the end of selected Nursing Care Plans and provide visual examples of specific disorders to help you apply critical thinking skills to clinical situations. UNIQUE! January 2007 Recommended Childhood Immunization Schedule (Appendix A) for children, adolescents, and catch-up growth immunizations provide the most up-to-date information for nurses and families. UNIQUE! JCAHO's Lists of Dangerous Abbreviations, Acronyms, and Symbols provides guidelines for the prevention of medication administration error, especially serious in pediatric dosages. Health Promotion boxes highlight wellness and disease prevention in light of relevant Healthy People 2010 objectives. Content on evidence-based practice, increased cultural content added to Chapter 1: Child Health Evolution and new information on complementary and alternative therapies in Chapter 3: Care of the Hospitalized Child have been added. Home Care Tips related to specific disorders supplement the content on home care in Chapter 3.

Leifer's Introduction to Maternity & Pediatric Nursing in Canada E-Book

Elsevier Health Sciences Gain a solid foundation in Canadian maternity and pediatric nursing! Written in a clear, concise, friendly style, Leifer's Intro to Maternity & Pediatric Nursing in Canada, is the first Canadian edition of the best-selling Leifer textbook. Fully revised by author, Lisa Keenan-Lindsay, RN, MN, PNC(C), it includes Canadian statistics, terminology, references, guidelines, resources, Canadian nursing best practices, assessments, and more! It's organized by developmental stages and includes discussions of pediatric disorders by body system from simple-to-complex and health-to-illness. With a rich focus on family health, this text contains exam-style review questions, case studies, and numerous other pedagogical features to give you the tools you need to successfully care for patients within the Canadian social and institutional context. Logical organization of content by simple-to-complex and health-to-illness, makes it easy for you to locate and access information. Health Promotion Considerations boxes focus on preventive strategies for achieving prenatal wellness, health during pregnancy, postpartum health, newborn health, and pediatric illness prevention and wellness--including Canadian immunization schedules for all ages. Unfolding Case Studies with open-ended critical thinking questions assess application of content to practice as you follow one family through conception and the birth process. Nursing Care Plans provide expected outcomes, interventions, and rationales for nursing interventions. Comprehensive coverage of over 35 skills, outlined in step-by-step format cover a wide range of maternal and pediatric nursing interventions. Focus on health promotion and illness prevention, covers women's health issues, and growth and development of child and parent. Cultural considerations applied as they relate to maternal/infant, and pediatric care in detailed tables. Safety Alerts emphasize protecting patients, family, health care providers, and the public from accidents, medication errors, and the spread of disease. Nursing Tips throughout text provide you with pertinent information

applicable in the clinical setting.

Perinatal and Pediatric Respiratory Care - E-Book

Elsevier Health Sciences With the in-depth coverage you need, this text helps you provide quality treatment for neonates, infants and pediatric patients. It discusses the principles of neonatal and pediatric respiratory care while emphasizing clinical application. Not only is this edition updated with the latest advances in perinatal and pediatric medicine, but it adds a new chapter on pediatric thoracic trauma plus new user-friendly features to simplify learning. A comprehensive approach covers all of the major topics of respiratory care for neonates, infants and children, including both theory and application. Exam preparation is enhanced by the inclusion of the content in the exam matrix for the NBRC's neonatal/pediatric specialty exam. A streamlined, logical organization makes it easy to build a solid foundation of knowledge. Unique Pediatric Thoracic Trauma chapter focuses on common forms of thoracic trauma, a condition that accounts for 5-10% of admissions to pediatric trauma centers. Learning objectives at the beginning of each chapter highlight what you should learn by breaking down key content into measurable behaviors, criteria, and conditions. Assessment questions in each chapter are written in the NBRC multiple-choice style as found on the neonatal and pediatric specialty exam, with answers, page references, and rationales available on a companion Evolve website. Case studies help you master the more difficult areas of care for neonatal and pediatric disorders. New learning features and a fresh look make this text easier to study and use. A companion Evolve website includes links to related sites for further research and study.

Huether and McCance's Understanding Pathophysiology, Canadian Edition - E-Book

Elsevier Health Sciences Introduction to Pathophysiology provides an entrance to the science of pathophysiology and explains why it is important. Lifespan coverage includes nine separate chapters on developmental alterations in pathophysiology and special sections with aging and pediatrics content. Canadian drug and treatment guidelines familiarize you with aspects of clinical practice you will encounter. Coverage of diseases includes their pathophysiology, clinical manifestations, and evaluation and treatment. Canadian lab values provide the core fundamental information required for practice in Canada. Canadian morbidity statistics provide you with the Canadian context in which you will be practising. Algorithms and flowcharts of diseases and disorders make it easy to follow the sequential progression of disease processes. Health Promotion boxes emphasize evidence-

based care and align with the Canadian curriculum. Risk Factors boxes highlight important safety considerations associated with specific diseases. Quick Check boxes test your understanding of important chapter concepts. End-of-chapter Did You Understand? summaries make it easy to review the chapter's major concepts. Key Terms are set in blue, boldface type and listed at the end of each chapter. Glossary of approximately 1,000 terms is included on the Evolve website with definitions of important terminology.

Pediatric Palliative Care

MDPI This book is a printed edition of the Special Issue "Pediatric Palliative Care" that was published in Children

Issues in Pediatric and Adolescent Medicine Research and Practice: 2011 Edition

ScholarlyEditions Issues in Pediatric and Adolescent Medicine Research and Practice: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Pediatric and Adolescent Medicine Research and Practice. The editors have built Issues in Pediatric and Adolescent Medicine Research and Practice: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Pediatric and Adolescent Medicine Research and Practice in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Pediatric and Adolescent Medicine Research and Practice: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Wong's Essentials of Pediatric Nursing: Second South Asian Edition

Elsevier India Wong's Essentials of Pediatric Nursing: Second South Asian Edition

Pharmacology and the Nursing Process E-Book

Elsevier Health Sciences Gain the pharmacology knowledge and skills you need to administer medications safely! Pharmacology and the Nursing Process, 10th Edition provides practical, easy-to-use pharmacology information, emphasizing the application of the nursing process and prioritization throughout the book. Coverage begins with pharmacology basics, then discusses drugs by body systems and drug functions. Hundreds of full-color illustrations show how drugs work in the body and depict key steps in medication administration. Written by pharmacology experts Linda Lane Lilley, Shelly Rainforth Collins, and Julie S. Snyder, this bestselling textbook makes it easy to understand and apply pharmacology concepts and provide safe, quality nursing care. Focus on need-to-know information includes discussions of what nurses may encounter during drug administration in a variety of health care settings, providing accounts of real-life medication errors and tips for avoiding those errors. The Nursing Process is applied to each category of drugs, ensuring that you administer medications accurately and safely, and includes the steps of assessment, human need statements, planning, implementation, and evaluation. Emphasis on drug classes describes key similarities and differences among the drugs in each class, making it easier to understand how individual drugs work in the body. Consistent presentation for each drug group includes the mechanism of action, indications, contraindications, adverse effects, interactions, and dosages, concluding with drug profiles of individual drugs in the class or group. High-alert icons identify medications that pose a greater risk to patient safety. Focus on prioritization includes prioritized nursing diagnoses along with a corresponding prioritization of goals and outcomes, to help you learn to connect nursing diagnoses with goals and outcomes. Ease of readability makes difficult content more understandable. Photo atlas features more than 100 drawings and photographs showing drug administration techniques. Dosages tables summarize generic and trade names, pharmacologic class, normal dosage ranges, and indications for the drugs. Learning features at the beginning of each chapter include objectives and key terms, and at the end of each chapter, key points, critical thinking questions, review questions, and a list of resources available on the Evolve website. QSEN coverage includes the use of human need theory with human need statements, case studies featuring collaboration and teamwork content, Preventing Medication Errors boxes, and a discussion of the QSEN initiative as it relates to the safety and quality of patient care. NEW! Updated drug content reflects the latest FDA drug approvals, withdrawals, and therapeutic uses, and includes updated nursing content.

Pediatric Nursing Test Success

An Unfolding Case Study Review

Springer Publishing Company Unfolding case scenarios make student learning easier by integrating basic and more advanced concepts of pediatric and family nursing through use of all types of NCLEX-style questions, engaging eResources, and development of critical thinking skills, all of which combine to guide students to 'think like a nurse'!

Case-Based Inpatient Pediatric Dermatology

Springer Written for pediatric dermatologists, fellows, dermatology residents and medical students rotating in pediatric dermatology, this book covers topics ranging from atopic dermatitis, drug eruptions, neonatal inpatient dermatology, abuse, and skin signs of other systemic diseases. *Inpatient Pediatric Dermatology* is an emerging subspecialty of Pediatric Dermatology, yet little has been written for the practicing physician treating these young patients in the hospital. *Case-based Inpatient Pediatric Dermatology* fills that void and uses case-based examples to highlight common and uncommon presentations of dermatologic disease in the hospitalized pediatric patient. Complete with useful color illustrations and photographs, this book is the go-to guide for clinicians treating hospitalized pediatric dermatology patients.

Pediatric Critical Care in Resource-Limited Settings, Volume II

Frontiers Media SA

Practical Pediatric Urology

An Evidence-Based Approach

Springer Nature This book provides a case based approach to the problems faced within pediatric urology and an evidence based approach to their solutions. Chapters on urodynamics, external genitalia, the upper urinary tract, the lower urinary tract, and office pediatric urology are included. *Practical Pediatric Urology* aims to utilise real life scenarios to improve data analysis, diagnosis, and treatment decisions within clinical settings. Key learning objectives are included to enable medical professionals to assimilate, synthesise, and formulate a management plan for pediatric urological conditions encountered in clinical practice in a safe and evidence based approach. This book is relevant to pediatricians, pediatric surgeons, pediatric urologists and adult urologists who undertake some pediatric urology practice.

Bioethical Controversies in Pediatric Cardiology and Cardiac Surgery

Springer Nature This title reviews the bioethical issues in congenital heart disease and other difficult pediatric cardiology and cardiac surgical situations. It provides considered opinions and recommendations as to the preferred actions to take in these cases, stressing the importance of making informed decisions that are bioethically sound and doing so using considered reasoning of all the related sensitive issues. *Bioethical Controversies in Pediatric Cardiology and Cardiac Surgery* provides detailed recommendations on potential solutions to make bioethical decisions in difficult clinical scenarios. There is particular emphasis on controversies involving surgery for hypoplastic left heart syndrome, futility, informed consent, autonomy, genomics, and beneficence. It is intended for use by a wide range of practitioners, including congenital heart surgeons, pediatric cardiologists, pediatric intensivists, nurse practitioners, physician's assistants, and clinical ethicists.

Wong's Essentials of Pediatric Nursing

Evidence-based Pediatrics and Child Health

John Wiley & Sons Evidence Based Pediatrics and Child Health is a ground-breaking new text on pediatrics and child care management, using evidence based approach. It covers all the major childhood conditions and contains the features of both a handbook and a reference text. Each chapter combines both advice on management and how best to practice evidence based medicine with reviews of all the available evidence in a specific area. The goal of the book is to help pediatricians and others who care for children to provide the best possible care by combining the best, most current evidence with special circumstances of each individual patient.

Pediatric Sedation Outside of the Operating Room

A Multispecialty International

Collaboration

*Springer This is a major revision, updating, and expansion of the leading single-source volume on pediatric sedation outside of the operating room. Edited and written by an international roster of outstanding experts, it is the only book aimed at the broad range of specialists who deliver pediatric sedation in the non-OR setting. The Second Edition features a significant expansion of contributions from international leaders and individual new chapters on pre-sedation assessment; sedatives' short- and long-term effects on neurocognition; non-pharmacologic distractions; Michael Jackson's death and medical ethics; the role of simulation in safety and training; and palliative sedation in terminally ill children. The specialty-specific chapters continue to be geared toward all sedation providers, regardless of where they practice and patient safety is again emphasized. Fundamental chapters provide in-depth reviews of topics which include, among others, physiology and pharmacology. The book presents the latest guidelines across the specialties, both in the United States and abroad and noteworthy, ongoing research endeavors. From reviews of the First Edition: "This meritorious volume is a splendid collection of materials from highly experienced authors...I will make extensive use of this reference as the academic medical center in which I work continues to build sedation practices and assess credentialing/privileging aspects for professionals of all fields." —Joseph R. Tobin, MD in *Journal of the American Medical Association*. "Brings together sedation practice from a broad range of specialties into one well-written pediatric text...I will certainly be using this book as a reference text in the future." —*Pediatric Anesthesia*. "The first [text] directed at all specialists that treat children who require some sedation...also recognizes the contributions to pediatric sedation of many international societies and governmental organizations...It should be on the shelves of all office-based practices." —*Journal of Neurosurgical Anesthesiology*. "With the ever-increasing opportunities to perform various investigations and therapeutic procedures, combined with increasing demands and expectations from children and their parents, the need and demand for safe and effective sedation of paediatric patients outside the operating room is increasing. Against this background, the second edition of 'Pediatric Sedation Outside the Operating Room' is a very timely addition to the anaesthesia literature." —*British Journal of Anesthesia**

Organizational Behavior, Theory, and Design in Health Care

*Jones & Bartlett Learning In one comprehensive resource, *Organizational Behavior, Theory, and Design in Health Care* integrates the study of organizational behavior and organizational theory within the dynamic context of the healthcare industry. Using a unique meso-perspective, award-winning author Nancy Borkowski explores healthcare organizations from both the micro-level (individual behavior in leadership, intrapersonal and interpersonal issues, groups and teams, managing organizational change) as well as the macro-level (the organization as a whole). Future and*

practicing healthcare managers alike will benefit from t

HESI Comprehensive Review for the NCLEX-RN Examination

Elsevier Health Sciences Second edition titled: Evolve Reach comprehensive review for the NCLEX-RN examination.

Lilley's Pharmacology for Canadian Health Care Practice - E-Book

Elsevier Health Sciences Let Canada's #1 pharmacology text help guide you in mastering the complicated world of nursing pharmacology. Now in its fourth edition, Lilley's Pharmacology for Canadian Health Care Practice covers all the key pharmacology content needed by today's Canadian nurses. Known for its vibrant design, abundance of visuals, and wealth of helpful feature boxes, this engaging text brings important pharmacology concepts to life. The text's popular and unique key drug approach focuses only on the drug information you need to know to safely and effectively administer drugs. Along with its exam preparation and insightful learning strategies, it's the complete (and proven) pharmacology text to help you succeed in school, clinicals, and professional practice.

Introduction to Maternity & Pediatric Nursing - E-Book

Elsevier Health Sciences Part of the popular LPN Threads series, Introduction to Maternity & Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX® test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Cultural Considerations boxes and a Cultural Assessment Data Collection Tool help in developing individualized plans of care. Updated health promotion content includes Health Promotion boxes focusing on preventive strategies for achieving prenatal wellness, health during pregnancy, postnatal health, and pediatric illness prevention and wellness -- including the complete immunization schedules for all ages. Nursing Tips provide information applying to the clinical setting. Objectives are listed in each chapter opener. Key terms include phonetic pronunciations and text page references at the beginning of each chapter. Nursing Care Plans with critical thinking questions help you understand how a care plan is developed, how to evaluate care of a patient, and

how to apply critical thinking skills. A companion Evolve website includes animations, videos, answers to review questions and answer guidelines for critical thinking questions, an English/Spanish audio glossary, critical thinking case studies, and additional review questions for the NCLEX examination.

Pediatric Nursing - E-Book

An Introductory Text

Elsevier Health Sciences Covering evidence-based pediatric nursing care from infancy through adolescence, *Pediatric Nursing: An Introductory Text, 11th Edition* provides a clear, easy-to-read guide to pediatric nursing for LPN/LVN students. Content in this edition is reorganized for a "best of both worlds" approach to pediatric nursing, with early chapters devoted to normal growth and development by age group followed by chapters covering the most common childhood disorders grouped by body system. Updated coverage reflects the latest issues in pediatric nursing care, including childhood obesity and teenage pregnancy. Clinical Snapshots and Nursing Care Plans with critical thinking questions show how to apply the nursing process in real patient care scenarios. Written by noted pediatric nursing educators Debra L. Price and Julie F. Gwin, this market-leading textbook provides the essential knowledge you need to succeed in LPN/LVN practice. Reading Level: 9.6 Nursing Care Plans with critical thinking questions reinforce problem-solving skills as the nursing process is applied to pediatric nursing, with NEW critical thinking answer guidelines provided on the companion Evolve website Evolve to help you understand how a care plan is developed and how to evaluate care of a patient. **UNIQUE!** Free, built-in Study Guide includes scenario-based clinical activities and practice questions for each chapter. Complete, concise coverage of evidence-based pediatric nursing care includes cultural and spiritual influences, complementary and alternative therapies for pain management, and pediatric psychophysiological responses to bioterrorism and threats of bioterrorism. **UNIQUE!** Clinical Snapshots describe patient scenarios and include photographs of pediatric assessment and specific disorders, helping you apply critical thinking skills to clinical situations. Did You Know boxes list assessment data to help you recognize possible pediatric disorders. Nursing Brief boxes stress key points and help in prioritizing information. Communication boxes offer tips and techniques for successful nurse-patient-family communication. Health Promotion boxes and content highlight family-centered care, wellness, and illness prevention. Home Care Considerations boxes address home care issues for children with chronic illnesses and congenital disorders as well as community-based care issues including immunization, nutrition, and overall health promotion. **UNIQUE!** LPN Threads make learning easier, featuring an student-friendly reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design.

Pediatric Nephrology

Lippincott Williams & Wilkins Pediatric Nephrology is the premier comprehensive reference on congenital and acquired kidney diseases and their therapies in children. Section One opens with an overview of the anatomy, physiology, and biology of the pediatric kidney, critical to understanding disease. Section Two covers the evaluation, diagnosis, and therapy of specific kidney disorders. The book has an international focus, and is well known for describing how research developments are applied in the clinical arena.

Pediatric Imaging: Case Review E-Book

Elsevier Health Sciences Pediatric Imaging: Case Review is a quick review of common or rare but classic pediatric cases that tests your knowledge of pediatric imaging. Featuring updated pediatric body and pediatric neuro-imaging cases from fetus to young adolescents, this case review book includes over 300 images and 600 all-new multiple-choice questions, providing residents and radiologists with a current review of key pediatric imaging information. Images and descriptions address most common/classic, as well as several rare but critical entities of pediatric radiology in a single source. Distinguish between common and rare diagnoses with case studies organized into "Opening Round," "Fair Game," and "Challenge" sections that present varying levels of difficulty and occurrences. Features completely updated cases throughout -- including new cases on congenital heart disease -- and over 300 new images. Expanded cases include advanced and state-of-the-art imaging modalities (i.e. fetal MRI and CTA/MRA of the heart). Provides expanded coverage of radiation dose reduction, in addition to new patient management, physics, quality and safety, and non-interpretive skills content. 600 all-new multiple-choice questions are designed to mimic the format of core board and certification exams. Incorporates up-to-date disease classification systems (e.g. ISSVA 2014 of vascular anomalies).

A Guide to Integrative Pediatrics for the Healthcare Professional

Springer In response to the rise in chronic medical conditions--and the growing use of complementary and alternative therapies--among pediatric and adolescent patients, healthcare practitioners are taking a serious look at pediatric integrative medicine (PIM). Although it dovetails with current concepts of preventive medicine, wellness, and patient control, PIM is still an evolving field with its own particular challenges and opportunities. A Guide to Integrative Pediatrics for the Healthcare Professional explores its subject through the more familiar lens of integrative medicine. This concise comprehensive resource synthesizes the knowledge base on a range of therapies commonly associated with PIM, such as acupuncture, herbal

remedies, clinical hypnosis, yoga, homeopathy, and therapeutic massage, with findings on their effective use with children. Case examples illustrate uses of PIM modalities with allopathic medicine to treat young patients at various developmental stages, and the authors pinpoint safety and appropriateness concerns, answer licensing questions, and note clinical areas requiring further study. The wide-ranging information contained here will help support interest in PIM at the research, training, and practice levels. Features of the Guide: An introduction to basic concepts in PIM. Trends in IM/PIM education. A survey of complementary and alternative therapies, including biologically-based, body-based, mind-body, energy-based, and alternative whole systems. Current evidence for IM in treating common pediatric conditions. The future of integrative pediatrics. References and links for further information. Offering a front-row seat to the continued expansion of the field, *A Guide to Integrative Pediatrics for the Healthcare Professional* is a salient text not only for pediatricians but for all healthcare practitioners tasked with improving children's wellbeing. Science and Practice of Pediatric Critical Care Medicine

Springer Science & Business Media The field of critical care medicine is in the midst of a dramatic change. Technological and scientific advances during the last decade have resulted in a fundamental change in the way we view disease processes, such as sepsis, shock, acute lung injury, and traumatic brain injury. Pediatric intensivists have been both witness to and active participants in bringing about these changes. As the understanding of the pathogenesis of these diseases reaches the cellular and molecular levels, the gap between critical care medicine and molecular biology will disappear. It is imperative that all physicians caring for critically ill children in this new era have a thorough understanding of the applicability of molecular biology to the care of these patients at the bedside in order to keep up with the rapidly evolving field of critical care medicine. To the same extent, the practice of critical care medicine is in the midst of fundamental change. In keeping with the Institute of Medicine's report "Crossing the Quality Chasm," the care of critically ill and injured children needs to be safe, evidence-based, equitable, efficient, timely, and family-centered [1,2]. In the following pages, these changes in our specialty are discussed in greater scope and detail, offering the reader fresh insight into not only where we came from, but also where we are going as a specialty.

Wong's Essentials of Pediatric Nursing - Binder Ready

Elsevier As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style

and encourages a whole-body approach - beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX(R)-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental tasks and influences at each stage of a child's growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. Chapter on complementary & alternative therapy cover timely topics to aid in providing complete, comprehensive care. Nursing care plans provide a model for planning patient care and include rationales that provide the why. Research Focus boxes highlight current studies that impact pediatric nursing today. Cultural content and Cultural Considerations boxes are integrated throughout the text to draw attention to customs and beliefs of different cultures that influence childcare. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Nursing tips offer helpful hints and practical, clinical information of a non-emergency nature. Nursing alerts feature critical information that MUST BE considered in providing care. Emergency Treatment sections provide a quick reference in critical situations. Nursing care guidelines provide clear, step-by-step instructions for performing specific skills or procedures. NEW! Next Generation NCLEX(R)-style case studies and questions are included in the text and on the companion Evolve website. NEW! Pediatric Quality Indicator boxes present a bigger picture of hospitals and how they look at quality and safety. NEW! Applying Evidence to Practice boxes outline up-to-date procedures to reinforce best practices. NEW! Concept lists have been added to the beginning of chapters to aid programs using a concept-based curriculum. NEW! Separate chapter on cancer focuses on best-practices within this specialized area of pediatric care. NEW! Expanded information on the Zika virus ensures you are grounded in the latest evidence-based information. NEW! Updated genetics content keeps you up to date in this always evolving area of medicine. NEW! Expanded content on the different roles in pediatric nursing reflect nursing responsibilities and the most common pediatric nursing subsets utilized in practice today. UPDATED! Content on autism spectrum disorders has been updated to keep you in the know on the latest practice standards used in this rapidly expanding area of pediatric care. NEW! Information on Narcan reinforces how to properly apply the injection. UPDATED! Translating Evidence into Practice boxes have been updated to focus attention on application of both research and critical thought processes to support and guide the outcomes of nursing care.

Thompson's Pediatric Nursing

An Introductory Text

Saunders Rev. ed. of: Thompson's pediatric nursing. 2004.

Pediatric Gender Assignment

A Critical Reappraisal

Springer Science & Business Media This book represents the proceedings from a conference that took place in Dallas in the spring of 1999 which was entitled "Pediatric Gender Assignment - A Critical Reappraisal". Some participants rightfully argued that the conference really focused on the issue of pediatric gender assignment, and that reassignment was not applied in most cases. Their comments were reflected in the title of this monograph. This multidisciplinary meeting was sponsored by a conference grant from the National Institutes of Health, and a broad inquiry into this complex topic took place from many points of view. Basic scientists offered insight into mechanisms of sexual differentiation of the gonads, physical phenotype and imprinting of the central nervous system. Endocrinologists reviewed their experience in diagnosis and management, surgeons described traditional as well as innovative approaches, and there was strong representation from the ethical and behavioral sciences. In putting together such a panel, it was essential that we identify a cast of speakers who could address their viewpoints with strong convictions, and yet not let their passions render the meeting counter productive. We were not disappointed. While many differing points of view were firmly expressed by the panelists and audience, all viewpoints were accorded the respect they deserved. The concept behind the meeting and this book really originated in 1997 shortly after Diamond and Sigmundson published their long term follow up study of the John/Joan case.
