Are Skills the Answer?

The Political Economy of Skill Creation in Advanced
Industrial Countries

Oxford University Press *This study of the problems confronting institutions for the creation of occupational skills in seven advanced industrialized countries contributes to two different areas of debate. The first is the study of the diversity of institutional forms taken by modern capitalism, and the difficulties currently surrounding the survival of that diversity. Most discussions of this theme analyse economic institutions and governance in general. The authors of this book are more specific, focusing on the key area of skill creation. The second theme is that of vocational education and training in its own right. While sharing the consensus that the advanced countries must secure competitive advantage in a global economy by developing highly skilled work-forces, the authors draw attention to certain awkward aspects of this approach that are often glossed over in general debate: The employment-generating power of improvements in skill levels is limited: employment policy cannot depend fully on education policies. While the acquisition of skills has become a major public need, there is increasing dependence for their provision on individual firms, which can have no responsibility for general needs, with government action being restricted to residual care for the unemployed rather than contributing at the leading edge of advanced skills policy. The authors argue that public agencies must find new ways of working with the business sector, acquiring expertise and authority through such means as supporting skills standards and taking the lead in the certification of employers as trainers. There must also be reconsideration of the former role of public-service employment as a provider of secure if poorly paid employment for low-productivity workers. The countries covered are France, Germany, Italy, Japan, Sweden, the UK and the USA.*

Product Training for the Technical Expert

The Art of Developing and Delivering Hands-On Learning

John Wiley & Sons *I was pleased to review Dan's new book - pleased because he addresses an old topic in a new way. He is making no assumptions for trainers who are not fully experienced and seasoned. He takes them step-by-step through practical and realistic methods to set up training graduates to actually be on-the-job performers. Enjoy, learn and be inspired. Jim Kirkpatrick, PhD Senior Consultant, Kirkpatrick Partners, USA Daniel Bixby's approach to Product Training for technical experts is practical, relevant and exactly what anyone who is required to train others on technical content really needs. He writes with candor and with a sense of ease, making the reader feel as though he is right there with you helping to develop your training competency. A must read for anyone on your team required to provide technical training to others! Jennifer Alfaro Chief Human Resources Officer, USA An expert guide to developing and delivering technical product training programs While there are many books on talent development, leadership training, and internal training program development, there are precious few offering subject matter experts (SME's) guidance on training others to get the most out of their products. Written by a training expert with many years of experience working at top technology companies, Product Training for the Technical Expert fills that yawning gap in the training literature by providing technical experts with a comprehensive handbook on becoming effective product training instructors. When new technology is rapidly transformed into products for popular consumption, technical experts, such as engineers, and other subject matter experts, are the ones tasked with instructing the public on their use. Unfortunately, most them have little or no prior experience or training in adult education and don't have a clue about how to transfer their knowledge to others. In this book, author Daniel W. Bixby draws upon his vast experience developing and delivering training programs at Honeywell, Delphax, Telex, Bosch, and TE Connectivity, among other technology companies, to arm SMEs with the knowledge and skills they need to add "Product Training Specialist" to their resumes. Addresses an area of training too often overlooked and ignored in the professional literature Equips SMEs with the tools they need to become effective product instructors Covers both the educational and business aspects of product training for SMEs Packed with tables, illustrations, problem-and-solution sets, tutorials, enlightening real-world examples, worksheets, and group or self-study questions Features a companion website with worksheets and other valuable tools: www.wiley.com/go/bixbycert A must-have professional development resource for students and experienced technical experts alike Product Training for the Technical Expert is an ideal guide forengineers, product managers, product marketing managers, and technical instructors looking to expand their repertoires and hone their skills. It also makes an excellent course text for graduate-level engineering programs.*

When God Calls, You Will Answer!

CertaPublishing.com *It is never too late, nor can you ever get so far from God that He will not accept you. Jesus said, "Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me" (Revelation 3:20). He is standing at the door and asking all of us to knock. He said if any man, woman, boy or girl has a voice, they should call out to him and He will answer. Salvation is for everyone! If we have but a little faith, He can work wonders for the lost. We cannot wait for a time we think we are worthy enough to approach God—we'd be waiting a life time! Jesus said, "Come unto me,*

all ye that labour and are heavy laden and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls. For my yoke is easy, and my burden is light" (Matthew 11:28-31). In, When God Calls, You Will Answer, George Ross encourages you to come and receive the saving grace that only Jesus can provide. Jesus has already completed the redemptive work for you. All you have to do is surrender to Him. Jesus taught us how to live in God's grace. Grace is an unmerited, free gift from the throne room of God and His Son, Jesus Christ, our Lord.

Musculoskeletal Assessment in Athletic Training and Therapy

Jones & Bartlett Learning *Written in conjunction with the American Academy of Orthopaedic Surgeons (AAOS), Musculoskeletal Assessment in Athletic Training provides a comprehensive overview of common injuries impacting the extremities and the assessments and examinations the Athletic Trainer can conduct. Unit I "Foundations" introduces the student to the foundations of examination, evaluation, and musculoskeletal diagnosis, providing a helpful recap of relevant medical terminology along the way. Units II and III delve directly into the lower and upper extremities, reviewing relevant anatomy, discussing common injuries, and discussing their assessment. Finally, Unit IV "Medical Considerations and Risk Management" provides an overview of factors to keep in mind when evaluating the lower and upper extremities, including the needs of special populations, environmental conditions, and other medical conditions that can complicate the evaluation.*

William Sharp and "Fiona Macleod"

A Life

Open Book Publishers *William Sharp (1855-1905) conducted one of the most audacious literary deceptions of his or any time. A Scottish poet, novelist, biographer, and editor, he began in 1893 to write critically and commercially successful books under the name Fiona Macleod who became far more than a pseudonym. Enlisting his sister to provide the Macleod handwriting, he used the voluminous Fiona correspondence to fashion a distinctive personality for a talented, but remote and publicity-shy woman. Sometimes she was his cousin and other times his lover, and whenever suspicions arose, he vehemently denied he was Fiona. For more than a decade he duped not only the general public but such literary luminaries as George Meredith, Thomas Hardy, Henry James, William Butler Yeats, and E. C. Stedman. Drawing extensively on his letters, his wife Elizabeth Sharp's Memoir, and accounts by friends and associates, this biography provides a lucid and intimate account of William Sharp's life, from his rejection of the dour religion of his Scottish boyhood, his turn to spiritualism, to his role in the Scottish Celtic Revival in the mid-nineties. The biography illuminates his wide network of close male and female friendships, through which he developed advanced ideas about the place of women in society,*

the constraints of marriage, the fluidity of gender identity, and the complexity of the human psyche. Uniquely this biography reveals the autobiographical content of the writings of Fiona Macleod, the remarkable extent to which Sharp used the feminine pseudonym to disguise his telling and retelling the complex story of his extramarital love affair with a beautiful and brilliant woman. The biography illuminates not only the talented and conflicted William Sharp, but also the cultural landscape of Great Britain in the late-nineteenth century. From late Pre-Raphaelitism through the "yellow nineties" and on to the excesses of the early twentieth century, Sharp dabbled in all the movements that comprised what some have called the Age of Decadence.

Authenticity in Materials Development for Language Learning

Cambridge Scholars Publishing *This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes research-based position statements, applications of theory to practice and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed, and many pedagogic suggestions are made. The contributions here have been written so that they are of potential value to teachers, to materials developers, to post-graduate students and to researchers. They are written to be academically rigorous, but at the same time to be accessible to newcomers to the field and to experienced experts alike.*

Explorations of Language Teaching and Learning with Computational Assistance

IGI Global *Computer-based technologies can enhance language learning and help students embrace the complexities of an additional language. Due to rapid technological changes, innovative teaching approaches and strategies are necessary in order to successfully integrate new technologies within language teaching. Explorations of Language Teaching and Learning with Computational Assistance provides cutting-edge research which evaluates, improves, and applies effective pedagogy in the fields of computer-assisted language learning (CALL) and foreign language learning. It expands on the principles, theories, design, and implementation of computer-assisted language learning programs.*
