An Educational Calamity

Learning and Teaching During the Covid-19 Pandemic

The Covid-19 pandemic caused major disruptions to education around the world. Since the World Health Organization declared a pandemic on March 11, 2020, most students on the planet were affected by the interruption of in-person schooling. To mitigate the educational loss such interruption would cause, education authorities the world over created a variety of alternative mechanisms of education delivery. They did so quickly and with insufficient knowledge about what would work well, for which children, and for what aspects of the schooling experience. Having to create such alternative arrangements in short order was the ultimate adaptive leadership challenge, one for which no playbook existed, one for which solutions would have to be invented, rather than drawn from existing technical knowledge. The nature of the challenge differed across the world and regions, and it differed also within countries as a function of the differential public health and economic impact of the pandemic on communities, and of variations in institutional and financial resources available to redress such impact, including availability of digital infrastructure and previous knowledge and experience of teachers and students with digi-pedagogies and other resources to create alternative education delivery systems. Sustaining educational opportunities amidst these challenges created by the pandemic was an example of adaptive education response not to a unique unexpected challenge but to one in a larger class of problems, just one of the many adaptive conundrums facing communities and societies. Beyond the challenges resulting from the pandemic, other complications of that sort predating the pandemic included those resulting from poverty, inequality, social inclusion, governance, climate change, among others. In some ways, the pandemic served as an accelerant for some of those, augmenting their impact or underscoring the urgency of addressing them. Adaptive puzzles of this sort, including pandemics, are likely to continue to impact education systems in the foreseeable future. This makes it necessary to strengthen the capacity of education systems to respond to them. Reimagining education systems so they are resilient in the face of adaptive challenges is an opportunity to mobilize new talent and institutional resources. Partnerships between school systems and universities can contribute to those reimagined and more resilient systems, they can enhance the institutional capacity of education systems to devise solutions and to implement them. Such partnerships are also an opportunity for universities to be more deliberate in integrating their three core functions of research, teaching and outreach in service of addressing significant social challenges in a context in rapid flux. In this book we present the results of one approach to produce the integration between research, teaching and outreach just described, resulting from engaging graduate students in collaborations with school systems for the purpose of helping identify ways to sustain educational opportunity during the disruption caused by the pandemic. This activity engaged our students in research and analysis, contributing to their education, and it engaged them in service to society. The book examines what happened to educational opportunity during the Covid-19 pandemic in Bangladesh, Belize, the municipality of Santa Ana in Costa Rica, Guatemala, Kenya, in the States of Sinaloa and Quintana Roo in Mexico, South Africa, United Arab Emirates, and in the United States in Richardson Independent School District in Texas. It offers a systematic analysis of policy options to sustain educational opportunity during the pandemic.

Boletín Internacional de Bibliografía Sobre Educación

Vocabulary Development

MDPI Knowledge of word meanings is critical to success in reading. A reader cannot fully understand a text in which the meaning to a significant number of words is unknown. Vocabulary knowledge has long been correlated with proficiency in reading. Yet, national surveys of student vocabulary knowledge have demonstrated that student growth in vocabulary has been stagnant at best. This volume offers new insights into vocabulary knowledge and vocabulary teaching. Articles range from a presentation of theories of vocabulary that guide instruction to innovative methods and approaches for teaching vocabulary. Special emphasis is placed on teaching academic and disciplinary vocabulary that is critical to success in content area learning. Our hope for this volume is that it may spark a renewed interest in research into vocabulary and vocabulary instruction and move toward making vocabulary instruction an even more integral part of all literacy and disciplinary instruction.

Overcoming Inequalities in Schools and Learning Communities: Innovative Education for a New Century

Frontiers Media SA Educational inequalities have strongly impacted disadvantaged and underserved populations such as indigenous, Roma, migrant children, students with disabilities, and those affected by poverty. A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns, dropout

rates, disengagement in the school experiences of children and youth traditionally excluded. Research also suggests the negative consequences for child development - including cognitive, language, and social-emotional functioning - of poverty and lack of quality education in the early years. Consequently, the current unequal access to optimal learning environments for every single child to succeed in education and to have a better life perpetuates the exclusion and neglects their right to education for those minorities. This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected. Scholars worldwide are looking for successful actions with children, youth, and communities of learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories, empirical evidence, and multidisciplinary interventions oriented towards achieving social impact, which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of "Schools as Learning Communities" is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions (SEAs); that is, those interventions that improve students' achievement and social cohesion and inclusion in many diverse contexts, regardless the socioeconomic, national, and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to other contexts, this Research Topic aims at deepening on this approach. In short, our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need.

Second Handbook of English Language Teaching

[Springer](#) The Second Handbook of English Language Teaching provides a comprehensive examination of policy, practice, research and theory related to English language teaching in international contexts. Over 70 chapters focus on the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second-language acquisition and pedagogy. In countries around the globe, English has become the second language taught most frequently and intensively. In many countries, particularly in Asia, government policies have made English a part of the curriculum from primary school on. Demand for English teaching by parents and adult learners is fueled by the desire to increase economic competitiveness, globalization of the workforce, immigration, and a move toward lifelong learning. Immigration has led to an increased demand for English-

language teaching even in countries where English is the dominant language.

Professional Learning in Education

Challenges for Teacher Educators, Teachers and Student Teachers

Lannoo Publishers Educational quality is at the center of debates worldwide. In all these debates, teachers are considered as the critical actors determining to a large extent the quality of our educational systems. At the same time, doubts are expressed related to teachers' quality as well as to the education or training of teachers. In this context, policy debates underline the need for "excellent" teachers and "excellent" teacher education. This book presents a model for teachers' professional development together with the three central themes: (1) professionalism of teacher educators, (2) professional development of (student) teachers, and (3) (student) teacher practices. The different chapters in this book discuss these themes in detail. Urgent issues that address practitioners, teacher educators, and researchers are discussed throughout the chapters and general research challenges for teacher education researchers are put forward in the epilogue of this book.

Cyberbullying Policies of Social Media Companies

MIT Press **A critical examination of efforts by social media companies—including Facebook, Twitter, Snapchat, and Instagram—to rein in cyberbullying by young users. High-profile cyberbullying cases often trigger exaggerated public concern about children's use of social media. Large companies like Facebook respond by pointing to their existing anti-bullying mechanisms or coordinate with nongovernmental organizations to organize anti-cyberbullying efforts. Do these attempts at self-regulation work? In this book, Tijana Milosevic examines the effectiveness of efforts by social media companies—including Facebook, Twitter, YouTube, Snapchat, and Instagram—to rein in cyberbullying by young users. Milosevic analyzes the anti-bullying policies of fourteen major social media companies, as recorded in companies' corporate documents, draws on interviews with company representatives and e-safety experts, and details the roles of nongovernmental organizations examining their ability to provide critical independent advice. She draws attention to lack of transparency in how companies handle bullying cases, emphasizing the need for a continuous independent evaluation of effectiveness of companies' mechanisms, especially from children's perspective. Milosevic argues that cyberbullying should be viewed in the context of children's rights and as part of the larger social problem of the culture of humiliation. Milosevic looks into five digital bullying cases related to suicides, examining the pressures on the social media companies involved, the nature of the public discussion, and subsequent government regulation that did not necessarily address the problem in a way that benefits children. She emphasizes the need not only for protection but also for participation and empowerment—for finding a way to protect the vulnerable while ensuring the child's right to participate in digital spaces.**

Linguistic Legitimacy and Social Justice

Springer **This book examines the nature of human language and the ideology of linguistic legitimacy - the common set of beliefs about language differences that leads to the rejection of some language varieties and the valorization of others. It investigates a broad range of case studies of languages and dialects which have for various reasons been considered 'low-status' including: African American English, Spanglish, American Sign Language, Yiddish, Esperanto and other constructed languages, indigenous languages in post-colonial neo-European societies, and Afrikaans and related language issues in South Africa. Further, it discusses the implications of the ideology of linguistic legitimacy for the teaching and learning of foreign languages in the US. Written in a clear and accessible style, this book provides a readable and pedagogically useful tool to help readers comprehend the nature of human language, and the ways in which attitudes about human language can have either positive or negative consequences for communities and their languages. It will be of particular interest to language teachers and teacher educators, as well as students and scholars of applied linguistics, intercultural communication, minority languages and language extinction.**
