Human Resource Development as We Know It

Speeches that Have Shaped the Field

Routledge The field of Human Resource Development has developed largely through academics, scholars and reflective practitioners from across the world coming together. Many people link memorable keynote speeches to changes in their research, practice, career path or even life view. Good keynote speeches are a forthright statement of the expert's view and thus are often not published. Now that HRD is maturing there is a need to recapture some of those earlier moments – both as a form of archive, and also to shed light on the path that has been followed. Twenty-two speeches seminal to the field of HRD are included in this volume. These speeches are milestones along the path of the development of the field; as well as reconstructing their speech, the contributors have also located it within the time it was given and commented on how the field has developed since. This book is a resource, not only as an archive and for those who wish to relive their pivotal moments, but also for anyone interested in the development of HRD as a discipline. This unique approach provides an exciting and engaging way to reflect on cutting edge issues in the academic and practitioner world of HRD!

Making India Great

The Promise of a Reluctant Global Power

HarperCollins India will be the world's most populous country by 2024 and its third largest economy by 2028. But the size of our population and a sense of historical greatness alone are insufficient to guarantee we will fulfil our ambition to become a global power. Our approach to realize this vision needs more than just planning for economic growth. It requires a shift in attitudes. In Making India Great, Aparna Pande examines the challenges we face in the areas of social, economic, military and foreign policy and strategy. She points to the dichotomy that lies at the heart of the nation: our belief in becoming a global power and the reluctance to implement policies and take actions that would help us achieve that goal. The New India holds all the promise of greatness many of its citizens dream of. Can it become a reality? The book delves into this question.

Lost in a Gallup

Polling Failure in U. S. Presidential Elections

Donald Trump's unexpected victory in the 2016 U.S. presidential election brought sweeping criticism of election polls and poll-based statistical forecasts, which had signaled that Hillary Clinton would win the White House. Surprise ran deep in 2016, but it was not unprecedented. Lost in a Gallup examines in lively and engaging fashion the history of polling flops, epic upsets, unforeseen landslides, and exit poll fiascoes in American presidential elections. Drawing on archival collections and contemporaneous sources, W. Joseph Campbell presents insights on notable pollsters of the past, including George Gallup, Elmo Roper, Archibald Crossley, Warren Mitofsky, and Louis Harris. The story is one of media failure, too, as journalists invariably take their lead from polls in crafting campaign narratives. Lost in a Gallup describes how numerous prominent journalists--including Edward R. Murrow, Jimmy Breslin, Mike Royko, Christopher Hitchens, and Haynes Johnson--were outspoken poll-bashers and critics. In assessing polling's messy, uneven, and controversial past, Campbell emphasizes that although election polls are not always wrong, their inherent drawbacks invite skepticism and wariness. Readers will come away better prepared to weigh the efficacy and value of pre-election polls in presidential races, the most important of all American elections.

The Irish Buddhist

The Forgotten Monk Who Faced Down the British Empire

Oxford University Press, USA ""The Irish Buddhist tells the story of a poor Irishman who worked his way across America as a migrant worker, became one of the very first Western Buddhist monks, and traveled the length and breadth of Asia, from Burma and present-day Thailand to China and Japan, and from India and Sri Lanka to Singapore and Australia. Defying racial boundaries, he scandalized the colonial establishment of the 1900s. As a Buddhist monk, he energetically challenged the values and power of the British empire. U Dhammaloka was a radical celebrity who rallied Buddhists across Asia, set up schools, and argued down Christian missionaries - often using western atheist arguments. He was tried for sedition, tracked by police and intelligence services, and died at least twice. His early years and final days are shrouded in mystery despite his adept use of mass media. His story illuminates the forgotten margins and interstices of imperial power, the complexities of class, ethnicity and religious belonging in colonial Asia, and the fluidity of identity in the high Victorian period. Too often, the story of the pan-Asian Buddhist revival movement and Buddhism's remaking as a world religion has been told "from above," highlighting scholarly writers, middle-class reformers and ecclesiastical hierarchies. By contrast, Dhammaloka's adventures "from below" highlight the changing and contested meanings of Buddhism in colonial Asia. They offer a window into the worlds of ethnic minorities and diasporas, transnational networks, poor whites, and social movements, all developing different visions of Buddhist and post-imperial modernities. The Evolution of the Gospel

A New Translation of the First Gospel with Commentary and Introductory Essay

Yale University Press Many biblical scholars believe that the Gospel of Matthew was written after those of Mark and Luke. In this controversial book, an eminent politician who is also a distinguished classical scholar refutes this idea, using textual and literary criticism to assert that the Gospel of Matthew preceded the other gospels. Translating and analysing the original Greek source, Powell proceeds to concentrate upon the text of Matthew, as being the earliest form of the gospel that we possess, and to demonstrate how its peculiar characteristics can best be accounted for as being the result of insertions and manipulations, often theologically motivated. Powell argues that the Gospel of Matthew represents an attempted compromise between a pro-gentile book and a critical revision of that book produced for the judaising wing of the early Church, and that material intended to appeal to the followers of John the Baptist was also introduced. The Gospel of Matthew, though given the form of consecutive narrative, is, says Powell, essentially a theological debate carried on by means of allegory: was Jesus the Son of God or a Davidic king?

The Mueller Report

The Final Report of the Special Counsel on Russian Interference in the 2016 Presidential Election

Courier Dover Publications This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed

summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.

From Palestine to America

A Memoir

iUniverse Taher Dajani remembers playing soccer with his neighborhood friends in his idyllic city of Jaffa, Palestine. But on April 24, 1948, when Taher was fourteen, his carefree lifestyle came to an abrupt end. His family, with little money and few possessions, escaped the city by sea in a crowded fishing trawler as Zionist militia encircled Jaffa. Taher's father believed the family was in danger, so overnight they became refugees. The family took refuge in Syria and later in Libya, which enabled them to rebuild their lives. They experienced grief at leaving a place they loved and felt a great sense of loss and displacement, but with perseverance the Dajanis began anew. From Palestine to America describes the family's experiences and their determination. Taher Dajani writes this memoir about his new life after leaving his beloved Jaffa—from his days as a college student in Chicago to his work with the central bank in Libya—and his position with the International Monetary Fund in Washington DC. Even though it has been sixty years since the Dajani family were forced to flee Palestine, they remember their heritage and roots, and Jaffa, Palestine, will forever be in their hearts.

Reclaiming Patriotism in an Age of Extremes

Yale University Press How our shifting sense of "what's normal" defines the character of democracy"A provocative examination of social constructs and those who would alternately undo or improve them."—Kirkus ReviewsThis sharp and engaging collection of essays by leading governmental scholar Cass R. Sunstein examines shifting understandings of what's normal, and how those shifts account for the feminist movement, the civil rights movement, the rise of Adolf Hitler, the founding itself, the rise of gun rights, the response to COVID-19, and changing understandings of liberty. Prevailing norms include the principle of equal dignity, the idea of not treating the press as an enemy of the people, and the social unacceptability of open expressions of racial discrimination. But norms are very different from laws. They arise and change in response to individual and collective action. Exploring Nazism, #MeToo, the work of Alexander Hamilton and James Madison, constitutional amendments, pandemics, and the influence of Ayn Rand, Sunstein reveals how

norms ultimately determine the shape of government in the United States, Europe, and elsewhere.

The Social Fabric of British Politics

Money for Nothing

The Scientists, Fraudsters, and Corrupt Politicians Who Reinvented Money, Panicked a Nation, and Made the World Rich

Random House Trade Paperbacks The sweeping story of the world's first financial crisis: "an astounding episode from the early days of financial markets that to this day continues to intrigue and perplex historians . . . narrative history at its best, lively and fresh with new insights" (Liaquat Ahamed, Pulitzer Prize-winning author of *Lords of Finance*) A Financial Times Economics Book of the Year ● Longlisted for the Financial Times/McKinsey Business Book of the Year Award In the heart of the Scientific Revolution, when new theories promised to explain the affairs of the universe, Britain was broke, facing a mountain of debt accumulated in war after war it could not afford. But that same Scientific Revolution—the kind of thinking that helped Isaac Newton solve the mysteries of the cosmos—would soon lead clever, if not always scrupulous, men to try to figure a way out of Britain's financial troubles. Enter the upstart leaders of the South Sea Company. In 1719, they laid out a grand plan to swap citizens' shares of the nation's debt for company stock, removing the burden from the state and making South Sea's directors a fortune in the process. Everybody would win. The king's ministers took the bait—and everybody did win. Far too much, far too fast. The following crash came suddenly in a rush of scandal, jail, suicide, and ruin. But thanks to Britain's leader, Robert Walpole, the kingdom found its way through to emerge with the first truly modern, reliable, and stable financial exchange. Thomas Levenson's *Money for Nothing* tells the unbelievable story of the South Sea Bubble with all the exuberance, folly, and the catastrophe of an event whose impact can still be felt today.
