[GRIN Verlag](#) Academic Paper from the year 2020 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, Maastricht University, language: English, abstract: The board of directors is an important organizational institution, whose purpose is to reduce the agency problem inherited by the management of a firm. However, because of various accounting frauds and failures in corporate governance in the history of larger corporations, there is increasing public attention regarding the effectiveness of a board and how a perfect board should be designed to increase their oversight quality. Because of these many researchers investigated this topic. This paper reviews recent academic research regarding the characteristics of a perfect board of directors. Firstly, the paper analyses different board characteristics, then it investigates the importance of the composition and size of the audit committee.

ROARING METROPOLIS

BUSINESSMEN'S CAMPAIGN FOR A CIVIC WELFARE STATE

[University of Pennsylvania Press](#) Debates about poverty and inequality in the United States frequently invoke the early twentieth century as a time when new social legislation helped moderate corporate power. But as historian Daniel Amsterdam shows, the relationship between business interests and the development of American government was hardly so simple. Roaring Metropolis reconstructs the ideas and activism of urban capitalists roughly a century ago. Far from antigovernment stalwarts, business leaders in cities across the country often advocated extensive government spending on an array of social programs. They championed public schooling, public health, the construction of libraries, museums, parks, and playgrounds, and decentralized cities filled with freestanding homes—a set of initiatives that they believed would foster political stability and economic growth during an era of explosive, often chaotic, urban expansion. The efforts of businessmen on this front had deep historical roots but bore the most fruit during the 1920s, an era often misconstrued as an antigovernment moment. As Daniel Amsterdam illustrates, public spending soared across urban America during the decade due in part to businessmen's political activism. With a focus on three different cities—Detroit, Philadelphia, and Atlanta—and a host of political groups—organized labor, machine politicians, African American and immigrant activists, middle-class women's groups, and the Ku Klux Klan—Roaring Metropolis traces businessmen's quest to build cities and nurture an urban citizenry friendly to capitalism and the will of urban capitalists.

TEEN SERVICES 101: A PRACTICAL GUIDE FOR BUSY LIBRARY STAFF

[American Library Association](#) Need to amp up teen services, but you're short on time or not sure where to start? Teen Services 101: A Practical Guide for Busy Library Staff provides useful information that will help staff put together a basic teen services program with minimal time and hassle. The author, Megan Fink, along with contributions from Maria Kramer, provides practical tips and instructions on how to build core teen services into the overall library program. Whether you're a new teen services librarian, or staff in a one person library, this how-to guide on teen services can help you effectively serve teen patrons. Let's face it, teens are sometimes overlooked by libraries when it comes to services and programs. However, there are over 42 million teens in the US, which makes them a sizeable and important demographic to serve. Many of today's teens are struggling. More are living in poverty than before and nearly 7,000 teens drop out of high school per day. By setting aside some time to increase your library's focus on teens, you will be providing a vital service and positioning your library as an indispensable part of the community. The resources and information in this book can help you achieve that.

THE CASE OF FRANCE. BOARD STRUCTURE, BOARD CHARACTERISTICS AND MONITORING EFFECTIVENESS

GRIN Verlag **Master's Thesis from the year 2021 in the subject Business economics - Business Management, Corporate Governance, grade: 1.0, Maastricht University (School of Business and Economics), language: English, abstract: This study examines whether a board's structure and composition are indicative of its monitoring effectiveness in terms of mitigating opportunistic management behavior. French companies may legally choose to operate with a board of directors (One-tier board) or a separate management board and supervisory board (Two-tier board). While the French Corporate Governance Code sets out uniform guidelines on board composition and activity regardless of a given board structure, respective directors face different challenges in establishing adequate management oversight. Hence, externally prescribed board composition may have varying or unintended consequences. Further, both board structures have been attributed with different conceptual advantages that may influence their practical monitoring performance. Using the occurrence of earnings management as an indicator for poor management supervision, empirical results show that companies with two-tier boards are superior monitors. More generally for France, I also find that independent boards are associated with less earnings management whereas busy boards are associated with more earnings management. I do not find a measurable impact of director financial expertise. Finally, mixed results are presented on the existence of a moderating effect of board structure on the relationship between board composition and earnings management.**

THE SOCIAL POLITICS OF RESEARCH COLLABORATION

Routledge **The past two decades have seen an increasing emphasis on large and interdisciplinary research configurations such as research networks, and centers of excellence including those in Social Sciences and Humanities research. Little research has been undertaken, however, to understand how these new large research structures that are being called forth by research funders and research/higher education institutions alike function socially, and what the impact of operating within such structures is on those working within, and those working with, them. Past writers have discussed the "intra-agentic" operations of human researchers and the material laboratory environment in its broadest sense. This volume is concerned with the social politics of research collaboration in relation to six key positions: leaders of large research formations, leaders of sub-projects within large collaborations, participant researchers, junior and early career researchers, advisory board members, and those who look in from the outside such as researchers who are un-funded. It explores the mostly unacknowledged but critical aspect of social structures in research, discussing issues such as struggles over leadership styles, the marginalization of researchers working cross-disciplinarily, power hierarchies and intellectual ownership, and the silencing of dissent in research.**
