DEAD GUY AT THE SUMMERHOUSE

Per Bastet Publications It was 1968. Like a lot of seventeen-year-old males that summer, I was thinking about death. Not Bobby Kennedy's or Martin Luther King's. I was contemplating my own. I could feel my eighteenth birthday looming and I had to wonder if I'd spend my nineteenth in Vietnam, in Canada, in jail, or in the Great Hereafter. It was nearly the last mentioned, and not at the hands of the VC, either. I came this close to having my goozle slit right here at home in good old nothing-ever-happens Faelin, Indiana. Mitch Franklin thinks he's got it made when the town's wealthiest eccentric hires him to look after her two lapdogs. Then he meets her family. Five years ago, the last guy she hired played head games the family and servants are still trying to recover from. He also wound up dead. Now, some people think Mitch might be just like him. Some people think Mitch might BE him, back from the grave. Will Mitch survive the anniversary of his predecessor's death, or will he be another DEAD GUY AT THE SUMMERHOUSE?

PAINT IT BLACK

A NOVEL

Hachette UK Josie Tyrell, art model, runaway, and denizen of LA's rock scene finds a chance at real love with Michael Faraday, a Harvard dropout and son of a renowned pianist. But when she receives a call from the coroner, asking her to identify her lover's body, her bright dreams all turn to black. As Josie struggles to understand Michael's death and to hold onto the world they shared, she is both attracted to and repelled by his pianist mother, Meredith, who blames Josie for her son's torment. Soon the two women are drawn into a twisted relationship that reflects equal parts distrust and blind need. With the luxurious prose and fever pitch intensity that are her hallmarks, Janet Fitch weaves a spellbinding tale of love, betrayal, and the possibility of transcendence. "A dark, crooked beauty that fulfills all the promise of White Oleander and confirms that Janet Fitch is an artist of the very highest order."--Los Angeles Times Book Review "Lushly written, dramatically plotted. . . Fitch's Los Angeles is so real it breathes."--Atlantic Monthly "There is nothing less than a stellar sentence in this novel. Fitch's emotional honesty recalls the work of Joyce Carol Oates, her strychnine sentences the prose of Paula Fox."--Cleveland Plain Dealer "A page-turning psychodrama. . . Fitch's prose penetrates the inner lives of [her characters] with immediacy and bite."--Publishers Weekly "Fitch wonderfully captures the abrasive appeal of punk music, the bohemian, sometimes squalid lifestyle, the performers, the drugs, the alienation. This is crackling fresh stuff you don't read every day."--USA Today "In dysfunctional family narratives, Fitch is to fiction what Eugene O'Neill is to drama."--Chicago Sun-Times "Riveting. . . An uncommonly accomplished page-turner."--Elle

SCHIZOPHRENIA AND PARKINSON SURGERY

A NEW AND EFFICIENT REGULATION OF DOPAMINERGIC SYNAPSES AFTER BEAM (BILATERAL ELECTROCOAGULATION OF ADRENAL MEDULLA)

Createspace Independent Publishing Platform The book about Schizophrenia & Parkinson Surgery, allows patients and their families to obtain scientific information about the only surgical solution that definitely eradicates symptoms of these diseases and allows the patients to recover completely. This book presents the latest medical breakthrough for the surgical treatment of Schizophrenia, where the author explains his theory on how the surgery works biochemically & physiologically, and on the other hand, displays unheard of results from actual cases from around the world after being operated. The author, Dr. Jose Romeo Mackliff, an Ecuadorian Psychiatrist, is the creator of bilateral electrocoagulation adrenal medulla (B.E.A.M.). He first discovered experimentally, 35 years ago, that high glucose levels, producing twelve hours of hyperglycemia, produced temporary short term relief of the symptoms in schizophrenia and subsequently, throughout the study, found that these improvements were due to high glucose levels blocking the releasing hormones and at the same time stopping the hypothalamus pituitary adrenal axis (HPA) from being overactive. Hyperglycemia blocked the presence of adrenaline, glucagon and cortisol in the bloodstream. The conclusion of this study was that the delayed action of these hormones was caused by the HPA axis fatigue and that it was necessary to block at least one of these hormones to relieve 30% of the axis' work . The crucial question became, which hormone must be eliminated by surgery. Adrenalin was chosen for being located in the adrenal Medulla on top of each kidney and could be easily eliminated by BEAM. Thus, the axis fatigue was solved and the disruption of the gluco-regulation presenting in schizophrenics due to the failure of the adrenal response and chronic stress, resolved. After BEAM, the Adrenaline is immediately replaced by norepinephrine produced in the brain, in such a way that the patient keeps the necessary hormonal function to deal with stress and eliminates the failure of the gluco-regulation from bringing normal levels of hormones to the HPA axis. According to the results from the surgery, patients that show Parkinson's disease who undergo BEAM surgery exhibit no symptoms immediately after surgery, but the results may vary and the patients might experience symptoms again. This is not the case with patients with schizophrenia who undergo the surgery. BEAM (Bi-lateral Electrocoagulation of the Adrenal Medulla) was born. BEAM is a surgery that has been practiced since 2006, that can eradicate the intake of antipsychotic medications for life. It offers a real alternative in the lives of patients, capable of bringing Psychiatry and surgery together, thus becoming the new Psychiatry for the 21st century.

THE ATLAS OF AI

POWER, POLITICS, AND THE PLANETARY COSTS OF ARTIFICIAL INTELLIGENCE

Yale University Press The hidden costs of artificial intelligence, from natural resources and labor to privacy and freedom What happens when artificial intelligence saturates political life and depletes the planet? How is AI shaping our understanding of ourselves and our societies? In this book Kate Crawford reveals how this planetary network is fueling a shift toward undemocratic governance and increased inequality. Drawing on more than a decade of research, award-winning science, and technology, Crawford reveals how AI is a technology of extraction: from the energy and minerals needed to build and sustain its infrastructure, to the exploited workers behind "automated" services, to the data AI collects from us. Rather than taking a narrow focus on code and algorithms, Crawford offers us a political and a material perspective on what it takes to make artificial intelligence and where it goes wrong. While technical systems present a veneer of objectivity, they are always systems of power. This is an urgent account of what is at stake as technology companies use artificial intelligence to reshape the world.

FOR THOSE IN PERIL ON THE SEA

Primarily set in the northern Bahamas, this book weaves its story of post-apocalyptic survival into the local sub-tropical seascape and the sailing culture that can be found there. With its evocative use of real locations haunted by zombie-like infected and atmospheric depictions of the trials of life at sea drawn from the author's own experiences, *For Those In Peril On The Sea* provides a new and unusual take on the traditional post-apocalyptic genre. From the back of the book: After a six week voyage across the Atlantic, they couldn't wait to get to shore. When they got there, they found the land would never be safe again... There was nothing to suggest it would be anything more than a routine delivery. Four people thrown together by chance, sailing a newly-built catamaran from South Africa to Miami. But while they were away, something happened, something none of them could ever have imagined. When they get back to civilisation, they find it no longer exists. The land is no longer safe. Their only option is to stay on the boat and try to survive. Join Bill, Rob, Jon and CJ as they travel around their frightening new world. One where they must struggle against the infected that now rule the land, the elements and each other.

PRACTICAL ETHICS

Cambridge University Press For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

PRE-INCIDENT INDICATORS OF TERRORIST INCIDENTS

THE IDENTIFICATION OF BEHAVIORAL, GEOGRAPHIC AND TEMPORAL PATTERNS OF PREPARATORY CONDUCT

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
